The Archway Investment Fund - Equity Portfolio Bryant University

Monthly Report Data as of 12/31/2019

Portfolio Description

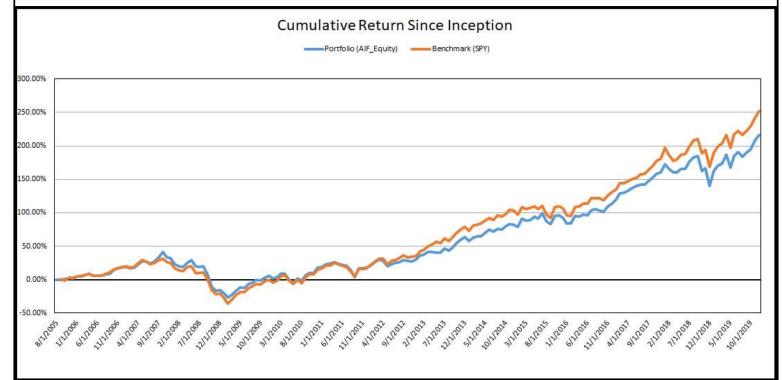

The primary objective of the Archway Investment Equity Portfolio (the Portfolio) is to provide students in Bryant University's Equity Portfolio Management course with a handson learning experience. Student portfolio managers are organized into teams responsible for managing the holdings in their assigned sectors. The Portfolio launched in August 2005 with \$200,000. Including subsequent inflows and outflows the net capital contributed has been \$450,000, and the cumulative investment return is \$1,082,629.

Investment Strategy

The Portfolio strategy focuses on buying stocks for less than their intrinsic value, based on both value and growth considerations, to achieve risk-adjusted returns that equal or exceed benchmark returns. The investment process is built around sector teams responsible for overseeing the holdings and the weightings of the securities in their sectors. Formal stock pitches are required to add new names to the portfolio. The inclusion of ESG factors into the stock selection process was a recent enhancement. Portfolio managers and security analysts utilize ESG metrics to identify risk factors and aid in generating risk-adjusted excess returns. The overall benchmark used for performance evaluation is the State Street SPDR S&P 500 Exchange Traded Fund (SPY), while benchmarks used for individual sectors are the corresponding SPDR sector ETFs. Each sector is initially weighted in the portfolio based on their weighting in the S&P 500 Index and are then adjusted to reflect portfolio manager expectations about the performance of each sector. While the purchase of international equities is allowed, the Fund remains heavily weighted in domestic assets. Option use is limited to covered call and protective put strategies. Options are used only to control risk and the underlying security must be held in the Fund. In 2018, monthly performance reports, performance attribution analysis, and factor risk modeling were added to the process.

Performance Commentary

The Archway Equity Portfolio returned 2.89% in December, while the benchmark returned 2.90%. The household sector of the US economy is healthy with low unemployment, accelerating wage growth, and strong consumer confidence. This led to a strong holiday shopping season. The agreement on a Phase One trade deal between the US and China also boosted equity prices, with technology shares benefiting from these developments. Higher oil prices also boosted returns in the Energry sector. The SPDR Energy Sector ETF (+6.03%) had the best return in December, while the Technoogy (+4.32%), and Healthcare (+3.48%) ETFs also had a strong month. The only sector SPDR ETF with a negative return in December was Industrials (-0.20%). Sector Allocation contributed -6 bps of alpha, due to the 2.7% allocation to cash at the start of the month. Security Selection alpha overall was negligible in December. Positive security selection alpha came in Technology (+24 bps) and Financials (+15 bps), while the portfolio experienced negative security selection alpha in Communication Services (-15 bps) and Healthcare (-13 bps). Apple (+39 bps) and Skyworks (+25 bps) made the largest return contributions to the portfolio in December, while Disney (-12 bps) and Southwest (-7 bps) had the largest negative return contributions. The student portfolio managers prepared the portfolio for the winter break and the new PMs who will assume responsibility for the portfolio during the Spring Term by initiating a few trades at the end of the semester entering stop loss limits for a number of individual names. The outgoing portfolio managers had a successful run with the portfolio returning 11.43% versus the benchmark return of 11.11% for the Fall semester (September through December). For the full calendar year, the portfolio returned 31.84%, beating its benchmark by 0.62%. Since the inception of the fund in August 2005, the portfolio has an annualized return of 8.38% and the benchmark has an annualized return of 9.17%.
