Bryant Campus Moved To Lincoln

By Dynamic Doo Jr. USA TOMORROW

"This move will be quite beneficial to the students as a whole," stated Les LaFond, Vice President for Student Affairs, as he announced the plans for the construction of the new Tupper Campus of Bryant College in Lincoln, Nebraska.

"This new campus will be a resident's dream. It will have all of the amenities that one could ever desire," said LaFond. "However, it will be a bitch for the commuters, but these things happen."

"The new campus will benefit us all and truly increase our national appeal," stated Bryant Executive Vice President, William Trueheart.

The campus is being moved to a new location in order to facilitate the conversion of the Unistructure at the current Smithfield campus into new faculty offices (see related story). The conversion will take place during the summer of 1990.

Although the new campus is not expected to be operational by the 1990-1991 academic year, a steel shelter will be constructed to temporarily house classes. Resident students will be furnished with camping equipment and provided with space on an adjacent prairie as temporary residence halls.

The question of the distance between the new campus and the new faculty offices was raised by many people concerned about the project. LaFond explained that the college would provide transportation between the two facilities.

"Bryant President Donald Trump has previously donated a fleet of six spruce-leaf jets to the Bryant Transit Authority," the college has promoted Public Safety Chief Richard Wheeler to the position of Chief Pilot to conduct the air-transportation division of the BTA. Contracts have been signed to create a Lincoln-Lincoln shuttle for the faculty members. The BTA will run the thirteen-hundred mile shuttle service from the North Central States airfield in Lincoln, RI to the O'Hara Intercampus Airfield in Lincoln, Nebraska, respectively.

The campus will feature twin high-rise suite-style dormitory towers, a freshman complex, and two senior condominium villages. Five style dormitory towers, a freshman complex, and two senior condominium villages. Five ponds will be strategically located across Nebraska Move, 3A

Unistructure to be Converted into Faculty Offices

By Professor Plum and Marvin Gardens USA TOMORROW

After the second space utilization study in a year, college officials have announced that all classrooms in the Unistructure will be replaced by faculty offices. College officials sighted the need for faculty offices in the space and the "obvious waste of space" by classrooms, as the primary reason for the change.

"We're not saying the quality of student life is not important, we're just saying the needs of the faculty outweigh the needs of the students," a college official stated.

The conversion will be completed for the 90-91 academic year. Tuition will not be raised, officials stressed. Instead, students, wishing to attend classes at the new location, will be charged a user's fee.

The plans call for the transformation of Koffler Rotunda into the new faculty lounge and renamed Pepper's Place, where no smoking will be permitted. Pepper's Place will come complete with a full service bar (with daily happy hour), live entertainment, lighted dance floor, and satellite television.

Upon the completion of faculty suite G in the former pool area, M-wing classrooms will be converted into the Les LaFond Fitness Center. The Center will include an Olympic-size pool, a tennis jaccuzi, and seven sauna's. The facilities will be for faculty use only.

Salman's Dining Hall will become the Carol Word Trueheart Cafe, a 5-star restaurant to be run by the Four Seasons Restaurant of New York. The career atmosphere of Bryant faculty, faculty suite F will be destroyed in order to return the Cafe's ceiling to its former three-story height.

"Bryant can't hope to attract faculty with the current parking conditions," college officials stated. Therefore, the entire first floor of the library will be transformed into Wheeler Carport, a valet parking facility with a capacity of three-hundred cars.

To make the Unistructure a truly full-service faculty building, the third floor classrooms will be replaced by a full-service hotel. The Sheraton Corporation has signed a contract with the college to run the O'Hara Lane, complete with vibrating king-size beds, whirlpool tubs, cable tv, and room service.

Ivana Sues "The Donald" for Bryant Presidency

By U.R. Gullible USA TOMORROW

"If Donald thinks he's going to get away with Bryant, he's as crazy as that floozy Maples!" stated Ivana Trump at a pre-dawn press conference in her office at the Trump Plaza Hotel today. Mrs. Trump locked herself in her office on the top floor of the hotel when the news of her husband's alleged affair with actress/model Marla Maples broke last month.

"I'm not coming out until the little tramp throws herself off the Tappanzee Bridge," screamed Ivana through the doors of her office.

Ivana indicated her plans to sue Donald for the presidency of Bryant. "I was taken by the beauty of the campus when we came here to except the presidency last year. Of course I couldn't use much of it in the dark, but it looked really pretty."

