## New Campus Model On Display

Clarence H. Gifford, Jr. Chairman of the Board and President of Rhode Island Hospital Trust, greets President Harry Evarts in front of a display of the new Bryant Campus which was shown at the Westminster Street office of the Rhode Island Hospital Trust National Bank this past week. The exhibit was arranged to afford the citizens of Rhode Island the opportunity to view Bryant's modern, new campus. Many people were heard to comment on the exhibit and the new campus.

## Tobacco Firms Eye Pot Market

by CHARLES FOLEY

SAN FRANCISCO (GPS) — Marijuana is now as American as Spiro Agnew's daughter — or so say forward-thinking executives of U. S. tobacco firms who have been covertly eyeing the underground market in "grass," officially valued at better than a billion dollars a year.

The real figure, say Western entrepreneurs, is nearer three times that sum, and now that the possibilities of legal manufacture are being discussed in the boardrooms, bootleg suppliers are organizing to safeguard their interests.

Long before New Year's Day, when the government shut down a \$250 million advertising industry by banning cigarette commercials on television, the tobacco men had been busy on contingency planning — one firm is allegedly running a furtive sale test scheme in Hawaii. At the start the big manufacturers would market their joints at about 25 cents each, well under current black market prices.

Business sources predict the end of the marijuana ban will follow the close of the Nixon era, for the soundly all-American reason that the swollen costs of the "new prohibition" exceed any good it may do. Enforcement costs in California alone are now running at \$32 million a year and courts are clogged with untried cases. Already 23 states have eased penalties, with more to follow.

Former U. S. Attorney, John Kaplan, a Stanford University law professor, and an authority on the subject, said this week that marijuana "could and should" be legalized. He inclines to a government monopoly

which would rule out advertising. Packets of the weed, graded by strength and heavily taxed, might be sold in government-licensed shops. Mr. Kaplan believes this open system would discourage use, particularly by teen-agers. Revenue would help to step up control of "hard" drugs.

But the underground does not mean to yield its rich, quasi-sacred grass market to the big-money men. "It's the economic basis of the counter-culture," says Blair Newman, a prominent San Francisco pot advocate, "We have to keep in out of the hands of the tobacco tycoons."

Believing legislation will come "within three years," Newman and his friends have formed a "philanthropic," non-profit organization called Amorphia to stake their claim.

More confident still is a San Francisco consordium of pot dealers known collectively as Felix the Cat. "Marijuana is legal," they say in publicity for their bold new venture — a packaged, filter-tipped brand of pot cigarettes named Grassmasters.

One "Mr. Felix" spokesman for the group told a radio station interviewer that 320 dealers in the Bay area are handling his first consignment of 5,000 cartons. A packet of 18 joints now sells at \$7.50, but he hopes to pass on savings to the smoker as the business grows. By early spring they plan to have an automated rolling factory in Mexico and two more, underground in San Francisco and Berkeley, with distribution centers from coast to coast.

Wouldn't the police object? Sure. But the government just

## Teacher Strike Not Likely

The contract between the College and the Faculty Federation expires in August, 1971. Negotiations between the College and the federation are now being held twice each week.

Tentative agreement has been reached in some areas. The greatest obstacle in the path of negotiations is *base salary*. The union initially requested a \$3,000 pay increase for all faculty members. After this request was ruled out of the question by the College, the union made another request which is "considerably lower but still quite far apart from what the College feels it should pay."

The teacher federation holds in reserve, as do all unions, the threat of a strike. Should negotiations break down completely and the teachers go on strike, students would not be affected before September, 1971, at the end of the present contract.

Informed sources feel that an amicable agreement will be reached before the expiration of this year's contract in August.

## Trivia Contest Next Week In Archway

A new contest will begin in the next issue of the ARCHWAY. "Trivial Trivialities" will be a test of your knowledge of trivial facts about movies, television, sports, and world records. Each week the ARCHWAY will ask you ten questions. The first student to bring, in writing, the correct ten answers to the activities office is the winner. The activities office is on the second floor of the Activities Building and is open from 8:00 a.m. - 12:00 noon and 1:00 p.m. to 4:30 p.m. Monday through Friday. The answers to our trivial questions will appear in the next issue along with the name of the winner. He may then pick up his prize (yes sir, — a prize) at the ARCHWAY office, also in the student activities building. Any Bryant student can win, so watch for it — "Trivial Trivialities" in next weeks ARCHWAY.

Gov. Licht Says

## Let's Get V.D.

Governor Frank Licht has announced a state-wide effort to reduce venereal disease which has reached panic proportions in the State, and "is probably doing far more physical and mental damage to our citizens than the drug problem."

