Haunting tales for Halloween

By Meghan Hanlon
Staff Writer

Ghosts can be found anywhere, under you bed, behind the door, or for Jessica Hallon, in her closet. Jessica's father, during the early 1990's, Jessica lived with her parents in Providence's Inside. She continually told her parents about a man in her closet who introduced himself as Seth, and although he was nice, Jessica was obviously frightened. Her parents double checked the closet to reassure their daughter that there was no man named Seth in her closet. Even after her parents checked the empty closet door, Jessica continued to report seeing Seth.

For Jessica's sake, her parents removed her from the house and attributed Jessica's reports as being an imaginary friend. After Jessica's departure, her mother began to hear strange noises coming from the closet in the room Jessica had vacated. She opened the closet door to a man dressed in rum of the century clothing. It is possible that this man is that that Jessica and her mother had reported seeing could be related to a young minister who lived in the same house over half century before them. After all, that young minister did supposedly hang himself in that same closet, and his name was Seth.

Combine the sounds of footsteps from an empty room, fog surrounding an old cemetery, and tales of a scary haunting to create the tricked out night of the year, Halloween. Even if you're too old to trick or treat, you can never be too old for a good scare. Rhode Island has plenty of ghostly legends to keep feet moving through goose bumps. There are an abundance of ghost stories floating around the state and plenty of small, quiet towns to attract only the bravest of Halloween celebrators.

Rhode Island’s most famous chilling tales are those of vampires. The most famous of these is Mercy Brown of Exeter. From 1849 to 1852, the 19-year-old Mercy Brown died of tuberculosis. When she was 19 years old in 1852. Before her death, other members in her family had long been considered ill, and many believed her older sister had already passed away. By the time of Mercy’s death, her brother’s health was growing considerably worse. Although the doctors diagnosed Mercy and her kin with consumption, the small town of Exeter came to their own conclusions that the family was cursed by a vampire. When Mercy’s brother told the town of his dreams of Mercy coming to him in the night and pressing him down so that he could no longer breathe, the town had to take action. A group of men went to the cemetery and exhumed the three Brown family members. When they came across Mercy’s body, they found it to be well preserved, too well preserved for the town’s liking. Her heart was buried on a nearby rock and her ill brother ate the ashes in hopes of being cured. Unfortunately, he died a short time later. No one else in town died after Mercy’s body was exhumated and the town believed they had destroyed the vampire. Mercy attracts numerous visitors who are intrigued by the ghostly place in Exeter’s Hill Cemetery. It is said to be haunted enough to go at night report seeing a woman walking and the Brown family members are buried.

Numerous ghost sightings have been reported along Tower Hill Road in Cumberland. This road is windy, twisted and home to some of the deadliest turns in the state. This site is the unfortunet death of a young boy and his puppy who were hit in an automobile accident. Many people have given you reasons why your young boy was walking his puppy along this road but if the dog thinks the car has come too close to his master, it has been known to change the car before driving away. Other sightings along this road include a young girl seen playing outside one of the sheered homes. She disappears as you drive further, don't look for her in your rear view mirror, because you might catch a glimpse of another young boy riding his tricycle. Ghosts aren’t the only thing you’ll see.

Is Mercy, the "vampire ghost" waiting for you?

Clearing the cobwebs of work requests

By Brian Levin
Staff Writer

For most students living on campus, Physical Plant represents a college department which is seldom utilized, until it becomes a necessity. At this point, students quickly become acquainted with the system because things as basic as electricity, water, heat and light fall into their domain.

Some students feel that the service has been incomplete, or not being finished in a timely fashion. Many factors have contributed to the alleged slow service. For one there is a new system for submitting work orders online. This has gone a long way to increase efficiency and taking out the middle man in the reporting process. On the same token, the ability and ease to complete these request at any time from any computer on campus has increased the number of request filing to the system. The beginning of the year also is a time of more frequent requests. Damaged infrastructure, such as to functioning machinery, that are not noticed over the summer are all reported during the first half of the semester. Lastly, large campus emergencies also draw off the trades workers and can lead to a slower fulfillment of work requests. For example just before Parents’ Weekend the president’s house “water supply line burst...and that is the kind of thing that can bog [the process] down a little bit”. For this reason, according to Brian, the Director of Physical Plant, this situation wants people to understand that when they “do find their issue is not being attended to, they should certainly not accept it. They should call Mr. Levin or Mr. LaBelle is at the end of the line and will be more than happy to give you a reasonable explanation. ‘why the problem isn’t being brought up’. It is our mistake! We will correct it..., it is our goal to take care of everyone.”