Donald was named president of the college by the Presidential Search Committee last year.
ARA Loses Food Service

By the Frugal Gourmet
USA TOMORROW

The dining service contract has been awarded to STAAF for the upcoming academic year. STAAF will replace ARA Services as the food provider to the Bryant College campus as of August 1, 1990.

STAAF (Student Against Toxic Foods) is a student owned and student run company that will operate as a division of Brycol, the parent company. STAAF will be controlled through the Brycol Board of Trustees.

The change is the first in the dining services since 1983, when ARA Services replaced ARA Dining Services at Bryant College for the Rhode Island Division of ARID-US.

Violations of workers' health and safety rights have been filed against ARA by the Rhode Island Division of Labor and Employment Relations (ARID-US) in connection with the death of its worker, Matthew Smithfield. The division cited the ARA employees as being responsible for the death of Mr. Smithfield, who was killed when he became entrapped in a large double oven. The oven was being made over by ARA's workers, who were required to perform dangerous tasks as mixing toxic compounds. The division cited the ARA workers as being responsible for the death of Mr. Smithfield.

ARA Dining Services Cited for Violations

By Oil Can
USA TOMORROW

The Rhode Island Division of Unemployment Services cited the ARA Dining Services at Bryant College for "alleged violations and abuse" regarding its workers.

A R.I. US representative had been present to inspect the employees and facilities of ARA Dining Services. The inspection was performed to ensure that the workers were not being mistreated or mistreated. A R.I. service.

The remaining classrooms will be transformed into new faculty offices for those faculty members showing exceptional interest in teaching new subjects. The offices will be equipped with modern furniture and technology to support the new teaching methods. The new classrooms will also include additional space for student research and collaboration.

By Flick My Bic
USA TOMORROW

In a startling turn of events yesterday, construction workers removing the pool to build new faculty offices turned up the body of alleged mobster Donald Trump buried under the swimming pool. Donald Trump, who was banished from the city in 1989 for declaring bankruptcy, was found in the pool with a hammer and a bag of money.

"This is a very important discovery," said police Chief Richard Wheeler today. "It's clear that Donald Trump was involved in criminal activities, and we've found evidence of this in his body. We now have the body of the man who was involved in the crime of murder, and we are moving forward with our investigation."
**Salmon Swarms Overcome Paris**

By Zut Alors
USA TOMORROW

The recent change in the weather patterns that brought the harsh December and the mild February to New England has also affected Europe. In recent weeks the weather in Europe has been plagued by violent storms, with winds reaching 125 km per hour. Apart from the destruction of property, these storms have had a curious affect on nature. Every spring, salmon swim upstream to mate at their birthplace, often overcoming impossible barriers and eventually dying of exhaustion. This year, however, the salmon have chosen an entirely new river as their eventual goal.

"We change is only for this time it seems the salmon have changed their instinctive migration. Swarms of the heaviest of the salmons' spring migration. Swarms of fish are currently battling the river, that eventually leads them to Paris. Scientists have been unable to explain this phenomenon, currently attempting to link the migration with the heavy storms of the last weeks."

"It seems that the salmon have lost their sense of direction, almost a loss of memory," reports one scientist. "We have no idea if this is a permanent change, or if the change is only for this spring."

**Public Safety Heads to Florida - ROTC Patrols Campus During Spring Weekend**

By Really Wacked
USA TOMORROW

A recently intercepted high memo indicates that Public Safety will be sent to Florida for spring weekend and a legion of 125 ROTC cadets will resume the duties usually reserved for the public safety officers. Participating cadets will come from Bryant, UConn, Holy Cross College, and URI. All cadets will be the on-site supervision of Captain Wolfenden. According to Wolfenden the "Area of Operation, AO will be the entire campus."

The move is an attempt to enforce the campus wide curfew and curtail the rowdiness of the estimated 5,000 attendees of Spring Weekend. President Trump, officially out of town, has pledged to "keep the operation as clean as possible."

Student Senate President-elect, Mark St. Pierre is totally excited. "I was hoping to make the campus a handler, gentler campus. That doesn’t seem likely now."

As dawn on Thursday the cadets will arrive in a spectacular parachute drop. In addition to the 125 cadets, 4 M48 tanks retrofitted with water cannons, 2 HUMMER vehicles, and assorted supplies necessary to support the operation will be air dropped. As a few weapons is concerned the cadets will be armed only with rubber bullet firing assault weapons.