A three-month program, which began last month, will emphasize the state's ongoing program of free and confidential medical assistance to persons affected by a venereal disease. People suspecting that they have the disease only need telephone 421-9836 to arrange an examination and treatment.

The Governor said that some 6,000 Rhode Islanders each year are estimated to have acquired a venereal disease, and a large number are not being treated for it. "Over the past six months alone, the number of known cases has doubled," the Governor said.

He added that in 1960, some 540 cases of the disease were reported. In 1968, over 1,700 cases were uncovered. "This means that in just eight years the disease tripled in the State, and continues to spread at a very rapid rate."

He added that the program will reach into the schools, neighborhood health centers, hospitals, and will reach the general public through public service messages in newspapers, on radio, television, outdoor advertising and bus advertising.

The theme of the program, "Let's Get V.D.," will be particularly directed at the 14-25 age group, where the incidence of venereal disease is the greatest, Governor Licht said.

He added that a key to the campaign is that young adults can be treated without parental approval, and in strict confidence.

Explaining why venereal disease is more dangerous than the drug problem, the Governor

labeled venereal disease a "silent" disease, one that wracks havoc but has no public visible signs by which it can be identified.

He said that this program will supplement efforts already underway to inform the public about the dangers of the disease, but is especially geared to those people who don't take the time to read newspaper articles about venereal disease, or don't read the brochures that have already been prepared and distributed throughout the State. "The campaign purposely has a certain amount of shock built into the message, which will draw the attention of all people to the problem, and to how it can be treated in a confidential manner," the Governor explained.

"Our Department of Health and private physicians working on this problem tell me that venereal disease can destroy the heart, nerves, liver, even the brain. The disease can make a person sterile, blind, crippled, and insane.

"In pregnant women, the disease can destroy children before they are born. V.D. can kill," the Governor said. He added, "What is difficult is that a person may not even know that he or she has the disease."

Governor Licht said "This new effort, we are very hopeful, will provide the vehicle for anyone even suspecting infection to immediately seek medical help."

The program will be executed with the cooperation of all the news media, the neighborhood health centers, hospitals, private physicians, public assistance employees, schools and many other organizations and groups, it was explained.

"We intend to blanket the state with our messages to be sure that we sufficiently impress on the minds of all people the seriousness of this disease," Governor Licht said.

## Future Home of Bryant

A sneak preview of the new home of the all-new air conditioned, fully carpeted, soft chaired, BRYANT CINEMA at Bryant's new campus in Smithfield. A progress report of the Smithfield Campus will appear in the next issue of the ARCHWAY.

# Student Trustee On Board Rejected

One of the major projects of last semester's Student Senate was an attempt to gain student representation on the Board of Trustees of the College. The following is a series of correspondence between Charles Cornelius, Chairman of the Board of Trustees and Reuben Abraham, past President of the Student Senate.

October 23, 1970

Dear the President and Board of Trustees  
Bryant College, Providence, R. I.  
Dear Doctor Evarts:

We feel that the students of Bryant College should be voting members both the Board of Trustees and the Executive Committee.

The Board of Trustees is legally responsible for the actions of the College. The Trustees hire the President, who in turn, hires other administrators. These administrators set College policy, execute the daily running of the College, and prepare an annual budget which has to be approved by the Trustees.

The College offers a program in which students decide to enroll . . . therefore, the students could be called customers of the College. If the students are satisfied with the program, a good academic environment is created. Students should have a voice in the type of education they receive; how it is administered; and the formulation of college policies.

Recently, the students of Bryant College have demonstrated a greater interest about College policies. Education is a two-way street; students have a right to be heard, and to have someone listen and respond to their ideas.

When students are on the Board of Trustees, learning takes place. Students learn about the financial resources of the College, how decisions are made, and about each other. As each group gains a greater understanding of the other, the so-called generation gap fades.

With the expansion of our College, we cannot afford to be divided internally. We must gain a greater knowledge of each other, so that we may improve our College and ourselves.

We recommend that the Board of Trustees appoint two students nominated by at least 40% of the daytime student body for one year terms. The appointees will not succeed themselves in this position, unless re-nominated by the student and re-appointed by the Board of Trustees.

An opportunity to discuss this proposal with you would be greatly appreciated.

Yours for a Better Bryant,

Reuben Abraham  
President, Student Senate

November 3, 1970

Mr. Reuben Abraham, President  
Student Senate  
Bryant College  
Providence, Rhode Island 02906

Dear Mr. Abraham:

The Board of Trustees of Bryant College has considered your request to elect two students to the College Board of Trustees. Your interest has been made known to us by the letters sent to the several trustees, by the visits of you and/or Mr. Street to discuss the matter with individual trustees, and by Mr. Evarts. The Board members were uniformly impressed not only by the clear-cut interest of the students in the Board, but also in the manner by which you made your interest known.

