The Archway Investment Fund - Fixed Income Portfolio

Bryant University

Monthly Report
Data as of 8/31/2021

Fund Objective

The primary objective of the Archway Investment Fixed Income Fund (the Fund) is to provide students in Bryant University's Fixed Income Portfolio Management course with a hands-on learning experience. The Fund launched on October 27, 2017 with \$500,000.

Investment Strategy

The Fund seeks returns, including both income and price appreciation, in excess of its Benchmark, while maintaining a volatility less than 120% of that of its Benchmark. The Benchmark is the Fixed Income ETF GVI, which tracks the Bloomberg Barclays Intermediate Government Credit Index. That index consists of fixed rate debt securities issued by the United States Treasury, U.S. Government Agencies, plus corporate bonds and other taxable bonds that are rated investment grade, denominated in USD, and traded in the US capital market. The index includes debt securities with maturities between 1 and 10 years. This index was chosen due to its relatively modest volatility, its wide diversification, and its common usage as a benchmark for both active and passive intermediate term fixed income portfolios. It is expected that the tracking error of the portfolio versus this benchmark, defined as the annualized standard deviation of excess returns, will be kept below 2%.

Performance Commentary

The Archway Fixed Income Portfolio returned 0.00% during August, while the benchmark returned -0.16%. Speculation about the timing of adjustments to the Federal Reserve policy stance was a key driver of intramonth yield curve volatility in August. The market expected to hear some clues about reductions in the size of asset purchases from chairman Powell at the Jackson Hole conference, and in the end what he said in his speech was closely aligned to market expectations prior to August. The economy also continued to recover, but there were some disappointing data announcements, while other data continued to show a robust recovery. Inflation remained high as the combination of very stimulative monetary and fiscal policy stimulating demand met with significant constraints in both the manufacturing and shipping supply chains and labor shortages in many industries. Treasury yields moved higher through the first 3 weeks of the month, before declining slightly into month end. For the month as a whole the 2 year Treasury yield was up 2 bps, the 5 year up 9 bps, the 10 year up 9 bps and the 30 year up 4 bps. The portfolio entered the month underweight in duration versus its benchmark by approximately 0.6 years, and this was adjusted to 0.4 years short during the 3rd week of August. That underweight in duration is concentrated in the 5 year and 10 year points on the curve. The duration and curve exposures contributed 0.04% and 0.03% in alpha for the month. The portfolio has small overweight positions in government agency bonds, investment grade corporate bonds, mortgage-backed securities and high yield bank loans. In aggregate, spread changes in these sectors contributed -0.01% to alpha during the month. Income and security selection contributed 0.11% in alpha to the portfolio during the month. For the summer months, the portfolio returned 0.67%, while the benchmark returned 0.70%, and for the year thus far, the portfolio has returned -0.15%, while the benchmark returned -0.53%. Since its inception in October 2017, the portfolio has an annualized return of 3.50% and outperformed the benchmark by 0.20%.

Cumulative Return Since Inception

Investment Performance				Portfolio and Benchmark Characteristics		
Historical Returns through 8/31/2021	Portfolio	Benchmark	Excess		Portfolio	Benchmark
Since Inception Return (Cumulative since October 27, 2017)	14.16%	13.30%	0.86%	Option Adjusted Duration	3.73	4.11
Since Inception Return (Annualized)	3.50%	3.30%	0.20%	Current Yield	1.71%	1.38%
Month to Date Return	0.00%	-0.16%	0.16%	Yield to Worst	1.00%	1.09%
