David Myers comes to Bryant

By: Janita Coates
Staff Writer

David Myers is a black man, born in Michigan, who is used to white for the first 26 years of his life. Myers' mother bore him out of wedlock in 1960 and later had his full-white siblings with the man he would grow to call his father. These were the times when relations between black and white people were looked down upon, so she quickly married a white man to hide the shame that Myers would bring. To hide her societal sin, Myers mother raised him to believe his whole life was a lie.

As far as he knew, Myers father had six children with more than two African-American women and never attempted to contact Myers' mother about him. Even if he had tried, it would have been too late, his family moved to spots in the South in the 70's. His mother and real father met at the Cleveland General Hospital where his father worked and his mother was a nurse's aid. As he matured into his teens and became more aware, he began to pick up clues. Once, his step-father uncharacteristically became so enraged with him over something that he had done that he grasped him by the neck and lifted him off the ground. Enraged, his mother immediately yelled, "Don't you hurt my son!!"

Another time, Myers was in the examination room at the doctor's office waiting for the doctor to enter the room when he began to read his medical records left on the tray next to him. Myers then read something to the effect of, "after his examination he had determined that he (Myers) was a Negro." Myers questioned the nurse who immediately took the records from him and returned them to him.

Not so speedy delivery at the Post Office

By Michael Yakawonis
Staff Writer

The term 'snail mail' took on added meaning over winter break when Bryant students discovered their mail either never came or came up significantly late.

Credit card bills, responses from graduate school admissions, subscriptions to newspapers, among a host of other prepaid services and answers to one's future failed to reach their final destination - the mailbox.

Today, some students mailboxes are still coming up empty and students cannot figure out the source of the problem.

"It wasn't a question of the subscriptions getting to Bryant - the problem was Bryant getting the papers into my box," frustrat­ed senior Frank Guest notes. It was suggested that the post office was understaffed in recent months, but Manager Ron Jameson cited the efficiency of his staff in refuting that charge, adding "We have a very student-con­scious staff, I have never received any complaints about mailers..." The post office employs seven staff members, both part-and full-time, aside from the general staff.

While the staff member de­voted to one during winter break, mail traffic also drop off. Which brings up the question, why did the senior Anthony Furnari, celebrate Christmas a month late?

"I got a Christmas card on January 26th... its all good," he says. "Of more urgency, it's got an application for grad school on February 1, it was poste­dated December 6." Accepting Mr. Furnari's relative knows the correct date of Christmas and the Bryant post office is a model of efficiency, the cul­pit lies somewhere in-between.

The mail does make a handful of stops prior to Bryant, namely at a distribution center in Providence and through the routes of publications' own trucks. For example, in Guest's case, the newspaper secured the shipments in transit.

A major accident that occurred three weeks ago in front of Bryant University has brought attention to the University's emergency evacu­ation plan.

The accident occurred shortly before 3pm on Thursday, January 26. A driver of a Nissan Maxima was driving southbound on Douglas Pike and crossed the center line, collided with a center­ trailer traveling northbound,场所. The driver of the car was pronounced dead at the scene.

As a result of the accident, a pos­sion of the school's exit was blocked. Students and faculty who wanted to take a right onto Douglas Pike were unable to do so and instead were rerouted through the property of Pidelity Investments.

Many students found this detour to be a minor inconvenience. Other students, however, could not figure out why the University did not open up a second exit enabling stu­dents to avoid the car crash that had built up Douglas Pike.

By the school's account the car crash happened a week before and was located near The Cornerstone and

Location: TOWNHOUSE
Summary: A DPS Officer reports the basement of a Townhouse was vandalized.

DRUG (POSSESSION OF MARIJUANA) Possession of Marijuana
FEB 9 2006-Tuesday at 12:30
Summary: Man reported to Medical Services and reported that he was pushed into the bushes.
The visitor was found to have a box.
The SPF used the box unit to obtain probable cause to open the box. Two non-students arrested by SPF.

ASSAULT Assault and/or Battery
FEB 12 2006-Sunday at 00:49
Location: RESIDENCE HALL
Summary: An individual called DPS and reported that he was pushed into the bushes and sustained some injuries.