There were two major reactions by Board members to your proposal. We gained the impression that you felt student representation would provide student input into policy-making for the College. Indeed this would be so if two students became voting members of the Board. However, we feel that such action would disregard one of the Board's primary functions, i.e., to maintain an impartial stewardship, balancing the interests of the various constituencies and that of the public. If one holds this concept as we do, then a student sitting on the Board is the representative of a special constituency, and a conflict of interests between the needs of his constituency and the broader needs of the institution may develop. Using the analogy contained in your letter, one cannot be both a "customer" and a policy-maker, i.e., pleading one's own cause and then sitting in judgment of one's own cause.

A second reaction of Board members to your request is to become aware of a strongly-felt need of students for communication between student and the Board. The Board is pleased to learn of this and wants to be cooperative. To this end, we have requested Mr. Evarts to set up a program involving students and faculty with Board activities. These actions can take the form of students and faculty serving on Board committees; making presentations to the Board upon issues they consider to be of broad significance; invitations to students to meet informally with the Board at the times scheduled for the semi-annual meetings. I am sure that Mr. Evarts will have other suggestions to help facilitate communications and will be open to suggestions from you. Our present attitude is that if these initial steps work well, they can lead to additional student involvement.

Now I should like to make a procedural request of you. If you have business that in any way involves the Board, please communicate with me through Mr. Evarts. This is the normal channel of communication, and should work well for us given the newly-expressed interest of students in the Board and its activities, and your expression of confidence in our new President. This request does not preclude you from approaching me directly, without prejudice, at some future time should a grave situation arise and you feel you are not getting satisfaction from the President. Even in these rare instances, I do feel that the President should know you are approaching me.

Let me close by repeating that the members of the Board are indeed gratified to learn of the students' interest and look forward to this new relationship.

Very truly yours,  
Charles B. Cornelius

December 7, 1970

Mr. Charles B. Cornelius, Vice President  
Rhode Island Hospital Trust Co.  
Providence, Rhode Island 02906

Dear Mr. Cornelius:

Thank you for your courteous letter of November 3. The Student Senate was delighted to receive your reply in such a short time. After reading the letter the Senate was both pleased and disheartened.

We are pleased to have the opportunity to serve on Board committees and to become involved in other activities of the Board. The chance to work with the Board through Dr. Evarts is welcomed by the Student Senate.

Granted, the analogy of the student as a customer of the College could

have been phrased differently and more effectively. However, your reasoning in the second paragraph of your letter seems to be in direct conflict with itself. In referring to the impartial stewardship necessary on the Board of Trustees you state that a student sitting on the Board would be representing a special constituency and express the feeling that a conflict of interest may develop between the needs of his constituency and the broader, more vital needs of Bryant College. Yet, Dr. Harry F. Evarts, President of the College, is on the Board of Trustees. As President, Dr. Evarts is the leader of one of the various constituencies that you mentioned. Using your reasoning is it not possible that a conflict of interest might arise in the case of Dr. Evarts pleading a given cause and then sitting in judgement of that cause while acting as a Trustee? If this is your sole reason for denying membership on the Board, we cannot consider your denial as valid.

In regard to your procedural request, Mr. Street and I talked with you and Mr. Kelly personally after communicating with, and not receiving any satisfactory response from Dr. Evarts. Also, it was felt that a personal explanation would allow any questions that you might have had to be answered. In addition to this, Dr. Evarts knew that the "visits" were going to be held.

In closing, we reiterate that we are pleased to be involved with Dr. Evarts' program but we are displeased with your attempts to reasonably justify denial of membership on the Board.

Yours sincerely,  
Reuben Abraham,  
President Student Senate

After receiving the letter from Mr. Cornelius, Reuben Abraham states that he went to see Dr. Evarts to find out what committee positions were available. According to Mr. Abraham, Dr. Evarts told him that he (Dr. Evarts) would have to take this matter up with the Board of Trustees before making any definite statements. Mr. Abraham says this meeting took place "around the beginning of December" and that he had not heard anything up to the time of his resignation.

## Qualifications For Board As Set By President Evarts

The following is the criteria set forth by Dr. Evarts and ratified by the Board of Trustees for the qualifications of members of the Board.

The role of a trustee is complicated by the fact that it is still evolving. It is perhaps best thought of in light of his responsibilities:

1. A major responsibility is to represent the college to the community.
2. The fact that trustees are rooted in the larger community is important in connection with their responsibility to protect the institution from improper pressures or attack.
3. The most important responsibility of the board is to select a president.
4. Trustees of privately-supported colleges have become increasingly occupied with another fiscal responsibility — money-raising.
5. Trustees are responsible for effective and continuing communication between themselves and the faculty, students, alumni and administration.
6. The trustees are ultimately legally responsible for the college and hold its assets in trust, and must function as "a court of last resort."

