Marsella to Appear on Local T.V.

Professor Joan Marsella will appear on the WAPI-TV News on Wednesday, November 21, 1973, at 12:40 to talk about the Women's Management Seminar now taking place on campus.

The seminar was designed for business-oriented women in non-profit organizations. It is a ten-week program which began on Tuesday, October 9.

The television interview was arranged by the Public Relations Office at Bryant.

Governor Appoints Two to Women's Commission

Gertrude Hoebg, Director of Public Information and Publications, and Joan Marsella, Assistant Professor of Social Sciences, are being sworn in today by Governor Philip Noel as members of the Rhode Island Advisory Commission of the Status of Women at a special ceremony in the State House Senate Lounge.

The Rhode Island Women's Commission is unique among the 51 state women's commissions inasmuch as it was established by a vote of the legislature and not by a Governor's appointment. The Commission consists of 18 members, four executive secretary and seven ex-officio members. It is the official arm of the state government to advance the status of women. "To improve our state and our status, in strengthening family life, to learn how to participate more fully in the social, political and economic life of Rhode Island," as stated in its credo published on the first Rhode Island Women's Day (the State House, Providence, Rhode Island, October 17, 1971.)

Mrs. Hoebg was the first Chairman of this Commission in 1970. The RI Women's Commission, incidentally, is actually the outgrowth of a Bryant event. This event was the Bryant College Symposium on the Status of American Women held in connection with this Institution's Centennial Celebration (November 18, 1963). This was the first college symposium on this subject held in the country. It followed the report on the issue prepared for President Kennedy by a large committee chaired by Mr. Eleanor Roosevelt, first lady of the United States.

This event, Governor Chafee appointed the state's first Advisory Commission on Women in 1965. Further, Mrs. Hoebg became editor of its first annual report and eventually national editor of the Inter-State Commissions on the

Energy Conservation Committee Meets

The Energy Conservation Committee of Bryant College met last Wednesday, November 20, to hear a report of the Chairman's Committee is as follows:

To receive recommendations from faculty, students, administration, and other relative to points, ways to conserve energy.

2. To receive reports from the Business Office and Physical Plant personnel relative to energy savings that can result from various conservation measures.

3. To recommend to the President actions that will result in energy conservation that are consistent with our educational objectives and financial well being.

The membership of the Committee is representative of the entire community. It is currently made up of:

MaryAnn Fullerton is the Chairperson of the Committee and is the administrative staff. She is represented by by her husband, Robert, Bryant College in Providence. They have two children.

Mr. James F. Marsella, Assistant Professor of Social Sciences at Bryant, is a member of the Advisory Council for the State Agency for Title I of the Federal Aid in Education Act of 1966.

She is a member of the American Personnel and Guidance Association; American Association of University Women; American Federation of Teachers; Bryant College Faculty Senate; Women in Education at Bryant (WEB); and Women Educators of RI (WE).

She is the Executive Director of the Democratic Committee and is now a member of the Women's Political Caucus.

Professor Marsella resides with her husband, Dr. Augustus Marsella, 360 Ninek Avenue, Cranston. They have three children.

6. Reduce the number of entrances and light fixtures in the university. (Proper signs will assist in creating right spirit for those unconsidered by a larger walk.)

7. Close completely as many dorms as possible for as long a period as possible.

8. Remove all non-light fixtures, to be saved for future use.

9. Clean classes from 7 a.m. to 9 p.m. Monday, Wednesday, and Friday—Tuesday and Thursday classes started 7:30 and 8:00.

10. Lower the thermostat to 68 for between 40 and 68 degrees.

11. Reduce overhead lighting by one-fourth. Remove all lights from every other overhead hallway, and classroom fixture. Lights should be on only between 8:00 a.m. and 9:00 p.m.

12. Turn off spot lights on hallway bulletin boards, around Rotunda during the day (if not by 4:00 p.m.), lights in gym.

13. Close classrooms in late afternoon and evening.

14. The dorms and classrooms have been reported as being much too warm. Heat levels could be reduced.

15. Reschedule classroom assignments if possible to minimize the use of the inner rooms and maximize the use of external rooms and windows.

or two weeks later,_highlighting the need to be more economical when heating costs are negligible. (Note: discontent among students who have winter plans.)

16. Install signs over or beside classroom doors—"Do not lights out—save energy.

17. Reduction is Library hours or the lighting of various parts of the stack rooms might also be considered.

18. If fuel supplies are very tight, it might be well to condone Winteression entirely, saving dormitory, dining room, and classroom heat and light.

Since approximately 80 dormitory students out of an enrollment of 575 are all that normally have attended Winteression in the past, it might be advisable to restrict Winteression to commuters, thus making it possible to close all dorms during January.

Depending upon our capability in closing off parts of the classroom wing—first, second, and maybe third floors—we could restrict Winteression to a part of Block A.

19. URI and BTC-the Spring semester could start early.

20. Whenever possible, turn off all electrical equipment which is not being used. (Typewriters, copiers, machines, calculators, etc.)

21. Tighten all windows, entirely in August. Air conditioning probably burns just as much fuel as heating. If needed, use two houses, run both half capacity in the evening.

Investigate possibilities of heating and/or air conditioning using coal as fuel for longer conservation.

