**HAUNTED HOUSE: LEGEND OR TRUTH?**

**By Eb Mills-Robertson**

*Archway News Editor*

Everyone would agree that a good horror movie should have a spooky, malevolent character and more than an eerie, nightmarish setting. The idea of "zombies" may be a little far fetched but the combination of a zombie and a chainsaw serial killer at the box office is sure to be a hit irrespective of reality. Bryant supposedly has its own fair share of movie making legends. Or are they more than just legends?

According to local narratives, the Amy Mowry House, which is now inhabited by Dr. Eakin and his family is haunted. The house was built in 1828 and was a typical Rhode Island farmhouse consisting of a large brick chimney and as entry with a full embattlement and side lights common to Greek Revival buildings.

It was one of two farmhouses connected to the Joseph Mowry House, which was built in 1708 and now serves as Bryant's Alumni House.

Captain Joseph Mowry's House was served as the first Smithfield town house. Records are not sure about his time of death, however, the property passed through several descendants till it became the property of Earl S. Tupper.

Earl Tupper donated the 220 acres land to Bryant College and the houses were preserved in accordance with the Historical Society of Rhode Island.

The house has however been redone in order to make it habitable for the Eakin family. Renovation started in May 1998 and in January 2000, the Eakin family moved in.

The first thing you notice when you walk into the house is an imposing brick fireplace. The house still has an 19th century colonial farm house theme- the original floor panels have been kept and new floor panels brought in where the original panels had rolled out.

There are thick, rough beams supporting the ceilings and a winding, compact stair-case leading to the upper floor and the attic.

The furnace, which was used to make food, has been preserved but serves as their wine cellar in a sense.

Above the kitchen door is a bar and from this hangs Mrs. Eakin's dried flowers and herbs.

The attic and the basement still spoke volumes of the past few issues, because it was an entry with a full embattlement and side lights common to Greek Revival buildings.

With the light on and in the company of Mrs. Eakin, I could not help but feel the hairs on my neck stand up straight.

In a sense, this sounds like the start of a horror movie. All it needs are the necessary elements to make it complete.

First of all, we need an ancient house and the Amy Mowry House is 174 years approximately. Secondly, we need a house with an uncertain history.

The house fits this exact description. There are no detailed records of who lived there when they lived there.

The house is named Amy Mowry House and thus, seems to be named after someone. However, after extensive research, I came up with these ghosts Keith Anderson.

This is the gravestone head of Thomas Mowry, who was a former resident of the Eakin's home.

Willard Mowry who was dated as between 2nd Feb 1828- 1895. The house was built in 1828 and it is possible that it was named after him.

If Keith Anderson was a former resident of the Eakin's home, it was one of two farmhouses connected to the Joseph Mowry House, which was built in 1708 and now serves as Bryant's Alumni House.

Two top weapons inspectors told United Nations Security Council on Monday that a draft U.S. resolution on confronting Iraq would allow a strong disassociation from inspections, although they said some points need to be clarified.

The briefing from Hans Blix and Mohamed ElBaradei seemed to bolster efforts to push the U.S. resolution through the divided 15-member council. It is believed that the resolution will be put forward within days, but its success is expected to be a final week of intense negotiations. Several diplomats on the council had said they would weigh the inspectors’ views in deciding how to vote.

After the meeting, U.S. and British co-sponsors of the draft resolution seemed full of renewed enthusiasm. Though the fate of further U.N. negotiations remains uncertain after six days of talks, U.S. officials said they hope for a vote later this week.

Politicians Remember Wellstone; Speculation Focused on Mondale as Successor

By John McCorristick
Chicago Tribune, courtesy of Knight Ridder Newspapers

Morning Sen. Paul Wellstone was remembered for his political accomplishments as Senate Majority Leader, a successful environmental activist and a man who took on seven other plane crash victims.

Republican Sen. Norm Coleman, the former St. Paul mayor who was challenging Wellstone in the polls, tried to take the move out of the campaign yesterday.

Wellstone, who had been an intense and sometimes harsh campaign against Wellstone, a two-term incumbent, in the Senate.

Wellstone, his wife, Sheila, their daughter Marcia Markussen, and five others were killed yesterday when a small plane went down in freezing rain Friday in Eveleth, Minnesota.

Senator Paul Wellstone and wife Sheila, with their daughter Marcia Markussen (center) at a fund raiser last month. Wellstone, his wife, their daughter and five others were killed when their plane went down in freezing rain Friday in Eveleth, Minnesota.