### Selection of Board Members

The trustee candidate should have a deep interest in higher education, and he should know something about it. He should have the qualities of mind and character that will enable him to bring that knowledge to bear in a statesman-like way.

Most colleges have taken the view that a board should be made up of members from various segments of the community (e.g., business, professions, education). The diversity is desirable, but is workable only if the individuals so selected do not function as active representatives or agents of outside constituencies. The board should be a reasonably unitary body of men meeting to further a common purpose. In view of Bryant's traditional and continuing commitment to education for business, it is reasonable that its board should be weighted with men from business. Almost every board seeks to broaden its geographic representation.

More controversial is the question of personal wealth influencing trustee selection. Many a man selected for board membership on the basis of his bank account has proved to have contributions of statesmanship of offer as well.

Another question is whether faculty, students or alumni should be elected to the board. Trustees normally reject such candidates based upon severe conflict of interest: that is, first pleading their own cause, and then sitting in judgment on their own cases. Absence of such membership on the board does not imply lack of influence. Evidence suggests that these constituencies can achieve impressive power and autonomy without board representation.

### Organization of the Board

Most boards, particularly large ones, depend heavily on an active executive committee. As a rule, boards should have several other standing committees whose decisions are formally ratified by the full board. On some boards, all the significant work is done by the standing committees. A full board meeting concerns itself chiefly with review and approval of committee decision. A powerful committee system enables board members to become thoroughly familiar with some one aspect of college policy. Trustees gain significant education in such assignments, and they bring to the work special skills that would never be required in a general board meeting.

Committees of the board can be executive, finance, budget, planning, development and trustee selection. Although it is not common practice to have a standing committee on education policy, the current academic scene suggests that one may be useful. In this instance, it would be particularly necessary to safeguard that prerogatives of the faculty are not infringed upon.

Committee membership need not be restricted to trustees. In order to acquire special skills and knowledge, and to involve and communicate, faculty, students, alumni and administrators can serve on trustee committees.

### Criteria

- Interest in and knowledge of higher education for business.
- Represent a cross section of the community.
- Willingness to work on committees.

### QUALIFICATIONS

## Board the Band Wagon

(ACP) Do you really have enough to worry about? I mean, it's a brand new semester and it's a perfect time to get on the bandwagon for some pressing social issue, or maybe a forgotten problem a little more obscure.

Well, where do you begin? What can you concern yourself with? What pressing issues can you ponder and find a solution? Try these:

**TOILET PAPER** — Did you know that many environmentalists charge that the dye in colored tissues pollute the water; thus, contributing to an unhealthy environment? It's true. They say the dyes in colored tissues don't dissolve upon disposal and are actually dangerous themselves. Of course, tissue manufacturers argue that the dyes are non-toxic and actually dissolve as fast as the wood fiber itself. Ponder that one!

**POPULATION EXPLOSION** — The recently tabulated 206,408,669 American population is definitely "pinching" colleges across the nation. Did you know that Federal City College in Washington turned away 16,000 applicants for admission this term; Penn State, 10,400; the State University of New York at Buffalo, 6,150 according to the Christian Science Monitor. In a survey by the National Association of State Universities and Land Grant Colleges, 35 institutions were found to reject a total of 87,230 qualified applicants for admission this fall.

**LEISURE TIME** — The expanding population creates yet another problem. With more people to work, there is more leisure time. With more leisure time, there is the problem of what to do. Shall we digest the "boob tube," or shall we experiment with a drug? Ponder that.

## College Placement Interviews Down 21% From Last Year

The College Placement Council has released its findings on its survey of recruiting activities. The survey compared the 1970-71 recruiting activities to the 69-70 season.

Two thousand employers were surveyed along with 1,400 college placement offices including Bryant.

The findings of the survey were that in general the college recruiting picture is not as dark as speculation in some quarters had previously indicated.

Employers are making 21% fewer campus visits than they did last year. A number of employers stated that an up turn in the economy early in 1971 could result in an improved employment situation by the end of the college year.

The survey indicated that there is neither reason to panic nor to be blindly optimistic. Those with good qualifications and who actively seek jobs should find them. Those students who are majoring in Business appear to be least affected with an 18% drop in offers. Engineering and other nontechnical fields will find offers down by 27%. The hardest hit categories are science and other technical fields. Offers in these areas will be down by an anticipated 31%.