The students can also participate in making the repairs more efficient. The first step is taking preventative measures. Many of the work orders submitted are for sanitation issues. These could be combatted before it gets to be needed by simple housekeeping. Many individuals are also ridiculous in keeping your living environment Irvine with 5 other individuals wouldn’t be a bad three credit course because it’s certainly an essential life skill.”

Every year at least thirty percent of all students on campus show interest in the Study Abroad program. With countries such as Japan, Great Britain, France, Ireland, and Australia available, it is a surprise there are not more. However, few students know about the actual process involved in studying abroad or the success of the program. Melissa Silva, a Undergraduate Programs, who has been involved in the Study Abroad program for the past five years, says that: "The students do most of the work on
University of Michigan: affirmative action ruling

By Maryanne George
Knight Ridder Newspapers

The lawyer who won the University of Michigan's affirmative action lawsuit one in the U.S. Supreme Court issued a stern warning: don't expect to see colleges and universities return to the way things were. The court's ruling is not a recommendation to eliminate race as an important factor.

 Universities must make sure that their admissions processes are fair and give equal consideration to each applicant. Administrators must also make sure that the court of appeals does not consider each applicant individually.

This decision should not be viewed as a green light to consider race in the admissions process. It is a decision made by a court of appeals and not by a court of last resort.

The decision in this case should not be viewed as a green light to consider race in the admissions process. It is a decision made by a court of appeals and not by a court of last resort.

Prescription drug abuse is on the rise in the United States

By Judith Graham and Michael Higgins
Chicago Tribune

At colleges across the country, students are taking pills they've snatched from parents, teachers or the pharmacy, or buying them via the Internet. The pill of choice is usually prescription drugs.

Prescription drug abuse is the leading cause of drug-related hospitalizations among adolescents and young adults. The problem of prescription drug abuse is not new, but it has become more widespread in recent years.

According to the Centers for Disease Control and Prevention, prescription drug abuse has more than doubled since 1999, with more than 13 million people using prescription drugs for nonmedical purposes in 2006.

The problem of prescription drug abuse is not new, but it has become more widespread in recent years. The problem of prescription drug abuse is not new, but it has become more widespread in recent years.

Educational experience outside Bryant

Study Abroad cont’d from front page

often a 2.75 or 3.0 GPA for certain programs. Also depending on the school and the exchange program selected, financial aid packages may be transferable or even receivable in some cases. Usually only second semester sophomores, juniors, and seniors are eligible to study abroad.

With a variety of locations around the world, students can take classes and new languages and gain a good perspective through the culture of their choice.

In BethThornton’scase, this could be you! Jessica O’Hara visits Loed’s Castle in England.

studying abroad if the process is so complicated?

Nick Cagnolino, a senior from Connecticut, although finding the process of planning to be rather complex, found his trip to Galway, Ireland extremely rewarding.

Sharing the ambition of other students at Bryant, Cagnolino said, “I wanted to study abroad based on the fact that when I am out of school I definitely would not be able to go and spend five straight months in a foreign country. It would just not be possible because once I’m out of college I’ll have many more responsibilities compared to the responsibilities of a college student.” With more and more students interested in the program, Cagnolino captures the motivation behind the desire to study abroad. In Cagnolino’s program, studying at the University of Galway in Ireland, his expectations were met and the transition from Bryant to Ireland was very smooth. His classes were not different however, as he mentioned that, “The coursework I took abroad were much different than the courses here. The school I attended was huge to all of my classes were huge lectures as opposed to the small class structure at Bryant. Classes were not too tough over there and it was definitely interesting to get another cultural experience is something that can only be found through the study abroad program and in life itself. I proved very successful. While Cagnolino approached the break excitedly, he did have positive results, he was still “serious to get home and see my friends and family by the end of the semester.”

With Nick Cagnolino’s trip in mind, who wouldn’t want to study abroad? Most students agree that the trip abroad helps broaden their views on culture and education while being a great time of fun and exploration.

From Cagnolino’s trip he said that, “my abroad experience definitely changed me. Going abroad makes you much more outgoing. This is because you are in a place that you’ve never been to before with people you’ve never met so you need to make an effort to meet people. I also think by traveling around and seeing so many different countries and meeting so many different people really expanded my outlook. I am definitely grateful for all the things I have at home and am glad that I got to see how other people live.”