Photo courtesy of Knight Ridder Newspapers

Chairman Melzer said he’s convinced Mondale will run if acceptable to the party at the Wednesday convention.

Mondale’s team also turned more political in tone as Tuesday dawned.

Sen. Wellstone was going to write to the governor. He was ahead in the polls, he said. “I don’t think there should be any confusion.” Wellstone was going to write on this election. 

Daschle stopped just short of endorsing Mondale.

“He is a person who has given great strength in this state and this country,” he said. “There is little doubt that the people of Minnesota and the people of our country could unite behind his leadership.”

“I was very disappointed with the very negative tone that Mr. Coleman took in his speech,” Daschle said. “I just hope that he can refrain from being as negative as he has depicted.”

The political heat is bound to rise as high-ranking Democrats and Republican leaders in the state begin to make moves.
Campus News

(Haunted . . . come from pg. 1) chimney into the house. However, there have been no cause for alarm for them considering the fact that the Hall 4 and 5 parking lot is behind them and ear doors slam shut all the time.

The cracking noises are easily attributed to the age of the house.

The only time that they heard footsteps and thought the legends might be real, they found out that it was a Public Safety officer delivering a newspaper.

In a sense, the Eakin family could be either categorized as ghost insensitive or maybe the ghost left due to Reverend Joseph Pecenalla blessing the house.

According to Father Joe, "it is common in the Christian tradition to have a house blessed in God's name.

Thus, it was just a blessing and does not seem to have been at exercised like most of you readers would have wanted it to be.

It is high time that the audience realize that not everything they saw and experienced in the 'Exorcist' happens in reality.

In reality, there have been experiences by others than the Eakin family. In 1970 the school had been recently constructed and the houses had been moved that unwholesome part of campus.

In 1972, Robert Aust (the late Physical Plant officer presently) had a spooky experience.

Bob Powers, his supervisor had sent him to fix some mechanical wiring in the attic in preparation for guests. He flashed his light down to the attic since there were no lights down there and shut the door firmly. While in the attic, a door downstairs slammed shut.

The door was actually open for he had checked before doing his work. Unlike modern doors, there were no actual knobs but fastenings so it did not click shut but rather slammed heavily. The first time, he said, "I thought some of the guys were just goofing off."

So he checked downstairs and upstairs as well and has never gone into the Amy Mowry House attic although he has worked in Bryant for 30 years and still does. In his words, "I would never go there unless I am with someone."

Haunted or not, the Amy Mowry House is where the Eakin family calls home. When asked if they

Chaplains Corner

By Rev. Phillip Devens
Preventor Chaplain

On Wednesday mornings at 10 am to 12 noon, I am a DJ on WJMF, the Bryant College radio station.

During that time, I share with listeners a program entitled "Powerline."

It is produced by Family Net Radio of the Radio and Television Commission of the Southern Baptist Convention, located in Fort Worth, Texas.

On the week of Friday, August 30, 2002, to Thursday, September 5, 2002, "Powerline" presented a beautiful story that I would like to share with you today.

I hope that you will enjoy it. Be safe, take care, and God bless. A little boy was spending his Saturday morning playing in his sandbox.

He had with him his box of cars and trucks, his plastic pail, and a shiny, red plastic shovel.

In the process of creating roads and tunnels in the soft sand, he discovered a large rock in the middle of the sandbox. The lad dug around the rock, managing to dislodge it from the dirt.

With a little bit of struggle, he pushed and nudged the rock across the sandbox by using his feet. He was a very small boy and the rock was quite large.

When the boy got the rock to the edge of the sandbox, however, he found that he couldn't roll it up and over the wall.

Determined, the little boy shoved, pushed, and tried, but every time he thought he had made some progress, the rock tipped and then fell back into the sandbox.

The little boy gunted, struggled, pushed and shoved. But his only reward was to have the rock roll back, smashing his chubby fingers.

Finally he burst into tears of frustration. All this time the boy's father watched from his living room window as the drama unfurled.

At the moment the tears fell, a large shadow fell across the boy and the sandbox. It was the boy's father.

Brilliantly he said, "Son, why didn't you use all the strength that you had available?"

Defeated, the boy sobbed back, "But I did, Daddy, I did! I used all the strength that I had!" "No, son," corrected the father kindly. "You didn't use all the strength you had. You didn't ask me.