Reductions in the number of graduates hired according to the various degree levels are anticipated to be as follows: bachelors down 24%, masters down 22%, and hardest hit of all will be Ph.D.'s with an anticipated drop of 43%.

Of the 18 types of employing organizations surveyed, Public Accounting firms expect only a 2.5% drop in recruiting visits. Merchandising is expected to be off by 8.6%, and the glass-paper packaging group down by 9.7%. The greatest reduction in campus visits will be among the tire and rubber industries which will be about 53% with Aero Space off by 36% and Electronics by 31%.

Last year 1,000 employers in the council hired 69,400 college graduates at all degree levels. This year they expect to hire 53,400 or a drop of 23%.

Government agencies are planning to be the largest employer of college graduates this year, followed by banking and finance, insurance industries, and public accounting firms.

There will be greater competition for those jobs that do exist and students realizing the depressed employment market are registering for interviews in greater numbers. Bryant's figures have agreed with national averages.

Placement officers at 521 colleges surveyed indicated an increase of about 10% in registrations for company interviews.

Employers have stated a number of reasons, in addition to the nation's soft economy, for this reduction in recruiting activity on campus. Many firms are only replacing personnel lost through attrition. Also pointed out were lower turn over rates, larger and better selections of candidates. Travel budgets for recruiting purposes have also been trimmed.

## Ecology

(Continued from Page 2)

what role the Council is to take in assessing environmental problems. As outlined in the final version of NEPA, it can either serve in an advisory capacity to the President or perform a more public omnibus role. In addition to its clearly delineated functions of assisting and advising the White House on environmental matters, it is charged with conducting "investigations, studies, surveys, research, and analyses relating to ecological systems and environmental quality." That language leaves a broad latitude for interpretation.

In the capacity of advising the President, the Council has not made strong efforts to broaden its powers within the guidelines outlined in the legislation establishing it. The Dingle hearings revealed that department officials are going to differently interpret their relationship to the Council and the content requirements of the environmental impact statements.

The Council is not even sure if it can require or request statements from departments because the Act does not give anyone the power to decide what can constitute "major Federal actions significantly affecting the quality of the human environment."

The Act requires that all statements should be circulated to other agencies which have jurisdiction or special experience in the area of the impact of the project. Now no guidelines exist which elaborate on how and when this circulation should occur.

Presently the Council is refusing to release to the public the environmental impact statements until they are in final form. By the time they reach that stage little time is left for the public to evaluate the information.

Upon passage NEPA was hailed as the starting point for a decade of environmental awareness and protection. The intent of the original legislation was to make much-needed environmental information available to the federal government and the public to assess what man is doing to the planet.

The Act never intended the Council to have veto powers over government programs, but its passage did create expectations that information about the environmental impact of projects would be available to the President, the Congress, and the public to aid in the decision-making process. Even if the Council moves to require meaningful impact statements and makes them available to the public a number of problems will continue to exist.

## COMMUNITY INVOLVEMENT PROGRAM

An opportunity for Bryant people  
to enter constructional involvement

### YOUTH GUIDANCE (Big Brother — Big Sister)

Youth Guidance a program for underprivileged children in Central Falls. The program has been in existence for about 6 years. Volunteers are paired with a child. We go to Central Falls on Tuesday or Wednesday leaving after the 3 o'clock class and coming back about 5:30. Volunteers are asked to give one afternoon a week. This semester a series of lectures will be given to aid us in our work.

### SOUTH PROVIDENCE TUTORIAL

This program is part of Model Cities Program. They tutor children in that area between ages 5-12. They would like the volunteers to spend 2 days a week, but one is O.K. too. The program runs Mon-Thurs. It starts at 3 and runs to 4:30. A bus will pick the tutors up. If you are interested, fill out an application. There will be an orientation about mid February.

### ADULT CORRECTIONAL INSTITUTION

This program is working with minimum and middle security prisoners in a Rhode Island prison. It may be either a tutorial or friend relationship. We will be going out with Brown students to the prison one night a week. If you are interested please sign up before February 11.

### OTHER PROJECTS

Big Brother Big Sister Program in Fox Point on Individual basis  
Tutoring in Fox Point School — Draft Counseling —  
Ecology for Action

We are also planning a spring clean up in the Bryant neighborhood

**PLEASE! THIS WILL ONLY WORK WITH STUDENT HELP AND CO-OPERATION.**

Be into something constructive this semester; Commuters, Residents, Independents and Greeks let's work together.

All interested people leave your name and address in the Youth Guidance Box in the Activities Building or contact:

Steve Rosenberg — 331-0237

Bill Street — 831-9424

DAY TRIP TO LOON MT., N. H.