22. Go back to summer hours and close at 4 p.m. Four day week—Fridays off.

Continued on page 5

Sixth Annual Investment Seminar

Alton H. Mott
Bryant's New Controller

Alton H. Mott has been appointed Controller for Bryant College by Dr. Harry F. Burns, President of Bryant.

Mott comes to Bryant from Mansfield & Solt, Certified Public Accountants, where he was a senior accountant.

Mott was brought up on Block Island. He graduated from the University of Rhode Island "with distinction," with a Bachelor's Degree in Business Administration.

He is a member of the American Institute of Certified Public Accountant, Rhode Island Society of Accountants, and the Block Island Chamber of Commerce.

Mr. Mott is married to the former Joanne Thibeault of Cumberland. They reside in West Bellingham and have two children.

The Motts plan to move to the Smithfield area in the near future.

The Sixth Annual Investment Seminar will be held this Saturday in the Auditorium. Mr. Sam Knox, seminar chairman, expects a large turnout for the day-long affair. Tickets are $5 for the general public and $3 for students.

Photo by Mike Daley
**Energy Crisis**

This is a special request to all the members of the Bryant Community. Save energy by doing the following:
1. Drive at a maximum speed of 50 miles per hour except for emergencies.
2. Turn off all unused electrical appliances and lights.
3. Lower your thermostats to 67 degrees.

The Student Senate is in the process of organizing a commuter-computer car pool. This would give participants the names and addresses of people who live near them who could come to school with them every day. By doing this, less cars would be coming to Bryant each day and there would be a minimum of inconvenience, because the computer will only give out names of people who live in the same area or use the same paths to Bryant day.

Students who go on weekends are asked to leave their names, destinations, and time of departure with the Student Senate Office so that the information can be posted on the travel board. By doing this, less cars would be on the road and more cars would have more than one person in them. You can also save money on gas and tolls if you use this service of the Student Senate.

Anyone interested in the commuter-computer car pool or the Senate Travel Board should go to the Senate Office for more information.

**Introducing:**

**DUMPON GREEKS**

**Dear Editor,**

You might be wondering what I DUMPON GREEKS is. Maybe you have seen us before and have noticed our strange looks. Yes folks! I DUMPON GREEKS is a "foregery," which means any make of media, or airhead may join.

We were formed by our four leaders who in the spirit of true free speech organization appointed themselves King, Ten-of-epades and Joker. We like having a Red Queen: it allows us to talk about everything and generally harassing the principles which other "foregories" of this campus represent.

So what started as a joke is now going forward as full steam no matter what happens. If you by a $7.50 T-shirt, $2.00 pair of socks, $1.20 for shirts and $10 for pants, you can join our 40-man, woman, automobile "foregory."

Join us soon and be with us on Thursday as "I DUMPON GREEKS."

Name withheld by request

---

**Your Senate Cares (Part 2)**

**Dear Editor,**

Students: I'm writing to you to inform you of the things that are going on in the Senate. Let me first tell you what the Student Senate should mean to you. One thing we are an information center.

If you have any questions about anything pertaining to Bryant College, come on in. If we can't resolve it for you ourselves, we will refer you to the proper department. Next and most important, students don't realize it, the Senate is a place where if you have a personal problem, we are partially equipped to handle it, and we have contact with the proper department. From this you can see the Senate is to be recognized as a club.

As for what is going on in the Senate, it would take more than I have in this letter to list all the committees and what they are doing. Much of it you've already read about anyway. I guess the best way to know what the Senate is doing is to come down to the Senate any Monday afternoon after 3:15. little still, drop by the Senate office between classes.

Thank you,

Richard Cardone

P.S. Any opinion expressed in this letter does not necessarily represent the entire Student Senate.

---

**"I Grant Thee Spring!"**

**Dear Editor,**

Dear Earthlings,

I have granted thee an abundance of resources which thou hast chosen to misuse beyond exploitation. The forests which I have planted have been unjustly harvested. My waters have been polluted by your wastes. I have drained my petroleum field to the extent that thou art now crying out for help.

I am a secretarial student and I have often heard that secretarial students cannot handle a book such as this. They say "I should not have chosen to be an office worker."

This leaves me with the ultimate impression that this teacher is afraid of what the student has to say. Is she afraid she will be unprepared to answer any question raised? Is it she will not agree with the statement and does not wish to provoke controversy, which does exist in our government. Or could it be that she doesn't care to hear the student's view and would rather continue voicing only her own. Does this policy promote student interest? NO! Only disgust and boredom.

I realize this is an American Government course but does this mean it should be a political monopoly?

I remain completely, uncompletely,

Name withheld, by request

P.S. I am a secretarial student and I have often heard that secretarial students cannot handle a book such as this. This is not true. They may not know as much as a teacher but they are, after all, human beings.

---

**A Belated Thank You**

**Dear Editor,**

To the Bryant College Community:

Although Halloween was two weeks ago the Sisters of Three Wishes would like to extend a belated "Thank You" to the student body and faculty members at Bryant for contributing so generously to UNICEF. Totalled all the pennies, nickels, dimes, quarters, and dollar bills, we were able to send a check for UNICEF in the amount of $345.

It was a worthwhile effort on the part of each sister, and for anyone who doubted where the money was really going—well, you just have to believe!