Physical Plant services

Work Request cont’d from front page

An awkward way to live he reiterated, again jokingly. Students can also help by completing their end of the procedures with efficiency. The process a work request takes depends on its severity. All emergencies shall be called in. Emergencies constitute problems with temperature, leaks, condensation, water, and sparking electrical outlets. In these cases people should call extension 6052. For non-emergencies, work request should be filled online. The link can be found under the college department’s link off the main page under Bryant or from the Physical Plant website at http://web.bryant.edu/physical. The information work requests is then sent to Physical Plant where it is received during business hours, Monday through Friday from 8:30 to 3:30. Work request sent over the weekend or outside of these office hours will not be processed until the next business day. After being reviewed it is delivered to one of the 94 members of the trade staff. If it is given to them with priority then it will be completed first, if not they are able to priority their own work to maximize efficiency.

The new system for submitting work orders as an internet based computer program purchased by Physical Plant and first implemented fall semester 2003. They system called TMA, or the Maintenance Authority allows students to submit work orders directly. You are able to track their progress, including acceptance or rejection, and finally completion.

The 84 staff in the service employees union and the 11 administrators working in the facilities management department are “dedicated to creation and preservation of functional, safe, comfortable and beautiful campus buildings and grounds, and to the support of the Bryant community in the pursuit of its educational and/or non-instructional mission.” According to their mission statement.
Rules of Engagement: Do Nice Guys Really Finish Last?

By Tara Whelley
Opinion Editor

Do nice guys finish last? Or is it simply an excuse they use as to why they are single.

Do men really think that a woman does not want a nice guy... that she prefers the hardass?

Well I guess that is what we are led to think.

Out of a woman's point of view there is something interesting about a nice guy.

Nice guys are very shy and will let females walk all over them just because they think the woman should be treated like a princess. Granted we should be, but not to the point where the relationship is just focused on the woman. That is why when guys ask me "I do everything for her, I call her, I take her out, I do her laundry, how to they have so much and are such good people?" I have to say that just to many like a challenge on such a personal level.

Women should be treated like the beautiful creatures they are, but they need to realize that does not mean everyone wants them.

All of this also depends on the woman. Some girls who are overweight and shy love having a man that resembles the same attributes. On the other hand, some girls who are loud and aggressive choose to have someone who is loud and aggressive. It comes down to personal choice and respect for one another.

Guys who are more introverted than extroverted are often seen as being too high-strung and are not given the chance to meet "nice" people.

Do nice guys finish last? Not really. What I do believe is that there is a percentage of women who do not want a relationship with a "nice guy" even if he is the best guy out there.

By Steve Prizels
Staff Writer

Leonardo now looks like a turbo boosted, "supercharged 460 with a supercharger and nitrous oxide mix." Great stuff to be teaching children who can hardly understand the meaning of steering wheel. Additionally, creativity has sold out, replaced by hearse toys such as Daybreak brand tops. The first time I saw this phenomenon, I was sitting in the waiting room of my doctor's office. A mother came in with her crying, screaming, "I can't stand it!"

This is blatant commercialization of our children. The manufacturers of these toys should be more aware of the message their products are sending out. Both parents and children are not speaking to each other because they are being fed with this nonsense. It is time to start thinking about what our children are being exposed to.

The world running faster than its legs can carry it. The world running faster than the youth of our society have ever been able to adapt to. If things are going faster than it amazes me. Everywhere I go, I observe things that I never saw or heard in my childhood.

Children are in that eternal race to catch up, yet they are struggling to keep up with the fast pace that is happening. I feel like I am watching a race where the children are being pushed harder and harder to produce a product for just an electronic, motorized and brain-dead to succeed with kids anywhere.

So, why do I write this?

To influence current and future parents. I think it's important that we expose kids to thinking critically, but be fair at the same time. We need to be able to make a reasonable selection in regard to toy selection.

Don't be a toy-Nazi, but at the same time, let the children start thinking critically. They will be in the real world in a few years.

Legos, Construction blocks, even Lincoln logs were just part of the arsenal of childhood amusements. Ten years ago, the Lego sets that came out were HUGE. They were giant circles, space ships, etc. My dad showed us how to use your imagination with building and role playing afterwards. Now Lego has come with a ridiculous amount of attachments. "Instruction" leaflets that leave little to actually build.

They come with half the pieces and are no longer releasable without some more license such as Spiderman or Star Wars attached to them.

This is blatant commercialization of our children. We are forcing them to use their imagination and take part in role playing. Instead of sitting in front of a TV or computer screen, the children are now being pushed to buy the latest and greatest to keep up with the fast pace of the world.

Is the world running faster than its legs can carry it? Yes. The world has come to be a place of chaos and destruction. It seems people are more interested in making money than actually living life.

Men are not today's man. They are not the same as they used to be. Women are not today's woman. They are not the same as they used to be.

When I think of a women, I think of someone who is feminine, gentle, and loving. But women are not what they used to be. They are now more like the men.