Tuesday 3:00 L-1

Only Day For Sign-Up

\$5.00 & Lift Ticket

Ordinary garbage from the can in your kitchen is now being made into oil, sugar, animal fodder, paper, and a soil conditioner — among other useful products. Once metals and glass are removed, says the December SCIENCE DIGEST, garbage can become one of our most useable raw materials. Paper, which is composed of cellulose, makes up to 60 to 70 percent of urban refuse.

You get colder on a windy day than on a calm day because of the "chill temperature," according to the December SCIENCE DIGEST. To figure out wind chill temperature, roughly, subtract the wind speed from the actual temperature. The chill temperature effect occurs because the wind rushes around the body, cooling the outer clothing. Eventually, the coolness penetrates to the skin, cooling the body surface.

# The Right Comment

By William S. Holden

## GIVE 'EM SUPPORT, NOT AMNESTY

Something has got to be done. In every major political campaign of the past few years, the candidates have called much attention to the law and order issue. Time and again we are reminded of the increasing crime rate and growth of lawlessness. We are urged to support the police. Since the police are the up-holders of the law, we should support the police.

However, support for the law should not be peculiar to select sectors of society. Everyone must be expected to follow the same principles, just as everyone must get equal treatment from the law.

At the beginning of this year New York City was again treated to its annual labor problems. For those not familiar with New York, New Year's Day is the day that all civil service employees get a new contract. At this time everyone and his garbage man goes on strike against the city.

This year, the New York City Police got in their share of action against the city. While no formal strike was called (it is against the law for civil service employees to strike) the police did not carry out their jobs. Only in emergency situations did the police perform any of their duties.

When the union for the police finally reached agreement with the city, the union promptly demanded amnesty for any illegal acts committed by the police. New York, being John Lindsay's kingdom, wasted no time in announcing that amnesty would be granted.

How can the police break the law, with the sanctity of the city against which they are striking, and expect to maintain the respect and support of the citizens at large? Unfortunately, the effects of this incident spread far beyond New York. Thousands of young children have seen or heard about this incident in the news. To these young children it will seem that breaking the law is an accepted method which may be employed to reach a desired goal, i.e., a child wants a new toy, he doesn't have the money to buy it, he steals it. The desired goal of obtaining a new toy has been met by following the example of the police; disregarding the law whenever convenient.

The next time John Lindsay is faced with increased lawlessness and he is unable to ascertain the *whys* and *wherefores*, he can always establish a commission to spend thousands of tax dollars while trying to find out.

"Law without penalty is mere advice" — Webster.

## Qualifications

(Continued from Page 3)

Willingness to work and provide financial support and/or help secure financial support.

An analytic mind to ask discerning questions and act as a "sounding board".

Stature in the community.

Recognition that faculty and students have strong attitudes, frequently make them known — not always at the right time — and that their right to do so should be protected, even when the trustee disagrees with them.

Support the President while reserving the right to question his judgments.

Placement of high value on professional teaching.

Represent skills needed by board (i.e., legal, educational, financial).

Approved by the

Bryant College Board of Trustees  
October 29, 1970

### Mr. Piperopoulos Plans Low Income Health Center

Mr. Piperopoulos, of the Psychology and Social Sciences Departments researched, planned, and proposed the opening of a "Health Center" to serve the needs of low-income residents of East Providence, Bristol County, R. I. The project was approved and financed by the State and by the Office of Economic Opportunity. Working for the anti-poverty agency in the same area Mr. "P" with the aid of Messrs. Arcuri, Illaqua, and Stearns, are conducting training workshops for residents of East Providence and Bristol County in such areas

as Drug addiction Civic Education, Consumer education and Principles of Organization. Mr. "P" is the project coordinator. . . Mr. "P" lectured on "The Sociological Perspective in Drug Abuse" at the Woonsocket High School, lectured on "What is right in our country" at the Cranston Rotary Club, and was the keynote speaker at the Rhode Island Dept. of Comm. Affairs' symposium lecturing on "The importance of management in social agencies." During the winter vacation, Mr. "P" wrote a proposal for a

self-help drug addict rehabilitation program to serve the people of Merrimack Valley, Greater Lawrence Area in Western Massachusetts. On January 15, Mr. "P" completed a chapter on "Social Welfare, Poverty, and the Establishment" to be included in a current sociology text that will be appearing in the Fall of this year. Recently Dr. Evarts and Mr. "P" were elected honorary members of Delta Mu Delta, the National Honors society in Business Administration; the honor was extended by the Bryant chapter of DMD.

## I'm Here To Answer Questions

Ronald J. Candelet

Questions about saving for the future, about creating an adequate estate for future responsibilities, about money and life insurance and you. I'm Ron Candelet, Connecticut Mutual Life's representative here on the Bryant campus. I hope I'll have a chance to answer your questions soon.