Thanks again for your generous and unending support. The Sisters of Sigma Lambda Theta

---

**tuO fo redro**

This week, The Archway would like to congratulate the Bryant College Security Force for its alertness in protecting our cars in the parking lots. The way they investigate every suspicious action should be rewarded by some sort of recognition. After all, these are the brave people who fight the cold of night in their rain coats and green vests.

Security should get another reward for their part in the energy crisis. They do not go over 50 miles per hour—they don't even go over five miles per hour. They idle the engine of their little green wagons with their dim lights on.

Congratulations again, Security. Keep up the good work!
Morrison, a representative for ACTION, will be visiting Bryant in hopes of recruiting people into VISTA and the PEACE CORPS.

In VISTA, people with business knowledge help set up credit unions, conduct market and labor surveys, conduct consumer education classes, set up accounting systems, draw up corporation papers, research funding sources, set up job shops for unemployed, and do many other things that many of us probably never thought went on in this volunteer organization.

In the Peace Corps, people are needed in Africa, Asia, and Latin America to perform many activities that are business oriented. They need people trained in all aspects of accounting, business administration, hospital administration, public administration, economics, and statistics.

If you're interested in becoming an ACTION volunteer, you should be on campus soon and a table will be located near the information in the Rotunda. Check with the Placement Office for the dates.

Committee to Investigate Dormitory Damage Deposits

by Kevin J. McGarry

Mr. Barlow and Dr. Falletton both feel that the charges made to the students were for the most part accurate, as they have been contacted by only 10 to 15 of the estimated 350 students on campus that are involved. If there were abuses of the system when the students were treated unjustly, Mr. Barlow feels that after being back in session for a week, they would have made it known to him by this time. He mentioned that it is his responsibility of the student to come in and question the charges, and he does not think that the Senate's contacting and investigating the students personally helps the student develop towards responsibilities and decision making which he will be doing for the rest of his life.

Four Bryant students attended Internship Program

By Kevin J. McGarry

Bryant College Faculty Federation meeting will be held a "Sherry Hour" and discussion session in the Unistructure on Bryant Thursday, November 15, 1973, between 4:00 and 5:30 p.m.

The Federal Government will also be host to a representative group from all college organizations within Rhode Island. The first to organize and to join the Rhode Island Federation of Teachers, members of the Bryant College Faculty Federation and chairman of the committee relations, is coordinator of this event.

Four Bryant students recently returned from Washington, D.C. after having worked there for a week in the offices of Senator Pell. They are Greg Evans, Linda Arnold, Paul Cox, and Michael Ziobro. They all went to Washington under the Government Internship Program. The purpose of this program is to have students from various college come to Washington and work in a congressional office for a week to participate in the workings of government.

Greg Evans and Michele Ziobro, who worked for Senator Pell, attended a number of hearings during their stay, and related that the Cox Hearings were of particular interest. Although they feel that the experience of working was well worth the time taken out from classes, they feel that many improvements can be made in the program. They feel that the director of the program at both ends, here at Bryant and in Washington, should plan more activities for the interns; and aid them with what to do when the program entails. Senator Pell was also able to spend time with Greg and Michele, and they both felt that he trained for all aspects of Congress that he should have spent more time with them. Most of the other Congress Fellows, Bob Faust and Ray Johnson, had both had better luck with Congressman Tierman, who spent two hours talking to them at a trip.

One good aspect of the trip is that interviews were set up for them with congressmen and the students were able to talk with them.

Greg feels that there is a lot of potential in the program and he is submitting his suggestions to Ray Nelson as to what the program entails. Student Pell was also able to assist them with what to do when the program entails. Senator Pell was also able to spend time with Greg and Michele, and they both felt that he trained for all aspects of Congress that he should have spent more time with them. Plan Ahead for Thanksgiving Trips

Providence, R.I.-Thanksgiving trips, slippery pavements, and icicles will be a real triple threat to drivers, according to Charles W. Shields, Jr., Executive Director of the Rhode Island Council on Highway Safety. "Unfortunately, Thanksgiving so often coincides with the first snowfall of the season and neither drivers nor their vehicles are ready for travel in this kind of weather," the safety official said. A Thanksgiving trip by winter driving is obviously the finest way to travel, but if you must go, be sure your car is in first class mechanical condition, paying particular attention to those items that affect traction and vision, such as brakes, tires, windshield and wipers.

Good tires with good treads are important all year round, but even more so when pavements are slippery. Snow chains can be a real help for pulling through snow. Though their use is optional when used on all four wheels, they are still better for added traction on icy pavement. Snow and ice conditions, however, return all pavements to their more effective so be sure they are in the trunk ready for use when starting out on a winter trip," Shields advised.

Safety Official

The Department of Transportation announced that a new motor vehicle accident prevention program will be inaugurated on November 12.

Attorney to Robert J. Rand, Director of the Department of Transportation, the program will be a cooperative effort to include information presently required by the National Highway Safety Administration and the Federal Highway Administration. A unique feature of the form is that it folds into a pre-addressed mailer eliminating the need to provide an envelope. This form also contains multiple-choice answers which will significantly simplify the process of completing the questionnaire.

The implementation of the new motor vehicle accident prevention program is the result of an overall accident records system that is being implemented by the Department of Transportation. Of most importance, the new form will be used as a tool for surveillance in identifying high hazardous location and modulating obstacles through the accident records processing system and will assist the State in setting priorities for their elimination.