With that the father reached down, picked up the rock, and removed it from the sandbox.

You know our lives can resemble this little guy in the sandbox. We can have troubles and roadblocks that really get us down. Things we just can't handle by ourselves.

And we just let them happen. We've got to ask for help from someone, even if it is from Our Father...God.

It's so amazing how prayer and communication with God can give us the strength and wisdom we need to handle any problem we face in life.

It's easy. It's free. And it can be life changing. So, the next time you can't move a big rock in your sandbox of life, ask God to help you move it.

New Psychology Course

Title: Psychological Psychology PSY 374
Pre-req: Intro to Psychology PSY 260
Mode of Thought: Social Science
Course Pending Final Approval
Offered Spring Semester '03 on Tuesdays/Thursdays 12:30-1:45pm
Instructor: Joe Trunzo, Ph.D.

Learn about the following:
- How your brain and nervous system affect your behavior
- The science behind the mind/body question
- Physiology & psychological disorders

For more info contact Dr. Trunzo @ ext. 6570 or email jotrunzo@bryant.edu

The nichols-mowry cemetery is located behind the Unisturcture and has 10 burialts with 4 inscriptions ranging from 1848 - 1919

Opinion

The Economics of Having a Girlfriend: Birthday Presents Part 3

By Tom Fischetti

Archway Columnist

As promised in last issue's column, this week we will conclude our discussion of the potential long minimization equation.

Through our understanding of the equation applied by the Banana Republic present purchasing process, RP, A, and Fischetti have definitively evaluated that the majority of the inhibitions to the outflow for the girlfriend's birthday present.

More specifically, the potential minimization equation (PLME) is expressed as:

\[ \text{PLME} = P(15\% \text{ of Semester Beverage Fund}) + (A + RP) \]

The first apparent similarity between the equations used by each gender manifests itself as the percent of funds allocated towards the purchase. And although discrepances in the Semester Beverage Fund and Semester Shopping Fund will distract this part of the outlay, let us assume that the social classes of each member of the relationship are relatively similar.

The second component employed in each equation, A, remains a significant variable in not only this equation but all in exchange processes associated with conventional heterosexual dating. How based on our understanding of the analogous factors composing each equation, we can justify the significance of the A component and see how its presence should adjust our financial outlay by the value of RP.

As discussed in Birthday Presents Part I, RP is an essential component because the girlfriend possesses the innate ability to unfurl "purchase" behavior even in the face of any trouble she may find herself in.

Although understood and accepted by the male, this same "get out of jail free card" has been excluded from his situation.

Consequently, RP will always increase the amount of financial resources the male must allocate in any purchasing decision.

However, by including P, and its inverse relationship to RP, the 15% of our Semester Beverage Fund can be adjusted accordingly to reflect the general condition of the relationship...here's the logic.

A relatively high RP should be associated with a low P because a boyfriend consistently in trouble with his girlfriend is certainly indicative of an unhealthy relationship that should not be in existence much longer.

Therefore, as P decreases in value, the 15% of our Semester Beverage Fund will also become smaller.

Our guideline should be proportionate to the increase in the outlay caused by RP and should yield a value that accurately conveys the minimum

Rebuttal: The Economics of Being a Girlfriend

By Alice Kurka, Melissa Hermans, Mary Kelley, Samantha Radak and the girls of A-Block

Like most of the female population here at Bryant, we have been reading the articles submitted to The Archway about "The Economics of having a Girlfriend." And like everyone else, we too get a little chockle out of it. But in speaking to the author, and other males involved in relationships on this campus, we came to realize that it's supposed to in part be based on truth.

Keeping this in mind, we did decide that perhaps the boyfriends out there who are turning to Mr. Fischetti for help in shopping for their girlfriend, may want to consider some other avenues that be should be added into the equation.

We feel that perhaps the men out there should be made aware of: "The

The Economics of Being a Girlfriend." This article is aimed at proving that whatever the monetary value that is eventually concluded by using whatever equation Mr. Fischetti is going to reveal, it will pale in comparison to the number we plan on revealing.

So first things first: The Economics of Being a Girlfriend.

It may seem like a strange concept at first, but think about it. If it is true, as the other article points out, guys have to shell out some cash on major holidays and birthdays.