#### WANTED:

College men and women for management positions in government. Must meet physical requirements. Financial aid available for in-college trainees, or applicants can enroll in special training course on graduation. Stateside and/or overseas travel guaranteed.

Here's a government position with a real future for both men and women. An officer's job in the Air Force. A management level job in anybody's book. Certainly, there's no better way to get the experience and training needed for executive responsibility.

If you have two years of college remaining, you could find yourself earning an Air Force commission while you learn, through the Air Force ROTC two-year program. Along with college credits and a commission, you'll receive \$50 each month as a student. And upon graduation, that management position we promised will be waiting for you. If an advanced degree is in your plans, you'll be happy to learn that the Air Force has a number of outstanding programs to help you further your education.

If you're in your final year of col-

lege, you can get your commission through the Air Force Officer Training Program. It is open to all college grads, both men and women, who qualify.

Check it out. You'll find that the Air Force is one career that offers something for everyone. Nearly 430 different jobs, ranging from aeronautical engineering to zoology, with almost everything else, including flying, in between. But whatever your duties, you'll soon discover that the Air Force will let you move just as far and as fast as your talents can take you.

So look ahead and let your college years pay off for you with a managerial position in the U.S. Air Force. Just send in this coupon or write to USAF Military Personnel Center, Dept. A, Randolph AFB, Texas 78148, and get your postgraduate career off the ground.

# SNOW QUEEN CANDIDATES

**DONNA SUNDAY**  
Tau Epsilon

Donna's hometown is Bloomfield, Connecticut. She is 18 and presently a second-semester Executive Secretarial major. Her high school activities consisted of cheerleadings and being a member of the Secretary Business Club and the Future Homemakers of America Club. Donna's college activity interest is in intramural sports. She enjoys skiing, swimming, tennis, volleyball, skating, traveling, and reading. She wants to become an executive secretary and hopes to travel in her spare time.

**CLAUDIA McELROY**  
Tau Kappa Epsilon

Claudia is 18 and is a resident of North Providence. She is a second-semester Teacher Education student. In high school Claudia was a member of the National Honor Society and she received the North Providence Federation of Teachers Award. She is presently a Dean's List student here. Her interests are skiing and reading. Claudia wishes to go on to a teaching career either in high school or college.

**GEORGINE HIRCHAK**  
Phi Sigma Nu

Georgine is a first-semester marketing student. Her home is in New Milford, New Jersey. Some of her high school activities include the Dramatics Club, and the Latin Honor Society. Georgine's college activities consist of the Ski Club, Youth Guidance, and the girls' track team. Her interests are skiing, sewing, painting, photography, tennis, and interior design. Georgine plans on entering the field of fashion merchandising or advertising.

**JUNE LOPES**  
Phi Epsilon Phi

June Lopes is an 18-year-old executive secretarial student in her student semester. She is a resident of Cranston, Rhode Island. June was a member of the Rhode Island Honor Society and the National Honor Society in high school. Her interests are water skiing, tennis, sewing, horseback riding, boating, and swimming. June's future plans are that of becoming an airline stewardess and then going on to fulfill a successful executive secretarial career.

**CORINNA CALDWELL**  
Beta Sigma Chi

Eighteen year old Corinna Caldwell's hometown is Bad Honnef, Germany. She is now a second-semester executive secretarial student. In high school Corinna was a member of the Drama Club, the chorus, and was a teaching assistant. Her main interests are reading and traveling. Corinna's future plans include working as an executive secretary and traveling.

**PAULA MAIO**  
Phi Kappa Tau

An 18-year-old Providence resident, Paula is currently a second-semester legal secretarial major. Her high school activities were Glee Club, and the Honor Society. Here at Bryant, Paula is a Dean's List student. Her interests are ice skating, cooking, rock music, and dancing. She would like to work for a private law firm after graduating.

**SANDRA BALLIRANO**  
Theta Chi

Sandra is 18 and her hometown is Johnston, R. I. She is presently a second-semester executive secretarial student. In high school Sandra was a member of her yearbook staff; she was Junior Prom Queen, and 1st runner-up Homecoming '70. Sandra's interests include dancing and skating. Her future plans are that of becoming a successful and efficient executive secretary.

**KATHLEEN GOGLINSKI**  
Delta Sigma Phi

Kathleen Gogliniski is a 19-year-old Legal Secretarial student in her fourth semester. She was elected Outstanding Business Student of 1969 in high school. She was a member of Alpha Sigma Tau Sorority, and a Dean's List student. Her interests are water skiing, snowmobiling, skating, and swimming. She hopes to work as a legal secretary for a private firm after obtaining her degree here.