Winter Check-up

Time Again Says

Safety Official

Providence, R.I.-Motorists of Rhode Island were reminded today that it's time to get their cars ready for the winter driving months ahead. And because of today's concern about fuel conservation, a pre-winter engine tune-up is doubly important this year, according to Charles W. Shields, Jr., Executive Director of the R.I. Council on Highway Safety.

While we have always recommended pre-winter tune-ups for safety and economy, it may make more sense now than ever before since a properly tuned engine runs more efficiently and gives better gas mileage," Shields said.

"So far of all things, having your engine tuned by a competent technician is the best inspection of the electrical system as well as the emission control devices on late model cars. This should help assure dependable starting in sub-zero weather, lower fuel consumption and fewer stalls in traffic"

After the basic tune-up, he pointed out that it was even more important for a safety standpoint to check the following items also:

BRAKES-Poorly adjusted or grabbing brakes are serious at any time of year and can be especially hazardous to your property and yours.

LIGHTS-Make sure all higher-general, tail-signals, stop lights and turn signal indicators are working properly. Clean these frequently during inclement weather so that you can see and be seen.

HEATER-DEFOSTER-The heater and defroster system needs to operate at peak performance to keep the windshield clear of ice, fog and frost. Streaking wiper blades should be replaced and windshield wipers should be fitted with adequate anti-freeze solutions to the problem.

TIRES-Check tires for tread depth and uneven wear. Good tires are especially important when pavements are slippery, so drivers are advised to pull for pulling through snow, but they offer no advantages over regular tires for running on icy pavements. For icy conditions, studded snow tires (where permitted) are recommended on all four wheels.

TIRE CHAINS-Tests show that reinforced fire chains provide the most traction for driving through deep snow or driving on glaze ice. Have a set in the trunk and be ready to use them when needed.

EXHAUST - Have the entire system checked for leaks at the time your car is in for servicing. Carbon monoxide is deadly.

"I sincerely hope that the administration, faculty, and students can again this year obtain a good national recognition for Bryant," says Dr. H.L. Di. The chairperson of the Economics Department at Bryant College, was appointed to the faculty of the University of California at Berkeley, on July 1.

The position was established by the National Science Foundation, which presented a grant of $50,000 to the federal institution, to support the research of Dr. Di for the next two years.

Di. said that he is very pleased with the opportunity to continue his work at the University of California and that he is looking forward to the chance to contribute to the national effort to promote scientific research.

The grant is one of the largest ever given to a single scientist, and it is expected to have a profound effect on the field of economics.

Dr. Di has been a member of the faculty at Bryant College since 1955, and during his tenure, he has made significant contributions to the field of economics. He is well known for his research on the economics of education, and his work has been widely cited in the field.

Dr. Di is the author of several books on economics, and he has written numerous papers and articles on the subject. His work has been recognized with numerous awards and honors, and he is considered one of the leading figures in the field of economics.

The appointment of Dr. Di to the faculty of the University of California is a testament to his contributions to the field and his dedication to the pursuit of knowledge.

The grant will enable Dr. Di to continue his research on the economics of education, and it will provide him with the resources he needs to make significant contributions to the field. Dr. Di is looking forward to the opportunity to work with some of the leading minds in the field, and he is confident that his work will have a significant impact on the field of economics.

The grant is a significant step forward in the advancement of scientific research, and it is expected to have a profound effect on the field of economics. Dr. Di is a well respected and respected figure in the field, and his appointment to the faculty of the University of California is a testament to his contributions to the field and his dedication to the pursuit of knowledge.
MBA Highlights
by Dean Lebovitz

Spring 1974 Semester Survey
The first returns of the Spring 1974 Survey are beginning to arrive at the Graduate Office. Graduate students were asked to indicate their plans, in terms of counseling for, use, two, three, or four courses. They were also asked to state their preferences for late afternoon or Saturday morning classes. If there is sufficient interest, the Graduate School will offer such classes.

The returns of the survey will aid the Graduate Office in refining its present of course enrollment, professors required, textbooks to be ordered, and classrooms to be scheduled.

As in previous semester, classes will be held on campus, and off campus under the MBA on Aquidneck Island Program at Jamestown. The survey did not include the two-year, off-campus MBA Program at the Naval Officer Training Center (NOTC) at the Navy Base in Newport.

Spring 1974 Registration
The Registration announcements should be in the mail to Graduate Students by the end of the month. Students will be asked to return their registration forms to the Graduate Office no later than Friday, December 14, 1973.

Graduate Faculty Meeting
A Graduate Faculty Meeting will be held this week on campus. Among the items to be discussed are the following: the Spring 1974 Semester; the Graduate School 1969-1973; the upcoming accreditation visit by the New England Association of Schools and Colleges; the Graduate Business Advisory Council; and the start of the MBA Alumni Associates.

MBA Alumni
The Graduate Office is beginning to receive feedback from our MBA graduates as to how the MBA Program and the MBA Degree have been of value to them. An historical first was the telephone call by John Dwyer, MBA '73, who reported that he had placed fourth of 16 candidates to win the seat in the recent election to the Under County, New York, legislature. John stated that a major plank had been that the County needed better management and that he was the candidate who had an MBA Degree from Bryant.

23. Commuter entrance has been open for at least three weeks. A new door has been ordered. Is there no temporary door that can be erected? Why aren't the fire doors used?