But what isn't pointed out, is that girls too shell out for said occasions. Differences being: 1) We do it because we want to, not because we have to; 2) We don't complain and write repeatedly to our boyfriends (about it); 3) We don't need a mathematical equation to figure out the financially responsible amount to spend.

We buy presents that come from our hearts and we know they will love. But it is beyond the gifts where the real issue lies.

You see, the majority of females involved in relationships have to allocate: time, money, and effort on a daily basis, not just special occasions. These are the things we would like to open your eyes too. We have broken these "expenses" down in an accounting-like fashion.

Next issue we will reveal the "Operating Costs" involved in being a girlfriend. And just one more thing for the gentlemen to think about in the mean-time: if you currently dating a girl that: 1) You have to put that much time in to figure out how much money to spend, you just don't know something she would love; 2) You should not have the possibility of a random Friday night hook-up; and 3) You consider what benefits you will reap on your birthday while looking for her present, perhaps you should reevaluate whether or not this is a girl you should even be in a relationship, spit, mind what your planning on getting her for her birthday.

Associated Press

Both the Men's and Women's Cross Country teams at Bryant have been running hard this season and are getting ready to compete in the NCAA Regional Championships next week.

The top seven runners from each team were determined last weekend at the conference championship meet, and will participate in the upcoming regional championships.

The men's team did exceptionally well at the Northeast-10 Championships, placing fifth out of 10 teams. This year's squad is one of the best it's been in recent years at the college.

The team consists of five young, talented freshmen, four returning sophomores, and six experienced juniors. The Bulldogs are led by senior captains Andrew Meffie and Nick Ward.

Coach Amy Lauglin was unsure how the team would perform this season, "We are a young team, with a good core of the men being freshman."

"Coming into the season, we didn't know what to expect," said Ward. As the season went on, it was evident that every member was able to contribute significantly to the success of the team.

"We saw how impressive the freshmen were," explained Ward, "and we sat down as a team and set goals for the remainder of the season."

Freshman Caleb Paul led the way in the conference championships last week, as he finished 19th overall, which earned him third team All-conference honors.

Paul was pleased with his time, and is looking ahead to next week's meet. The course for Regionals will be slightly different, adding distance. "It is a longer race, hopefully I'll be able to do better with the extra mile."

The Bulldogs are expected to have a good showing in the Regional Championships on November 9. Running for Bryant in this race will be two juniors; Nick Ward and Paul Corbozero, and five freshmen; Steven Baran, Jeff Britton, Steve Carr, Jason Minsky, and Caleb Paul.

Corbozero had this to say about the newest additions to the team, "I know we have a very talented team this year. A lot has to do with the freshmen class who have come in and built the team to a new level of competition."

The men's team surpassed any and all expectations placed on them for the season "I was very pleased with their performance this year," stated coach Lauglin.

The men will not be graduating any seniors. "We have a lot of potential for the coming years," stated Paul.

---

All will be returning next year to pick up where this winning season left off.

"The women's team has always been very strong," explained Kelpado, "and with seven members, which is the minimal number required to enable Bryant to compete in races, as well as earn a score for their effort.

There are three seniors on the team, Kim Ferrara, Paula Kelpado, and Erika Lemay, all of whom contribute experience and strong leadership.

Ferrara, Kelpado, and Lemay share the role of captain for the women's team.

With the exception of Kelpado, all will graduate this year, leaving junior Christina Quirke, sophomore Hully Resendes, and freshman Eddie Muñoz to tear up the trails when they return next year. The strength of numbers is, by itself, an accomplishment for the cross country team at Bryant.

"The women's team has always been very skilled," explained Kelpado, "and with injuries we usually end up with only a few individuals on the line at conference."

In previous years, there have been races where only one runner competed to represent Bryant.

"Overall, I'm satisfied with the season," said Lemay, "Going out my senior year, having a team of seven girls to compete with and be there for emotional support is a good feeling."

This past weekend, in the NE-10 Championship meet, Kelpado did extremely well, finishing 4th in the conference, and was awarded first team All-conference.

The team finished tenth overall, although this placement doesn't seem to accurately portray their performance this year. "We ran well and had a strong overall season," said Ferrara.

All seven members qualify to compete in next week's Regional Championship meet, where their goal is to individually improve upon their times for the 5K distance.

Amy Lauglin is the force behind both the men's and women's teams.

She is in her third year as head coach at Bryant College, and is working hard to build up the program.

---

"Cross-country is tough, we just have to be tougher."

