Bryant Service Club:

Today I received your letter telling
of the news and happening at the school.

I know that all my classmates have gone into
one branch of the service or another and I
feel confident that they are proud to be serving
their country. Many times I suppose we dislike
this life but it soon wears off and you begin
to enjoy yourself.

It is also very nice to know the addresses
of fellow classmates because it is one way to keep

up a college life. It is surprising to see how
far many men are stationed from home and then
others are quite near.

At present I am in the south where it is nice
and warm. To you at this point the papers stated
the other day that it was 104° . (The hottest day this
year). After you get used to the heat it isn't so
bad but I would like to be up north just the same.

Bob Mitchell "43" is down here also. I happened
to see him coming out of the show. I haven't been able
to talk to him yet.

Thanking you for your very interesting

letter.

Robert A. Patt

P.S. I have been classified a pilot!