I believe that the old library space would be great space because it doesn't look like they are doing anything with it at the moment.

The too-good-to-be-truth relationships of good-looking people

By Lenore Skerek
New York Daily News

It could possibly be that the more beautiful you are, the more likely your mate will turn out to be a low-down, rude, good-looking philandering cad who treats you like the buzz on his week-old blanket.

Consider these recent events. Hulk Heritage is splitting from his wife, Eric Leman, a vocal activist. Uma Thurman has done the same with her husband, Arpad Busson, a sensitive artist (you can tell by his glasses). He apparently has taken up with a 23-year-old model at a restaurant. She was celebrating her birthday while he was celebrating his. World's end.

What's going on? Seems like the less-than-amusing \"low-key, low-slam, low-fuss, low-quality, low-class, low-profile, low-energy, low-minded, low-moral, low-moral, low-moral, low-moral, low-moral\" people are only too happy to flash their Vincenzo Perluigis or alternative whoring on the back of a Canadian dropper.

What gives? Why do the guys with the biggest houses, the most beautiful cars, and the biggest bank accounts with the biggest bank accounts with the biggest bank accounts have to give up easily, unless it's a sale at the mall?

Megan Bova '04

I think that they do alright with what they have. I have not heard any complaints.

Colin Santucce '06

I think the old library space would be a great space for it.

Kunai Topandasani '06

The game room would be a great space for it.
Field Hockey: Captures First Northeast-10 Title

By Ellica Kim

Women's Cross Country Senior Paula Kleparski (Sharon, MA) placed 1st in the Northeast-10 Cross Country Championships at Le Moyne College with a time of 24:16. Kleparski, the Northeast-10's closest competitor, sophomore Karley Buckley of Framingham State, finished 2.7 seconds behind. The top female runners set a new meet record.

Men's Soccer
The Bryant men's soccer team, led by the nationally ranked goal, knocked off the first-place Puerto Rico team. Their victory ended the UMass Lowell's unbeaten streak and secured their place in the top spot for the season's first half. The Bulldogs will be playing the teams with the toughest defenses and will be looking for the top goals.

Women's Soccer
The Bryant College soccer team scored a 3-0 victory over Green Mountain College in Poultney, VT. Seven different Bulldog players recorded at least one point in the win.

Field Hockey: Captures First Northeast-10 Title

The field hockey team celebrates the win that helped to capture their first NE-10 Title. The Coach to the left, holding her head in disbelief.

Ken Riekert (Ellicott City, MD) who had to make 4 saves to preserve the win.

Volleyball
The Bryant volleyball team defeated the Farmingdale College in the first set of the game. Bryant went on to win the match by a score of 3-0 (25-16, 25-13, 25-15).

Football
The Bryant football team defeated St. Thomas Aquinas College in the first set of the game. Bryant went on to win the match by a score of 3-0 (25-16, 25-13, 25-15).

The field hockey team defeated UMass Lowell 2-1 in overtime.

Bulldogs spread their scoring around with two passing touchdowns, two rushing touchdowns, one field goal, and one interception resulting in a touchdown.

Senior quarterback Andy McLeod (Monroe, N.Y.) connected with sophomore Robert Gramann (Guthrie, ND) for a 37-yard pass for the Bulldogs only play of the scoring drive.

Senior Adam Sawing (Miami, FL) caught a 14-yard pass from McLeod to cap the first quarter.

Bryant was able to maintain the lead as a result of an 11 play scoring drive that culminated with a 1-yard run by Bryant's leading running back.

J.P. Scott (North Shore, MA) kicked a 34-yard field goal with 58 seconds left in the third quarter.

In the fourth quarter the Bulldogs scored twice to further extend the win. The first score was on a safety where Joe Crowley of Stonehill was sacked by Jason Gannon (Bronx, NY) and Delano Wyder (Riverdale, MD).

After a near interception up the middle, junior Jesse Lewis (Elizabeth, N.J.) picked off a pass for a 47-yard touchdown.
Hall of Fame Inductees Announced