The following questions were raised by the Committee:

1. What effects would they suffer, if any, if Block A were totally sealed up and run at approximately 65 degrees?

2. In addition to the above, could we partially seal up Block A and have 67 degree temperature in the basement and lower two floors of Block A? Also 67 degrees in the computer room. All other areas would be 55 degrees.

3. What is your opinion with regard to having the school at 67 degrees during the daytime and 60 degrees on night cycle after evening classes?

4. If we were to close the College from December 21 through January 1 with no students in the dormitories, could we retain the college at 55 degrees without maintenance difficulties?

5. Would it be possible and feasible to shut off two light bulbs in each four-foot unit and have the heat enter instead of having each bulb on?

6. Could corridor lights be shut off without difficulty retaining safety lighting?

7. The Simplex in offices and classrooms are not locked.

8. Can we reduce the temperature in the gym (large area) without effecting plumbing, etc.

9. Dormitories--can we set and lock all thermostats to 67 degrees?

A complete release will be available on November 28 as to what Bryant College is going to do to preserve energy. Any suggestions you have should be brought to any member of the Committee.

It's that time of the year again when it seems as if everything piles up at once. Being full of speed during those long study hours and short sleeping hours does have its toll on most people.

The Inquiring Photographer
by Jef Stein

Those Mid-Semester Blues

NOTES

INTERSESSION

Intersession will be held as scheduled and dorms will be open.

This is to introduce myself--I'm Dick Clark and I'm with Metropolitan Life Insurance Company--Cranston, R.I. Why I'm here is very simple--to advise young people on insurance. Mostly Vats on campus because they have only a relatively short time (120 days) to cover their Government Insurance. But anyone who has a question can feel free to come up and see me. No one is under any obligation at all! Just come up and I'll try to answer any questions you might have on life insurance.

I'll be here round year if the need arises. I'd like to do so--I sincerely hope that it does.

My hours will be:

Monday, Tuesday, Wednesday, 9 a.m. to 3 p.m.
Thursday, 9 a.m. to 12 noon and Friday, 9 a.m. to 3 p.m.

I'll be located in the Rotunda!

Thank you,
Dick Clark

Who's Afraid of Virginia Floyd?

On the national scene, Richard Nixon would be quite afraid if Dr. Floyd could put her call for impeachment into effect. Otherwise, on the local Bryant scene, no one is afraid of Virginia Floyd that I can detect.

On September 15, the first and most interesting of the members of the faculty, Dr. Floyd graduated from Florida Power School of Television, Radio, and Drama, where she holds a B.A. in Speech and Drama, and an M.A. and Ph.D. in English.

Dr. Floyd started out as a scriptwriter for radio and television, and wrote her own program, "In the Woman's World." Although she is not an ardent Woman's Lib advocate, "I do cringe when I recall that programs are annotated on recipes, household hints, etc.—everything to keep a woman 'happy at home.'" Dr. Floyd has had several poems published in National Magazines and a collection of poems in anthology, "Adam Among the Television Trees." Although she has written several plays, most of which are serio-comic, two of them have been produced, and produced the musical comedy, "Mass Overboard." In addition, Dr. Floyd worked as a corporation Assistant Advertising Manager and was a publisher's director for an advertising agency in New York City.

Dr. Floyd has had the experience of having Dr. Floyd lie to her. Her unpredictable tendencies towards politics and "Tapeworm Nixon," as well as her sincere interest in brotherhood, have made her a... (Continued)

What is a barber shop without a red and white barber's pole out front?

Bryant's Barber

Vito Paglia, Bryant's own on-campus barber does not seem to miss it. This congenial man, by Thomas Crapienki, with his hide-away second home, his barber shop, located near the entrance to the main dining hall, has a kind "rimp" for everyone. Vito has been with Bryant since the opening of the new campus, and he takes pride in his position here. He considers the students to be his students, faculty, and administrators as special people. "I enjoy the work that I do," he said. "It is the people that I enjoy working with." It's not unusual to see him involved with the building and bathroom, where he is歌曲 the purchase of his own barber shop in Providence for ten years.

At the age of 14 Vito had developed an interest in his profession's background. Leaving his home of Pains, Italy in 1953, he moved to Montreal where he had worked as a barber for five years. During his career he has taken advantage of training in barbering and hairstyling. In 1958 he moved to New York City. According to Bryant he had his own shop in Providence for ten years.

Vito lives in North Providence with his wife and four children.

by Kevin J. McGarry

The Rosemarys of the Trenches

Dr. Floyd that "ardent Women's Library" has several members in National Director without experience, and one knows well previous background to the role of the first-hand real experience with a group of students that did not require a exposure to the cultures of other racial and ethnic groups and must be educated to assume a meaningful role in a world that is rapidly changing.

One of Dr. Floyd's life ambitions has been to visit Russia. This past summer, while planning a trip to Romania, she tried to include this as part of her trip and was unsuccessful. Not one to give up easily, Dr. Floyd tried to obtain a visa while in Romania. When this failed, she tried unsuccessfully to get passage on a cruise to Russia which did not require a visa. It may very well be that there is no afraid of Virginia Floyd that I can detect.