By Oil Can, The Bass Man, and Flick-My-Bic

The Students of Bryant College have come through once again. They have maintained their campus that they are not the lazy, uninvolved college students that generally plague the nation. They have responded commendably to the call of organization leaders everywhere. Organization membership has increased dramatically in the past few months. The membership crisis, for all intents and purposes, has been solved.

According to the Office of Student Activities, more than 70 percent of all resident Bryant students are now involved, in some manner, in one of the campus organizations. This is up from only 10 percent just a few months ago.

The active role that the students of this college have taken in creating a unique and invigorating environment here on campus is incredible. Students have truly answered the call for involvement in the student organization that displays that students are not just automated, robotic, humanoids just fulfilling their daily requirements of sleeping, eating, and studying.

For example, current Student Senate President Harry Franks has succeeded in boosting the number of candidates running for senate this year. Franks reports that more than 75 students will be running for the 18 positions on the Senate. This will make the Senate contest one of the most challenging in recent years.

The Student Programming Board has acquired over sixty new members. As a result, their meetings have been moved to the Rotunda from the Bryant Center to accommodate the increased participation. SPB has announced that as a result of their increased membership, they will be able to provide more and better quality programming for the resident students on this campus. Their plans for the next month will include daily comedy programs, featuring the best of Boston's newest comedy minds, and a weekly Friday evening event featuring a local or Boston-based band.

As a result of the drastic increase, some of the student organizations have been forced to re-organize to accommodate for the larger governing bodies that they represent. SPAC and the Office of Student Activities have reported a backlog in requests for changes to organizations' constitutions.

This turn around in the Bryant Community has been phenomenal. The extremes that the students have gone to in this situation to become involved has been admirable.

Some students have even gone as far as to propose to the Student Senate for the creation of a Camping Club, a Wheat Farmers Club, and a Square-Dancing Club upon the completion of the move to the new Tupper Campus in Lincoln, Nebraska. For students to be that involved in their community even before they get there is amazing.

Bryant students have proven that they are not just hear to get an education and nothing else. They have shown that they are truly interested in expanding their horizons, in expanding their knowledge, in expanding their involvement, and in expanding their leadership abilities.

They have proven themselves to be do-ers and not followers, something that will set them apart as future business leaders of the world.

IBM better than Macintosh? Macintosh better than IBM?

Joe Macintosh

O.K. so you say you like IBMs. Well have you ever used a Macintosh? Have you ever really seen one in the flesh? Well then who do you think are saying those blue meters are better?

Let face it people; forget that Macs are faster, prettier, easier and smell better; they are infected with a virus that is spreading throughout the nation, Rhode Island, Smithfield, Lincoln (Nebraska or Rhode Island - its your choice) and the other surrounding areas as well as the campus that the late, great, Earl Warink left us in soem scenario Smithfield.

The references to our college President, Donald Trump, are all made with the highest respect possible. The doctors tell us that he has encountered while serving as President of this institution have come to the forefront and we, all reportants, have every responsibility to you, the people to fairly report the news as it happens. If we happen to raise a little hell now and then - oh well, maybe the Chicago Times was right. Anyone not familiar with the President should refer back to the USA TOMORROW of April 1, 1989 in which the President's acceptance of the Presidential Family should refer back to the USA TOMORROW of April 1, 1989 in which the President's acceptance of the Presidential Family will be reported.

All photographs were illicitly obtained by sneaking into hidden passageways and secretly taking the pictures when nobody was looking.

USA TOMORROW News departments do not actually exist. They are merely the creations of deranged minds affected by too much Mountain "Drunk." All ideas are figments of our imagination.

By Big Blue Computer Geek

Macintosh better than IBM? What are you crazy???

Second, who uses Macintosh?? Why would anyone ever want to use a Macintosh? They are small, weak (when compared to strong and powerful IBM), and just can't get the job done. No one in the business world would ever want to use something that was second rate, would they?

Everyone in the business world uses IBMs. Only one or two fools use anything else. By using anything but an IBM, you are just intentionally segregating yourself from the rest of the world. Segregation, as far as computers go, means being behind the times.

Macintosh, Never. IBM has a ruling place and will stay there forever.
Tupper's Goes National

By Oil Can
USA TOMORROW

Tupper's, the Brycol run pizza and sandwich establishments located in the Bryant Center, has announced that it will refund itself to campuses across the nation this summer.

The move was spurred by the growing demands for its services on campus, according to Brycol Vice President Shawn Gagan.