BIOHazard INCIDENT None reported
To report a biohazard incident or hate crime, go to www.bryant.edu/bias or call the Bias Incident Hotline at 6920. Bias related incidents - a threatened, attempted, or completed action that is motivated by bigotry and bias regarding a person\'s real or perceived race, religion, natural origin, ethnicity, sexual orientation, disability, or gender status. Examples of these incidents include name calling, offensive language/acts, and graffiti/behavior.
WJMF unveils new studio

By: Kevin Bancker
Staff Writer

Whether you like rock, hip hop, reggae, Nashville country, or comedy, WJMF has it all. It is truly the best of Bryant and this semester WJMF is going to step it up another notch after unveiling the station's new equipment on this past Wednesday, February 15th. The station has come a long way from its origin during the early 1970s at the original Providence Bryant Campus. When the station started its frequency level was 91.5 and was powered by 10 kilowatts. Now, over 30 years later, the frequency has changed to 88.7 and its power is 500 watts. The biggest addition to WJMF this semester is going to be aired through the station's new studio featuring state of the art equipment including new microphones, soundboards, outdoor speaker, and a new sign.

WJMF reveals its new studio featuring state of the art equipment including new microphones, soundboards, outdoor speaker, and a new sign.

WJMF has grown over the years and continues to get bigger with all the state of the art equipment and technology provided by Bryant. It is a great tool for Communication majors or anyone who is interested in music. If you want to get involved with the radio station or possibly become a DJ check out the website at www.wjlllf.com.

Keeping Healthy During the Flu Season

1. Avoid poorly ventilated areas.
2. Avoid close contact with people who are sick.
3. Wash hands often.
4. Keep hands away from eyes, nose, and mouth.
5. Cover your nose and mouth with a tissue when coughing or sneezing.
6. Cough and/or sneeze into your elbow, not your hand.
7. Avoid tobacco smoke.
8. Avoid alcohol.
9. Sleep 7-8 hours each night.
10. Eat a well-balanced diet.
11. Seek medical attention if you become ill.

Symptoms of the Flu

Symptoms of flu include fever (usually high), headache, extreme tiredness, dry cough, sore throat, runny stuffy nose, and muscle aches. Gastrointestinal symptoms, such as nausea, vomiting, and diarrhea, are much more common among children than adults.

Spread of the Flu

A person who is sick with the flu can spread viruses. That means they are contagious from one day before developing symptoms to up to seven days after getting sick. Children can be contagious for longer than 7 days.

How influenza viruses are spread when a person who has the flu coughs, sneezes, or speaks directly into another person, or when a person touches a surface with virus on it and then touches his or her nose or mouth.

For more information, visit www.cdc.gov/flu.

leads us onto George Washington Highway. The exit is blocked by a locked chain that precludes students from using the road.

Many years ago this road was opened up on an ongoing daily traffic relieving congestion on the school's campus. Bryant University Public Safety officials, however, were eventually contacted by the town of Smithfield in regards to their use of the road. Smithfield town council members informed Bryant University that they had agreed to a ruling that prohibited their use of the road, except in emergency situations.

So not only are we opened up to the second exit if there is a life threatening situation or a situation that threatens the public's safety," said Department of Public Safety Chief George Coronado.

In an event of an emergency situation, such as a fire or chemical spill, both the Smithfield Fire Department and Bryant University Department of Public Safety have keys to unlock the second exit. In addition, the University has the ability to open up a third exit. This exit is currently blocked by a few small boulders, but is directly across from the second exit and leads out onto Brayton Road. The boulders can be easily removed if the evacuation is urgent.

Although the tragic accident three weeks ago raised questions among students about the school's alternative exits and evacuation plans, the Department of Public Safety officials have always prepared for emergency situations.

At any rate, whatever the mail service was a non-factor last semester and in years past. Given the time of year, when job hunting takes off, let's hope a solution is found sooner than later.
Survivor Series - Why do you Relay for Life?

By: Kristina DeAngelis

Staff Writer

With life, there come things that are happy and things that are sad. Some might say that it is much more complicated than that, that there are many other variations of the two, but in simpler terms, there are only the two. These things are as vast as the varieties of occurrences, ranging from simple pleasures, such as ice cream on a hot summer day, to monumental tragedies, such as death. Many people strive to only experience the happy moments, and go to extreme costs to avoid the pain that cancer has brought to them.

The American Cancer Society is a group that is dedicated to eliminating cancer as a major health problem by preventing cancer, saving lives, and diminishing suffering through collections of money, blood, and more. The ACS has predicted that in 2005, about 1,500 people will die of cancer every day. With such a monstrous tragedy happening every day, it is all the ACS can do to work hard each and every day.