The Rosemarys of the Trenches

Dr. Floyd suggests the idea of a future-focussed curriculum that would provide a Club for "Survival Kit" for the 21st Century. "Bryant has tremendous potential," she stated, "and if it continues to stress quality education, it certainly could be one of the finest business colleges in the Northeast. If, however, the emphasis should be more on center on quality education, the college could, in my way, become a mediocre degree mill.

Bryant College General Summary

Traffic Regulations

1. Parking is allowed only within marked (Pavement White Line) spaces.

2. NO student, administration, or faculty member parking is allowed in the front or rear area in any circle.

3. Parking IS NOT ALLOWED on any grass areas, driveways, walks, sidewalks, or on the east side of the Dormitory Village.

4. Absolutely NO private vehicles are allowed in the Dormitory Village.

5. Absolutely NO driving is allowed on sidewalks. (This includes the riding of motorcycles).

6. The speed limit on College property is 20 M.P.H.

7. Although you are on private property, all regulations and laws governing Motor Vehicles are applicable while on the Bryant College Campus.

8. ALL VEHICLES (including motorcycles) belonging to members of the Bryant Community must be registered annually, and the registration sticker must be displayed on the driver's side of the rear bumper.

9. All violations of parking and driving regulations are subject to affirmative disciplinary action, towing, and/or fine.

by Paul Carroll

A Senate Tax?

The November 12 meeting of the Student Senate began with the acceptance of the minutes of the last meeting. Paul Zable, Junior Senator, informed the Senate that the Senate's budget is under review. The revision of the budget will define the accounts and better facilitate the allocation of Senate monies. A copy of the new budget will be available to all Senators upon request.

The Ways and Means Committee presented the final draft of their charges, and corrections and amendments were made. The Ways and Means Committee also presented a report drawn up by Michael Lynch. On October 4, the committee was denied its request for funding on October 24, due to the discriminatory policy in its Constitution which limits membership to marketing majors only. They must first amend their Constitution before applying to the Senate's decision. The Senate Club was allocated $187.05 plus shipping charges on October 25, for the purchase of equipment. On November 6, the Table Tennis team was given $90 for the purchase of shirts, jackets, and other equipment. They also allowed the use of Senate position paper space (10) to the Table Tennis Team is presently seeking recognition as the College Senate.

Rich Schiebeloh proposed that the Entertainment Committee decide on how to clean up, how much money should be spent, and who should be paid for cleaning up after smokers. He suggested that there be some sort of consideration. Rob Salmad, Chairperson of the Entertainment Committee, said that a maximum of $20 would be spent to clean up after a mixer and that the money would be divided equally among the workers.

Rich Schiebeloh also proposed that a Senate tax be 5c added to the tuition bill. This would give the Senate a higher budget to work with. Rob Salmad motioned the "the Student Senate try in its earnest not to increase any payments to be made by any students." Rich Schiebeloh amended that to read, "the Senate take no action on Student Senate tax to tuition." Fred Leonard then motioned to refer this motion to the Ways and Means Committee. It was seconded and passed.

Rich Forman mentioned that he received only 6.5 percent of the vote from the Bryant College Dormitory Community (regarding present security policy of locking doors), and 76 votes. Forty wanted to leave the doors open, 36 wanted them locked. The males voted 31.22 for leaving them open. The females: 13.9 to keep them locked. Because of the lack of turn-out, it was considered a lack of opposition to locking the doors. Rich Forman concluded that he was not going to accept the policy and leave the doors locked at stated hours.

Janice Saliter, Freshman Senator, discussed the Dormitory Community, and how many students who were charged for damages, last year will be available for next year. On November 13, an estimated $8,000 was deducted just last year from this deposit.

Fred Leonard motioned that next week a representative of the Coffee House present a report on what they are doing. He mentioned that the Senate is directly responsible for the Coffee House.
### On Television This Week

#### Saturday
- **All-Eve**
  - 5 p.m. (12) - **AMERICA**. Review of the '20's and '30's.
  - 7:30 p.m. (56) - Night Gallery.
  - 8 p.m. (7, 12) - All in the Family. Sunday Morning.
  - 11:30 a.m. (7) - Face the Nation.

Security Measures Update

Mr. Gardner is instituting a volunteer fire brigade and welcomes any students with experience in fire fighting to join it. A call out plan is being devised which will be used in contacting the volunteers in the event of an emergency. The entire Security Force will be taking courses in fire fighting and first aid to better man the new vehicle.

In an effort to improve the enforcement of parking regulations the Security Department is implementing the use of a new wheel locking device to enforce the regulation by the students of parking regulations. In order for the person in offense to have the device removed from his car he will first have to pay a $6 fine. This new procedure is thought to be an improvement on the previous system of towing cars, and will be less expensive than a $15 towing charge. It will also eliminate the inconvenience of having to recover the towed car.

Eco

Are you well read in Ecology? A quick glance at the display case in the Library will expose you to the wide variety of books that are available in this controversial, but captivating, subject. Has there truly been a war against the environment, whom the environmentalists call all consumers? Is the threat of overpopulation a real hanging over the ecospere? Will limited resources and "people density" still allow 10 billion or more growth? Are Americans exempt from responsible judgments that face other nations? Do you honestly care what kind of world you live in? Answers to these and other perplexing questions may be found in one of the books on display, most of which may be borrowed from the Library. The books were selected and set up by ECO, the Ecology Action Committee.