-Paula Kelpado

Women's Tennis

We finished our season 8-5 in the NE-10 and 9-8 overall. It was a terrific season.

One of the strongest in a while. It's been a while since women's tennis has had a winning season. Several of our players received recognition at this year's NE-10 banquet.

Four Bryant Players Named to Northeast-10 All-Conference Teams

By Chuck Sullivan
Bryant College Athletics

The Northeast-10 Conference has announced that Bryant College freshman Alex Spence (Dover, Mass.) has been named the 2021 Northeast-10 Rookie of the Year in tennis. He is the first Bryant player in the league's 13-year history to receive that honor.

In addition, Spence was one of four Bryant players to be named to the league's all-conference teams. Freshman Alanna Santanello (Summit, N.J.) and sophomores Ashleigh McLean (Providence, R.I.) and sophomore Elizabeth Gauthier (Winnetka, Ill.) were named to the league's first team in singles play, while Spence was a second-team selection in singles.

Irish Poised to Leapfrog Hurricanes

By Omar Kelby
South Florida Sun-Sentinel, courtesy of Knight Ridder Newspapers

Notre Dame is gaining on Miami as the Bowl Championship Series rankings. By climbing to No. 4 in the Associated Press poll following Saturday's 34-24 win over Florida State, the Fighting Irish (8-0) closed the gap on Miami (AP's No. 1) to three spots at the point for the No. 2 spot in the BCS standings behind Oklahoma, which was idle last week.

Notre Dame, one of eight remaining undefeated Division I teams, could have been even closer to Miami, but the Fighting Irish lost some ground by falling to No. 2 in a few computer rankings.

Miami coach Larry Coker said he didn't exactly find himself rooting for the Seminoles last Saturday, but he did acknowledge it would have been advantageous for Notre Dame to win in the formula and realize what it takes to get to where you need to be," Coker said. "But the bottom line is we need to win." The BCS formula

Angels Win Series in Game 7, 4-1

Archway Profile: Dean Elizabeth Powers
By Keith Hanks
Archway Staff Writer

Position at Bryant:
Assistant Dean of Undergraduate Studies & Director of Undergraduate Programs

What is your biggest challenge?
"Dealing with my shyness. It has been a challenge for as long as I can remember."

If you were not at Bryant where would you be, or what would you like to do?
"I am an educator at heart. I would be teaching. I would prefer to be some place warm and sunny on the Pacific Coast."

Do you have any advice for Bryant students?
"Take education seriously! Education changes lives; it is more than a job. Education has changed my life and it will change yours too."

Do you have any involvement with organizations or interests outside of Bryant?
"I have a passion for orchestral music, especially the Boston Pops Orchestra. Symphony Hall is one of my favorite places to be. I also enjoy cooking and baking, especially making gourmet cookies. For me, cooking is therapeutic."

What is your greatest strength?
"I believe my greatest strength is the philosophy I bring to the work. I believe we are all teachers and we are all learners. I approach every student situation and every administrative task with this in mind."

What is Your Most Important Life Influence?
"My family is my most important life influence. I have a husband, two daughters and a son. They have opened my world up to art, music, culture and diversity. They taught me the true meaning of love and friendship."

The Archway encourages students and other members of the Bryant Community to offer suggestions for our Profile section. Faculty, Staff and Administration are all eligible. If you would like to suggest someone, please email The Archway at archway@bryant.edu, or call ext. 6028.

**Helping Hands is Back!**

*Hands will be on sale starting October 21st for $1.00*

Buy them from any Helping Hands Committee Member: Allison DeMusis

Please support this wonderful cause; all proceeds will buy holiday gifts for less fortunate children!

**The Poet's Corner**

*It is important to note that The Poet's Corner cannot exist without submissions from Bryant College students, staff, and faculty. The Archway strongly encourages anyone who wishes to contribute to send us an original poem. These poems will not be critiqued nor commented on by The Archway staff and are presented for the entertainment and benefit of the Bryant Community.*

**Contra Dance**

*First Time Dancers Welcome*

Matthewson Street United Methodist Church

143 Mathewson Street

Downtown Providence

Join us the 3rd Friday of the month October - May

**November 15th 8-11 p.m.**

Dedication: $8 adult, $4 under 18, $13 family

A fun style of folk dancing for people of all ages and lifestyles!

*For more info: call 331-8900 or email Gregg Carter gcarter@bryant.edu*