One of the major events that brings in money for the ACS to fund research in hopes of finding a cure for cancer and taking care of those that have cancer, is Relay for Life. Relay for Life, according to the ACS webpage, “is a fun-filled overnight event designed to celebrate survival and raise money for research and programs of your American Cancer Society. During the event, teams of people gather at schools, fairgrounds, or parks and take turns walking or running laps. Each team tries to keep at least one team member on the track at all times. Relay for Life represents the hope that those face cancer will be supported, and that one day, cancer will be eliminated.” This year, Relay for Life will be held on April 21st, 22nd for Bryant University.

This new feature, the Survivor Series, is an opportunity for those who have been affected by cancer to share the pain that cancer has caused in their lives and to show how much suffering one disease can bring to so many people. It is not only for people who have been diagnosed with cancer themselves, but also for those who have lost someone important to them. It is an opportunity for people to show the personal side of cancer and to give another opportunity for people to show the pain that their loved one has ever experienced.

As a young girl, my mother dreamed about the day her father, Murray Mills, would give her away. Now, she is speechless as the doctor asked her this simple question. Never did she imagine her family would fall victim to the disease of cancer.

My grandfather, Murray Mills, was diagnosed with cancer at the age of sixty-three. Doctors were skeptical of his survival. My mother and her family were devastated at the news. Murray would undergo several procedures throughout the next few years in an attempt to cover the cruelly disease. No one could be certain of his future, all they could do was make the most of his time left. My mother met my father when she was 18. They began dating and in the blink of an eye, they were engaged. Murray and 21 was too young to be married, yet for two people secure in their esteem, my mother a nurse, my father a financial executive, both financially stable, and madly in love, it was perfect. My mother spent every free day, hour and second planning out her fairy tale wedding.

My parents met the date, November of 1978. The excitement was overwhelming. Plans were being finalized. Invitations were in the making. My mother’s wedding dress was hanging in her closet. Her dream was finally coming true. It seemed as if nothing could dampen her spirits.

The wedding was two months away and everyone could hardly wait. Despite his aching body and dismal mental state, my grandfather was overjoyed that his youngest daughter had found the love of her life. Although Grandpa Murray was saddened by the thought of his little girl all grown up, he beamed with pride as he watched my mother prepare to marry the next stage of her life.

My mother was summoned into a private room by the doctor she worked for, hardly prepared for the life-altering moments to follow. A simple questioner with a simple answer. It was essential that her father escort her down the aisle. She refused to have it any other way. At that moment, she realized the wedding could not wait until November. Two months were waved and the wedding was moved to 3rd September of 1978. Only a few close family friends were in attendance. The elaborate celebration my mother had once dreamed of was now a simple church with a few flowers. But all

**Winter Intramurals Update**

**By Kevin Bowker**

**Staff Writer**

**The Chace Wellness Center** - The start of another intramural sport season is under way and like most things at Bryant University, intramural sports by many people is taken very seriously. However it is an overall fun time to come and support your fellow Bulldogs this spring!

**Silent but Deadly**

**By Chris Ficilora**

**Staff Writer**

**The Choice Wellness Center** - The one spot everyone has been talking about yet never hears about is indoor track.

**Halfway through their season, the Bulldogs have been improving exponentially and we all look to the way to the Northeast-10 Championships at SCSU this weekend.**

**For this season Has Aregi, a sophomore, has returned to his second season of smoking the competition in the 200, 400, and 800 meter events. He’s captured first place in four different events including a rough start in the finals of the men’s 100 meter at the Northeastern Husky Classic in December, finishing with a school record time of 12.24 seconds.**

**Later at the Wesleyan Invitational, Oregi struck again capturing top honor in the 400 meter in a record 49.10 seconds, and the 500 meter with a time of 5.7 seconds. He also put his name in the record books at the Smith College Invitational with a long jump distance of 27 feet, capturing top honors. Another Bulldog record setter, Jerry Laguerre ’08, continues his outdoor career with a record of 6 feet 2 inches in the high jump. Other rising stars include Caleb Paul, a senior and Joe Brennan, a junior.**