Ecology is technically the study of living organisms and their interactions with their surrounding environment. To most people, however, ecology connotes good environment versus bad, lack of pollution, wise use of resources and control of population growth. Behind the obvious need for a clean environment lies a far more scientific, and far more compelling, argument for viable ecosystems. Without having at least some appreciation for the cumulative evidence describing the cycle nature of ecosystems, their complex feedback mechanisms, and the delicate equilibrium with which they are balanced, one may casually view ecological crises as merely opinion or interpretation. It is all too common for persons in power positions to ignore these facts, and treat ecologists as being "nuns," or "anti-progressive." To be "against" ecology is to disparage the scientific collection of facts about living ecosystems.

The only way to avoid the piffal of shallow, emotional responses to environmental challenges, is to be well informed as possible, to read and listen, and to evaluate and then decide. The information is there, but beware of opinions—ask for facts.

Dr. Nodarse Attends Medical Meeting in Denver

Paul Carroll

The Security Department of Bryant College has acquired a new multi-purpose emergency vehicle. This vehicle is equipped for patrolling, combating minor fires, and providing first aid. The vehicle will be fully equipped within 30 days and will also have jumper cables to aid any student with a dead battery.

Photo by Mike Dalley

Dr. Nodarse, M.D., Medical Director at Bryant College, attended the Annual Scientific Assembly of the American Academy of Family Physicians in Denver, Colorado, in an effort to strive for the betterment of health facilities of all students—dormitory and commuters alike, and administrative and faculty personnel who have had need of his services.

Dr. Nodarse is a native of the western-most state of Chile, attained his education and degrees at the University of Hanaza Medical School, where he graduates in 1944 summa cum laude and in the top five percent of his class.

Dr. Nodarse is also the medical director of the Johnson School Department, Police and Fire Personnel, as well as the Armed Forces Physician for the Providence School Department. He is on the staff of Roger Williams General, Lying-In, St. Joseph's, Fatima, and Fogerty Memorial Hospitals. In addition, Dr. Nodarse is active in the Providence Neighborhood Health Council,开创er of "Rehabilitation Medical Arts," and Beyond the Pain. Rhode Island Tuberculosis and Respiratory Health Association, and the Rhode Island Inoculation Society.

115 scientific and 250 technical exhibits. This and the other programs Dr. Nodarse attended were in conjunction with AAFP's requirement that its more than 54,000 members keep "going back to school." All members must complete 150 hours of continuing education every three years. Dr. Nodarse is a charter fellow of the AAFP with over 21 years of continuing membership.

"Bryant's students have many needs—medical and education attention," says Dr. Nodarse. "However, with rights, there are also responsibilities." He feels that the students are very uninformed concerning the facilities and treatment available to them. In order to help correct this situation he will be running several articles concerning these rights along with an interview with Dr. Nodarse. He feels this will be of interest and general advantage to all students.

Evans Defends Senate

At the last Senate meeting it seemed to be the general consensus of those present that the Senate was somewhat misdirected in its priorities. Too have been criticized, justifiably so, for never telling anyone what they are working toward. In an effort to correct these wrongs I have prepared a list of the objectives which I have been working on these last eight months.

It is imperative that we become more goal oriented and less task oriented. The objectives which I have listed are by no means easy ones and it is doubtful we will see their total realization in our brief careers at Bryant. However, the work has to begin somewhere and it is this Senate that has been designated as the initiation.

I am asking a lot from you as Senators and I realize this. There is not as much personal gratification in seeing only a segment of a goal accomplished as there is in witnessing the completion of more immediate goals. Our first responsibility is to ensure the culmination of our long range goals we have lost sight of the problem.

I want that we put aside our political differences and work together as a body that is truly concerned with the welfare of those who elected us and of those students who will follow after we are gone. I have been negligent in communicating with all of you and am making this attempt at trying to be a better Senator. It is hard to swallow pride but I hope everyone will take a hard look at what their purpose really is as a Senator and that we can continue from a new plateau of student responsibility.

**N.F.C. PLAYOFF PREVIEW**

The National Conference of the N.F.C. has completed nine games. By the time the Conf. and A.F.C. many upsets have come about. But the best word to describe some teams is disappointing. Supposedly strong teams like the Giants, San Francisco, Detroit, and Green Bay have fallen by the wayside.

The Eastern Division has won six and lost three. The inactivity of two quarterbacks, Bill Kilmer and Danny Jansen, to become consistent has hurt the Redskins. Any experts believe that the season is showing signs of old age.

Dallas, on the other hand, is in the process of winning and rebuilding. Roger Staubach has successfully taken over as the quarterback. Coach Landry’s only worry lies in his defensive secondary which has shown signs of weakness. But look for the Cowboys to win the Eastern Division. Philadelphia fans are currently calling Roman Gabriel “The Messiah.” Since being obtained from the Los Angeles Rams, Gabriel has taken charge of a young team to produce a respectable football team. Coach McCormick’s needs lie in his defense. Another team in a rebuilding process is the St. Louis Cardinals. Dan Anderson has been the bright spot on the Cardinal roster. A team that has to rebuild is the New York Giants. They are the most disappointing team in the conference. After winning six straight exhibition games, the Giants have won but one of nine games this season. If the Giants hope to go 8-5 by winning out, they better get their tickets now. Coach Webster’s job is in serious doubt.