## Tupperware V.P. To Speak To Delta Omega

Delta Omega Professional Society will hold its first dinner-speaker meeting of the semester at the Admiral Inn, Cumberland, Rhode Island on Monday, February 15. Speaker for the evening will be James Hagan, Vice-President of Personnel at Tupperware. The main course will be baked stuffed shrimp or broiled special steak. Tickets are available from any officer or members of the board of directors of Delta Omega, including Alan Cicchetti, 330 Gardner Hall, and Danny Kahn or Howie Rivkin. Tickets should be obtained prior to February 10. Rides are available if necessary.

# THE ARCHWAY WANTS YOU!

## Award Winning "CIVILISATION" To Be Featured

The thirteen series film entitled "Civilisation" will be shown on campus for thirteen consecutive Wednesday afternoons commencing next Wednesday, February 10.

This series won numerous awards when it was on educational television. The films will be shown in the auditorium of the Activities Building at 3:00 p.m.

## Intern Programs Seek Candidates

Those students who would like to go to Washington as a legislative intern to either Senator Pell or Congressman Tiernan should contact Alan Arcuri in the Faculty House Monday at 3 a.m.

The Internship will be from February 15 to March 15. There is a \$50 stipend.

# Indians Edge Out Nasson; Set Three New Records

Setting three new records Saturday night at Marvel Gymnasium, the Bryant College basketball team remained undefeated in conference by winning a nail-biter 81-78 over Nasson College.

In the first half Bruce Stewart had the hot hand scoring 17 points and aiding Bryant to a 40-31 half-time lead. With Jim Gary dominating the boards and Tommy Burns' aggressive defense, the Indians once opened a 28-14 margin.

In the second half Nasson put

a full court press into effect. Bryant consequently suffered numerous turnovers and blew a 14-point lead to make it 74-74 with four minutes remaining. Captain Jim Gary then put Bryant ahead 76-74 with a short jump shot. Nasson knotted it at 76. Ray Depelteau, who replaced Tommy Burns who fouled out, put the Indians up again 78-76 with only thirty seconds remaining. Bruce Stewart then made his 24th point to put it at 79-76. Nasson cut the lead to

one with a quick basket. Bryant then had to run out the last twenty seconds to put it away, but a bad pass gave Nasson their final chance with 10 seconds left. Pete Porter came up with the crucial steal at the two-second mark and was fouled. He then put in his 20th and 21st points to end it at 81-78.

The three records that were set were (1) 68% shooting from the floor in the second half; (2) 55% shooting from the floor for the entire game; (3) 92% shooting from the foul line.

## Bryant Suffers 1st Conference Loss

It was just one of those nights, nothing goes right, the ball bounces the wrong way, and the referees just don't see it the way you do. Tuesday night Bryant played host to Barrington College in a crucial conference game. The starting five — Captain Jim Gary, Pete Porter, Tommy Burns, Bruce Stewart, and Sonny Garrick — started off trailing at one point 22-15. Roger Curry and Wally King had the hot hands for Barrington. Coach Folliard put the full court press into effect and with the help of Ray Depelteau, the Indians pulled out in front to a 40-35 half-time lead.

The second half began with both teams trading baskets. With Bryant leading 68-66 Barrington found our weak spot; they put a full court press into effect. Bad passes, bad breaks, and bad refereeing did Bryant in. Coach Folliard did everything in his power to find the right combination to beat the press. Barrington increased their lead to 80-72 with under two minutes left in the game. Pressing and fouling went to no avail as the Indians dropped their conference record to 4-1. Bryant faces ST. FRANCIS in a must CONFERENCE game on FEB. 6th away.

## Freshmen Topple Barrington

Roland Denny and Rick Shanley led the Bryant College Frosh to an impressive 74-56 win over Barrington. Denny put in 24 points to go along with Shanley's 15. The full court press and the extreme hustle put in by the team paid off rather well. Maurice (Spider) Sebastian came off the bench to do a fine defensive job. Dave Collier and Tracy Richardson helped spark the offense with 13 and 11 points respectively. Also appearing was Glenn Cantin who was recovering from the flu.

On January 30th the freshmen met highly-rated Mackin High School. Ward led Mackin to a 109-72 win by scoring 29 points. Roland Denny, Rick Shanley, and Bill Goudailler played fine games scoring 24, 15, and 13 points respectively.

### Bryant Frosh Wins Silver Medal

Roland Bessette, a freshman at Bryant, placed second in the Novice Men's Division of the New England Figure Skating Championship held in Hartford. Bessette, representing the Providence Figure Skating Club, is a Cranston East graduate. He and Pamela Rodi won the Silver Medal in the Novice Pairs Division.