**On the women’s side of the track, Natalie Stevenson is the name. Stevenson, a freshman, has been no less impressive than Oregi, setting school records in the 55, 200, and 400 meter events. She also captured the top spot in her place finishes in the 200 long and jump at the Wesleyan Invitational. This week she broke the school record in the 200m back in December at the Northeastern meet, with a time of 26.6 seconds. She later beat her record at the Harvard Invitational finishing in 26.06.**

**However, Stevenson is in the process of recording setting business, a female fellow by the name of Jennifer Goodwin, a junior, set the record in the 400 meters with a time of 3 minutes and 19.45 seconds, and let’s not forget Nicole Raddick in the 1800m, posting a time of 10 minutes and 58.25. Some other track stars include Amanda Early ’09, Rachel Marzolli ’09, and Jessica Skiba. The last indoor meet will be this weekend at SCSU hosting the Northeast-10 Championships. After that the Bulldogs have a nice break until the outdoor season starts.**

**Bryant recently renewed the track for this upcoming season, thus it will be housing two new track and field facilities, the first home meet with be the Bryant Invitational, Saturday the 8th in April. The other home meet, our second to any, will be the Northeast-10 Championships, in May, so don’t forget to come out and support your fellow Bulldogs this spring!**

ICE HOCKEY

Hockey is one of the oldest sports at the Winter Olympics, dating back to their debut in 1920. Since then, the sport has grown in popularity, and it remains one of the most exciting events in the games. The games feature some of the world's best athletes, competing at the highest level of the sport. The event is watched by millions of people around the world, and it is considered one of the most exciting and entertaining sports at the Olympics.

Snowboarding

Snowboarding, a sport originally conceived for transportation, has proven to be one of the most popular sports in the Winter Olympics. In 1988, the event was added to the Winter Olympics, and it has grown in popularity ever since. The sport involves riding a board down a snow-covered slope, performing tricks and jumps, and reaching high speeds. The event is highly entertaining and attracts a large audience. The best snowboarders are considered to be some of the most talented athletes in the world.

Where is Torino, Italy?

Torino, Italy, is a city located on the banks of the Po River, in the northern part of the country. It is the capital of the Piedmont region and has a long history as a major cultural and economic center. The city has a population of over 900,000 people, and it is known for its beautiful architecture and art museums. Torino is also home to two major sports teams,尤文图斯足球俱乐部 and Torino F.C., and it is the site of the Winter Olympics in 2006.
By Joseph Hansen

I can die happy, I have been told, if it's of certain tracks of my favorite songs of his. Scrooge as an Italian Restaurant and Woody Allen as the director. The actor who drives "the wolf" to his family's house, the wolf is not familiar with computer animations, but the movie was obviously done "for the cheap," as the saying goes. I reviewed it.

The concert stood on the edge of the town and the audience, making you feel as though you were in a movie theater, rather than a rock concert. "The Glass House" opens with a dramatic, yet comedic, ending that checks the audience, and lighting effects add the finishing touches, making you feel as though you were part of the show. What this movie sets out to show you is that you may have missed when you first heard it. The story is that we're all familiar with: Little Red Riding Hood, I was reluctant to go see it at all, and let's face it: the woodsman is a German. The wolf, for those of you who are bored to death, tried to find the source of the howling. It was voiced by Patrick Warburton, voice actor for both Joe Swensen in Family Guy and Keesok from the Emperor's New Groove movie and sequels. Warburton keeps his perfectly timed and tuned sense of humor in Hoodwinked, training with the squirrel who talked too far for his own good to steal the show and make it a very enjoyable experience.

Ultimately, it's a good movie in acting and humor, and very well done for what they had available. I give it four out of ten humorous squires. So head on out to the theater and you can thank me later.

Billy Joel Rocks the Hood

As the two and a half hour concert ended, the audience became more mainstream, with Downstairs Alice, Piano-Man, and The River of Dreams. However, the highlight of the concert was not the song by Billy Joel. Rather, it was when Joel invited one of his long time crew members, who's birthday it was, on stage to perform. Joel himself invited a guitarist while the musician sang Highway to Hill by AC/DC, turning the arena into a rock concert. Cell phones in the air, lights flickering, the night was alive with music. Joel even mentioned that he would never see this again.

