Sunday 1500

Dearest Mom:

Well it'll be 6 weeks tomorrow
angel. Time is beginning to catch up
to me. It seems 6 years that I
haven't seen you. As you know I took
my psycho-moto test ~~on~~ Friday. It
was a lot of fun. It reminded me
of the penny arcade. It consisted
of a group of six tests the first
was finger dexterity. I had to
turn square pegs around 180 degrees
by lifting them out of their hole
and turning them and inserting them in
their new position. My score here was
pretty good. The next test consisted
of a phonograph turntable. On the
turntable was a spool that I
had to follow with a stylus as
it revolved, while with my left hand

I held two buttons. When the light on the left went on I pushed the button on the left, and the same with the right button. This was pretty good too. The next test was done with lights. lights blinked on in front of me. If the red one was below the green one I had to throw a switch nearest to me as fast as I could. If it was above the green I threw the switch farthest from me. If it was to the right of the green I threw the switch to my right, and to the left, to my left. That was rather easy. The next was a humding er I have to draw a picture.

The object was to keep the button A on the disk C. The disk ^{slowly} turned on a turntable and also move back and forth. The Button A was moved by turning

Handles B + C. C moving it away and toward me, B to my right and left. To make it more complicated the threads on these handles were reversed. This test really got me going. It test independency of hands. But my Boogie-Woogie playing helped me here as this developed my independency of hand. I think I did well.

The next test was terrific. I sat down at a machine with a panel of lights in front of me, i.e:

There was three rows of red lights and three rows of green as show. One red light in each red row was lit. My task was to line up the green light in the corresponding row with the red one

I moved the light in row one by moving the stick that was set in the floor in front of me to the left or the right. In row II by moving the stick away or toward me, and in row III ~~by~~ pushing on to pedals that corresponded to ~~vulder~~ pedals. When I had one combination lined up, they flashed off and another group of red lights went on in another pair of the corresponding rows. It was a hell of a lot of fun.

The last test was simple. I climbed into a small thing that represented a ship and by pressure on my left or right rudder I had to keep it aimed at a target. So end my test. all in all it took about 2 hours. This is the test ace will get in Nashville to determine his classification.

I got a letter from Mickey today. On the return address

Det. S. John Clark
301st Tg. Wg. BSC #12
Greensboro, N.C.

On the back of the envelope she
crossed out Holzheimer and
put in Walsh. She stays here.
She said that she'd call me
when she arrived in N.C.
on the 30th she must be
crazy. God knows she actually
liked to come down here.

I saw "hassie Come Home" here
it is marvelous isn't it? Well
you'll be Texas bound Wednesday
I hope you have a wonderful trip,
sweetheart, and say hello to Biggie
for me, I'll write her. In the
meantime take care of yourself
and give my love to all. I love you.

as ever
Fred