By Meghan Lovell
Sports Editor

Six former student-athletes have been chosen for Bryant's Athletics Hall of Fame. This induction will be held on February 21st, 2004. A 10-person committee selected the inductees. The former student-athletes are Chris Congdon, Anthony DeQuatro, Lorrie Mahler, Shawn M. Nance, Lake Rebozett, and Diane Tedford-Poatony. Congdon graduated with the class of 1992. He was a three-time All-American, as well as a two-time first team All-New England pick, for his achievements in golf. He also qualified for two U.S. Amateur championships. He is sponsored by New England Physical Therapy while pursuing his professional golf career. Anthony DeQuatro of the class of 1967 was selected to the Hall of Fame. He was captain for both the basketball and baseball teams at Bryant. He was also the founder and first president of the letterman's club. This club was instrumental in the hiring of the first athletics director of Bryant College. He was MVP for baseball and also an All-National Conference selection in basketball. He was the starting point guard for the basketball, for the 1966-7 season. The team ended their season with a 22-2 record. The 22 wins were consecutive and aided in their advancement to the NCAA tournament. The next inductee is Lorrie Mahler. She was a three-year member of the women's basketball team. She is 11th in career scoring with 1,016 points. She also led the Bulldogs to two NCAA tournaments and two Northeast-10 Conference championships. She averaged 18.4 points per game in her senior season. She was ranked second in the conference. The third inductee was selected posthumously. Shawn M. Nance, class of 1968, was one of the many victims of September 11th. He was being recognized for his career and legacy as a cross-country capi- tain. He was also a two-time Bulldog Award winner. He graduated magna cum laude from the college, which was followed by a successful career at Harvard University. There is now a scholarship in his name that has accumulated more than $31,000,000 in less than two years, and still growing. Lake Rebozett also graduated with the class of 1998. He is the holder of various baseball school records that are still standing today. He holds the records for runs in a game at 5, as well as a season at 76, and in a career at 219. He also holds the number of stolen bases record at 6 in a game, at 47 in a season, and at 179 in a career. He recorded in the first three spots for stolen bases in a single season and first third and fourth in career runs scored. He also led 2nd in career hits (238), 3rd in single season hits (82), 3rd in career batting average (.363), and 5th in career RBIs (127). He did all of this from battling in the baseball position. He makes his in NCAA Division II history in career stolen bases, 108 all-time in career runs and was the first player in Division II history to amass 200 hits and 100 steals in a career. He also led the team to the 1998 Northeast-10 regular season championship and the 1998 NCAA Division II tournament.

Not Falling to the Competition

By Margaret Peel

For only $5 dollars you can watch martial artists compete for the best in their class in the divisions of fighting and forms. There is the possibility that you may even recognize some of your fellow classmates kicking and punching for the win.

Jennifer Sabado, Margaret Peel and Crystal Feld, fight under Ron Rountree in the New England Karate Circuit. They have participated in 2 torna-
ments this year. The first one was in Wayland, MA where the team kicked the competition and returned home with their first place trophies and one second place trophy.

Another victory followed in the second tournament in Winvick, WI where Jennifer Sabado and Margaret Peel returned with first and second place trophies in fighting. You are curious to see one of theseacakers packed fights or find out more about Crystal Feld, e-mail Jennifer Sabado at jensabado@yahoo.com

The Archway is looking for Sports writers. Writing for the campus paper looks great on resumes.

Rugby: Men's and Women's Making Progress

By Eddy Brady
Asst. Sports Editor

It was yet another a gorgeous day here on the Bryant College campus. The sun was shining, the birds were singing and the autumn leaves were at their peak color season. It was a warm and comfortable day. These students were present all across campus, including those sitting by the lake studying, others were playing Frisbee or loitering a football around. As I approached the sport fields, I noticed a group of young women playing a friendly game and wow, these girls can hit. Of course, as at your typical dress, wearing, hair waving, kicking around type of girls, they were stunning. Heck, they're warriors. The Bryant College Women's Rugby team had a very successful season this year Right from the beginning of the year, the team knew their season was going to be a success. At the start of the year when the season, the team had 13 new girls, tryout, which is more than twice the amount there was last year. The team in the previous three years. This could be exactly why they had a great season. Marisa Titus, President of the Bryant Women's Rugby team, said, "Each and every person on the team is very important and this shows that one person doesn't make up the team, twenty-nine does." Given the very competitive schedule this year, the team finished off with an impressive record of 7-2, which placed the team second in the division.

This past weekend, the women's rugby team lost off with WPI in the second game. Unfortunately, the team did not come out on top. The game ended with a score of 2-0 in favor of WPI. The team sustained some injuries that could have devastated the team if they had occurred in the middle of the season. Junior

Somebody broke her foot and freshmen bridal sprained her ankle.

As for the male Rugby team, they finished their five game fall season last year. Their record was not as stellar as last year's. They finished in the middle of the pack at 3-2-1. Last year, the team was in the championship for the Northeast Division III.

However, this year the team moved up into Division II and faced far better competition than in the previous season. When I looked at the six opponents, I witnessed why the team decided to move up a division. This year, he responded "As a team we move up, the competition also rises. The next step is to compete with the best teams in the country. The next goal is to compete with the best teams in the country."