One friend and I decided to go out in typical Italian fashion and jump over to the Northend for some nightlife. The only problem was everyone else had the same idea. After waiting in the rain at one of my favorite restaurants, we were too high for the line to get to another one of the Northend's favorite night spots. Then this is no trip to complete with a trip to Mike's. After a short cab ride (we didn't have a car) in the rain, it was over to the Garden. The front door was packed, not an empty seat in the house. One of the most interesting things was the age of the people in attendance, ranging from college age to couples in their mid-twenties. All there for one reason, to see one of the top selling recording artists of all time.

The concert was three times as long as I expected and that was the transformation of her hair color. Instead of a little girl she has become a teenager. The Glass House opens with a dramatic, yet comedic, ending that checks the audience, and lighting effects add the finishing touches, making you feel as though you were part of the show. What this movie sets out to show you is that you may have missed when you first heard it. The story is that we're all familiar with: Little Red Riding Hood, I was reluctant to go see it at all, and let's face it: the woodsman is a German. The wolf, for those of you who are bored to death, tried to find the source of the howling. It was voiced by Patrick Warburton, voice actor for both Joe Swensen in Family Guy and Keesok from the Emperor's New Groove movie and sequels. Warburton keeps his perfectly timed and tuned sense of humor in Hoodwinked, training with the squirrel who talked too far for his own good to steal the show and make it a very enjoyable experience.

Ultimately, it's a good movie in acting and humor, and very well done for what they had available. I give it four out of ten humorous squires. So head on out to the theater and you can thank me later.

State Radio has delivered their first full-length album, A Bell For The Devil, Against The Crown, commanding vigorously with both new tracks as well as new recordings of notable songs from previous EPs. Classic songs like "Against The Crown," "Political" and "Mr. Larkin" have a new electric sound, while politically charged songs like "Canvas" and "Riddle" in London, previ- ously only available on bootleg live recordings, are presented fully digitally for your listening pleasure. Check out State Radio tonight (Feb 17) in Providence or the Century Louge/k

Hoodwinked, A cartoon Red Riding Hood?

By Tom Quinn

Oh, back again for another week of Hollywood ridiculousness, the sights and sounds of the life of a group of people bent on making everything you know about Little Red Riding Hood into a rock concert. Cell phones in the air, lights flickering, the night was alive with music. Joel invited one of his long time crew members, who's birthday it was, on stage to perform. Joel himself invited a guitarist while the musician sang Highway to Hill by AC/DC, turning the arena into a rock concert. Cell phones in the air, lights flickering, the night was alive with music. Joel even mentioned that he would never see this again.

The concert truly proved to be Billy Joel at his best. Not only did he perform for a full two and a half hours but he ran around the stage the entire time as if he were twenty years young. As one of the highlights was the climax of the song "We're All Alone." Joel pushed the envelope by jumping in the air, clapping his hands, and let's face it: the woodsman is a German. The wolf, for those of you who are bored to death, tried to find the source of the howling. It was voiced by Patrick Warburton, voice actor for both Joe Swensen in Family Guy and Keesok from the Emperor's New Groove movie and sequels. Warburton keeps his perfectly timed and tuned sense of humor in Hoodwinked, training with the squirrel who talked too far for his own good to steal the show and make it a very enjoyable experience.

Ultimately, it's a good movie in acting and humor, and very well done for what they had available. I give it four out of ten humorous squires. So head on out to the theater and you can thank me later.

1. In the given text, a person by the name of Senator Saritelli is mentioned. It is important to note that Senator Saritelli is not a real person. He is a fictional character created for the purpose of this article in order to provide a clear example of irresponsible political commentary.

2. The text discusses a series of bill proposals and amendments, such as the Patriot Act, the USA Patriot Act, and the McCain-Feingold Act. These proposals were discussed in order to provide a context for the discussion of political commentary.

3. The article includes a discussion of the role of the media in political commentary, and how the media can be influenced by the need to achieve equal engagement.

4. The article mentions a number of other proposals, such as the McCain-Feingold Act, the USA Patriot Act, and the Patriot Act. These proposals are mentioned in order to provide a context for the discussion of political commentary.

Letter to the Editor:

Editor Response:

One of the most interesting sections of a newspaper is Opinion. In this section, writers who often do not have any voice in the newspapers or writers who wish to have a column where they can choose the topic they wish to write about. It is important to remember the difference between other sections, such as News and Sports, which are written by reporters who are trained in the craft of writing. In the Opinion section, articles are not necessarily required to be written by professional writers. A writer who submits an article for the Opinion section gains information about the topic and the feedback from readers. A writer who submits an article for the Opinion section gains feedback from readers and can use this feedback to improve their writing. A writer who submits an article for the Opinion section gains information about the topic and the feedback from readers. Simón Says: What’s Your Sexual IQ?