The franchise packaging will include the Tupper's logo, rights to all Tupper's secret recipes, and any extra Pepsi cups that remain after the end of the current school year. Tupper's franchisees will maintain the same menu at all locations.

However, some local entrees may be added at the franchises, provided they are approved by the Brycol Board of Trustees.

Today, twelve franchise locations have been announced. Boston University, Northeastern University, and the Massachusetts College of Pharmacy will join in September. Columbia University in New York City will open a franchise in October. Harvard University is scheduled to open a franchise in late November or early December.

John Hopkins University in Baltimore, Maryland and Georgetown University in Washington D.C. are slated to open Tupper's franchises in December. The University of North Carolina at Chapel Hill and Louisiana State University are slated to open their franchises in January 1991. UCLA and UC at Berkeley will bring Tupper's to the west coast in February 1991. The US Air Force Academy in Colorado and the US Coast Guard Academy in New York will be the first two branches of the military to have Tupper's franchises. The franchise is scheduled to open in April or May 1991 respectively.

Another Tupper's location will be at the new Bryant Campus in Nebraska. This location will not be considered a franchise. It will be an extension of the original Smithfield location of Tupper's. The original Tupper's will still provide service to the Bryant Community even after the campus move. Direct express delivery service to the new campus from Smithfield will be featured until the new Tupper's location in Nebraska can be built.

The expanded locales will mean an increase in the expansion of the delivery service from Tupper's. Tupper's delivery times for the fall have tentatively been scheduled for every fifteen minutes to each dorm from 5 p.m. to Midnight. Service on Fraternity and Sunday evenings will be extended to 3 a.m. The delivery service would also make deliveries for the Country Comfort and the Stafal dining services at Bryant.
Bryant to Join Penn State as New Member of Big Ten

By Flick My Bic
USA TOMORROW

With a face obviously beaming with pride, Athletic Director Leon Drury announced yesterday that Bryant College will be admitted as the newest member of the Big-10 conference beginning in the 1991-92 season.

“This is a key moment in the history of Bryant sports,” stated Drury. “This will bring national recognition and TV money from the Big Ten Television network.

Bryant will be making the leap to Division I with all of its athletic teams. Plans for a new 10,000 seat basketball stadium have been developed. The stadium will be located with easy access to via monorail the three level parking garage that has been planned for the new Nebraska campus (see campus map, p. 1A). The stadium will be open in 1995. Until then, the Indians will play in their home away from home in the Omaha Civic Center, sharing time with the Nebraska Community College Seed Plant.

President Drury has promised to donate his shuttle to the team in order to make road trips easier on the players.

Drury is one of several candidates that men’s head coach Ed Reilly will quit next week to take a position with Turner Brothers Department that men’s head coach Ed Reilly will quit next week to take a position with Turner Brothers Department.

Drury was quoted as saying, “I'm deeply touched.”

THE MEN’S BASKETBALL team has pledged that when they win 10 in a row next season, they will pierce their ears. Coach Ed Reilly was quoted as saying, “What are they going to do if they lose 10 in a row, wear a dress?”

Super Bowl Monday Still Produces Debate

by Bob
USA TOMORROW

Sports fans, this week in sports could be one of the most memorable in recent times. The ramifications of some of the goings on this week could have a profound effect on sports as we now know it. For example, who would have thought that Super Bowl Sunday would become "Super Bowl Monday" and become a national holiday. Vice President Dan Quayle stated last Tuesday that "every since my dad got me a spot on the high school team, football has meant a lot to me. I feel by making the Super Bowl Monday a national holiday, politicians can get another day off to play golf." President Bush was hesitant at first, but after two days of deliberation, finally agreed to "let Danny have his way". Daceine Boston: We've seen Bob play two sports. We've seen Neon Deon play two as well. Who's next? Bill Buckner. Nokidding? Bill Buckner aims just a baseball legend anymore. Billy Buckner set a new 55 meter print record, blazing the trail in just 5.32 seconds. Buckner blew away the field, beating the likes of Carl Lewis, Ben Johnson, and Manute Bol. Buckner then went on to break Edwin Moses' unbeaten streak in the hurdles, trouncing foes by almost 4 seconds. Many officials claim Buckner may have been on RURALNOAT, a mild form of steroids mixed with cocaine. A storyline is being undertaken, and the results should be out easy next week.