By Toby Simon
Staff Columnist

This week, I’d like to introduce you to yet another one of those really small companies that I like to follow. Traffic. Specifically, I’m referring to the new car in the United States in a few years, the one that will come equipped to comply with standards of having a LDW system. This technology would certainly make us safer. When you switch lanes without checking your blind spot, you receive a warn ing.

Many accidents occur as drivers veer off the road. Because of this, many highways now have some form of rumble strips. These strips have been proven to be very effective in preventing accidents, both the problem resistive that they are costly and cannot be put everywhere. With the LDW technology, there are virtual rumble strips everywhere there is a road line, thus minimizing accidents and running off the road. In fact, in 2003, 51% of all highway-related road fatalities were caused by an unintended lane departure accident! Imagine what the reductions in insurance companies could be for those that have the LDW system in their cars and trucks!

The second product I mentioned is the Vantage Video Detection System. Right now, 49 state agencies are using it along with Asia, Latin America, Europe and China. They are not only towns, cities, and states ripping each other to pieces, but are also looking to assess traffic congestion, in order to assess traffic patterns that can be submitted to the algorithm used to determine if the communication in person is concentrated or alternative routes may be taken. Vantage can take video surveillance for homeland security needs, which we all know will eventually be mandated. If states don’t have the money to pay for this and don’t want to, the Federal Highway Board will provide the money.

As we’ve seen all at the potential that this company has, it is not uncommon to see that companies are fast on the cash flow. This is especially true when it is a young and growing company. We should be watching them.”

I’m just going to leave you with the following: ”If I can’t get you to go to our two-four of your own products, I’ll just let you decide what is your potential! But be sure to let me know how.”

The Portfolio: Iteris Shows Potential

By Peter Ziegler
Staff Columnist

Based in Anaheim, California, Iteris is a technology leader in systems and software that improve transportation. Overall, the company has some pretty neat technology that is already being employed by truck drivers across the nation and others throughout the world are beginning to employ it. I’m going to give you a run-through of two of their most popular products and I’ll let you decide what their potential is.

Vantage Video Detection System: This company has a sensor used to optimize the operation of traffic signals reducing delays and congestion for the morning routine. This product can also be used to snap video as well as record excellent sur veillance. Now, I would like to comment further on the two main products that Iteris has and why I view them as having potential to make some serious dough.

First, let’s talk about the lane departure warning (LDW) system. I feel that this is the key driver of the company, where they are expecting 59% of all highway related accidents to result from an unexpected lane change. Furthermore, the objective here is to prevent collisions and increase the safety of drivers. When a car is about to cross a lane, the LDW system issues an alarm, which helps drivers avoid potentially dangerous situations.

Second, Iteris’s Vantage Video Detection System offers a comprehensive solution for traffic management and surveillance applications. This system combines advanced video analytics with real-time data processing to enable efficient and effective traffic monitoring. The Vantage system is designed to provide operators with a detailed overview of traffic conditions, allowing for enhanced traffic management decisions. It offers real-time data collection for traffic counts, congestion analysis, and incident detection. The system can be used to monitor traffic flow, monitor accidents, and mitigate congestion, ensuring smoother traffic flow and improved road safety.

In conclusion, Iteris’s products demonstrate the potential to significantly impact traffic management and surveillance, providing solutions that can improve safety, reduce congestion, and enhance traffic efficiency. Their technology offers a comprehensive approach to traffic management, making Iteris a company to keep an eye on for future growth and potential acquisition opportunities.

-End-

By Ronn Dales
Editor Opinion

Even though the internet has increased, expanded, and advanced our technological abilities, it has taken quite a toll on the English language. How is this an everyday occurrence? In a word: it’s bad. With a capitalization of $52 million and it’s making $10.5 million, we can see that the fact that this company has more than it is being made, but it is not being capitalized. Even more, with a recent $4 million funding round, we are certainly seeing that the potential of Iteris is high. Iteris’s potential in the market could be in the billions of dollars, and this is due to the company’s ability to integrate their software with other transportation systems, which can improve efficiency and safety on the roads.

The Scenario: By February 17, 2006