Other wild and exciting tidbits- former Dallas Cowboy Herman Ed "Too Tall" Jones has decided to try his luck at professional tennis, teaming up with 13 year old Jennifer Capriati on the high school circuit. The result was an impressive 6-4, 7-6(132-130), 7-5 victory over the unseeded team of Joey Bar Shoemaker and professional wrestler Mr. Fuji. In basketball action, the Miami Heat are looking to hire Ed Reilly as their assistant coach of "rebounding off of a three-point play when there is only 2:05 left in the game and they're down by less than four points". Reilly feels confident he can do the job effectively. This, however, leaves opens opportunities at Bryant. The three people that look most promising for the job are Bryant's own Les Lanford, Rolando Blackman of the Dallas Mavericks, and Kay Conans of ARA food services. The race is still tight, but it looks like Kay will get the nod. In an interview with Kyr, she feels her first step as coach would be to hire Lottie as defensive coordinator and one of the yellowjackets as assistant coach. Here's just a few other tidbits: Former Jazz coach Frank Layden won this year's "Mr. Potahen Head" lookalike contest in Idaho; pro-baseball players have decided to play for free simply because they love of the game; when Bryant moves to Lincoln, Swimming, Diving, Boating, Bobbing, and Drowning will all become varsity sports; Duke star Christian Lawernt is hospitalized after a group of 400 angry UNC fans peel his skin off; Idaho Tech beats out South Dakota State in this year's NCAA cow tipping contest (Una MAins came in third). Bryant College Lacrosse remains unbeaten this year, as they refuse to play anyone but Syracuse. President Pete Bizer states "they're our only competition". Bryant will play Syracuse Monday at 4, Thursday at 3:30, and Saturday at 8 under the lights. Detroit's Isaiah Thomas remains hospitalized after he choked on a bottle top during the filming of a Minute Maid commercial. Thomas suspects foul play, and accuses New York's Pat Ewing of rigging the can before the commercial.

Just one final note: The Notre Dame athletic department, as well as those of Miami, Oklahoma, and Texas, have decided to go professional. Their football programs will become expansion teams, 2 in 1991 and 2 in 1993. And their baseball squads will become triple-A ball clubs next year. A consensus coming at the Athletic Directors of all four organizations was "the money is better". Until next week.

PUBLIC SAFETY CHIEF

Richard Wheeler will announce today that he will initiate a new "singing escort" program to entertain students requesting escorts from C-3. Officers driving the blazer will take voice lessons for two weeks and be awarded a special driver's license qualifying them to sing and drive simultaneously.

JIM ROBINSON, Vice President for Academic Affairs has qualified for "The American Gladiators" competition. Tryouts for a spot in the competition, which involves six tests of physical strength, were held in Providence last week. The show appears on Channel 12 late nights on Saturdays.

BRYANT ALUM and former Archway editor Stephen H. Jagel has been named to the editorial board of Patishc magazine. Jagel was instrumental in establishing a disk-top-publishing (DTP) system for production of The Archway, and is generally known in the civilized world as a DTP god.

DEAN MIKE PATTERSON has published his latest novel, Tenure in American Colleges and Universities through Gannet Publishing Company. The book deals with the issues of tenure as it is dealt with by schools of higher education across the USA. Selling price is $12.95, and part of the proceeds are to be used for the legal fees involved in Patterson's lawsuit vs. USA TODAY, a suit that evolved as a result of a quote taken out of context by the newspaper.

THE PHONACON, Bryant's annual fundraising event in conjunction with its neighbor, the Smithfield Federal Holding Facility, raised over $3,245,000 in a 24 hour period over last week. The closing event last night was a comedy/talent/variety show featuring both students and "dreadlocks". The performances ranged from simple song and dance routines to the very elaborate after the last act.

Donald Trump, gave the performers a standing ovation.

Performances ranged from simple song and dance routines to the very elaborate after the last act.

Facility, raised over $2,345,000 in a four day night was a comedy/talent/variety show featuring both students and neighbors, the Smithfield Federal Holding Facility. The crowd, led by Ivana Bryant's annual "detained".

"I picked this up from my Daddy as a young boy down south."

Richard Wheeler will announce today that he has qualified for "The American Gladiators" competition which involves six tests of physical strength.

Bush to Attend Star Trek Convention

President Bush will be seen here at a Tuesday press conference, will attend a Star Trek Convention in San Francisco tomorrow. "I have always been my dream to join the Vulcan race," stated Bush. However, his pointed ears fell off during the press conference.

President Bush will attend a Star Trek Convention in San Francisco tomorrow. "I have always been my dream to join the Vulcans race," stated Bush. However, his pointed ears fell off during the press conference.