The Central Division race is all but settled. Minnesota, Detroit, and Pittsburgh have each won six games. The Vikings and Lions have played perfect football after nine games. The “Purple People Eaters” defense is alive; well; and most important, healthy this season. They have allowed just over a fraction of nine points per game. Frank Tarkenton could prove that he is a winner this season. His offense has been aided by the super rookie runner Chuck Foreman. He gives the Vikings the running attack which they had previously lacked. Green Bay’s season has been disappointing. Their main problem is at quarterback. Jim Degan, Jerry Tagge, and Scott Hunter have failed in leading the team. Nagging injuries to key players have also hurt the Packers, causing them to drop years at Baltimore were teams left to him by Don Shula.

Detroit has done nothing to speak of this season. As far as the Chicago Bears are concerned, classed at least as the fog of war and the scrambling quarterback is no longer a winnability. But that the braving Dick Butkus’ great Sundays are over. He has lost most of his previous great speed as a result of injuries. Bobby Douglas is not what the doctor ordered as far as the Bears are concerned. A team must have a quarterback who can pass to win football games. Douglass is not this type of quarterback.

An interesting race has developed in the Western Division between Atlanta and Los Angeles. The Rams won their first six games before losing two in a row. John Hill has become the leading passer in the conference mainly because of the great pass receiver, Harold Jackson. They were both acquired by the trade route. Atlanta may be described as the mystery team. In their opening game against New Orleans, they scored 63 points. But is the next two contests they were slaughtered. They have since won five out of six games, including a victory over the Rams. The Falcons’ balanced attack should carry them to the wild card spot in the playoffs.

In New Orleans, the Saints are having their most successful year in the team’s history. Archie Manning has propelled the Saints to four wins in nine games. The highlight of the season was their 13-0 victory over the Buffalo Bills. The era of the San Francisco Forty-Niners appears to have ended. John Brodie, the great college, has already announced his retirement. Steve Spurrier has failed to take over the starting job. It is also evident that the great Forty-Niners defense aged very quickly. Dick Nolan must experiment with his team to see if anything is left for the future.

The NFC playoff teams should be Dallas, Minnesota, Los Angeles, and Atlanta. A long range Super Bowl prediction was for Miami meeting Minnesota. But in the game of football, anything is possible.

**DORM 2 & Co.**

**UPSETS TITANS IN PLAYOFFS**

It was a bitter, cold autumn day as two teams met under the field to battle for a playoff berth. One might have expected the mighty Titans to engulf the toiling Dorm 2 and Co., but ending results proved contrary. The Titans had their chances: a nullified touchdown, three yard field goals, and a pass bobbed in the end zone. You could say it was the “million-dollar defense” that prevailed over the Dorm 2’s over-reaching border. Kurt Schott, Frank Halpin, and Joe Lattanzio, unassuming stalwart and contained the Titan quarterback in three consecutive playoff games. The third time, the Titan’s quarterback was caught in his own end zone by Frank “Crazy Legs” Halpin. The final score, being 2-0 in favor of Dorm 2, proved to be a well-played game on parts of both teams.

**Dorm 10—9**

Punishment—that was the name of the game as Delta Sigma outlasted KT 10-9 in the first semi-final game. KT went on the board first as ”Sydney Hands” Weds hit Cy Hill on a rainbow finder in the end zone for 6. Sydney then missed a crucial extra point. The ball was traded back and forth and many controversial calls were made. KT’s Wicks made a 35-yard field goal in the last seconds of the game to put KT by 8.

Last Week: 11 right, 2 wrong

Weds made a 35-yard field goal with 5 minutes left to put KT into a 807 leaf. Delta Sigma would not give up and with the help of fine running by quarterback Nienman and a crucial pass-interference call, Steve “Golden Food” Gray hit his second game winning field goal and won with two seconds left. Delta Sigma scored making the final score 10-9 to Dorm 2 & Co.

The 1973 girls' intramural volleyball playoffs commenced on November 4, with four quarterfinal matches. In the opening match, the Leftovers prevailed over the Division A finalists by beating an overconfident Jockette team. It took the Leftovers three games to win.

The second match proved to be surprisingly interesting. The Un's beat Dorm 5 in two straight games. After being soundly beaten in the first game, Dorm 5 came back in the second game only to be eventually overpowered in the end. The upset of the night came when SLT beat the amazing 985's. SLT's ability to play together and hard provided their road to victory. As expected, SIX beat the 985's. SIX is probably the best team in the league because of their ability to play as a team.

Playoffs, November 8, the divisional finals took place. The Leftovers beat the Division A with an easy victory over SLT. The Un's made the finals with their 19th straight victory. S.M.U. was SIX. It was a hard-fought match with S.M.U. winning the first two straight games 15-11 and 15-12, to capture the Division B championship. It may surprise many, but the volleyball championship ended up being decided by two independent teams.

What took place on Monday night was one of the greatest playoff games ever witnessed in intramural competition at Bryant College. The Un's and the Leftovers battled for five games to determine the championship. The Un's, behind the serving strength of Georgette Schutt and Audrey Meusman, easily won the first game, 15-6. The Leftovers appeared very nervous. In the second game, it seemed that the Un's would win big. They jumped to a 9-3 lead. But Paula Fontanella, the league's best player, sparked a tremendous comeback to give the Leftovers a 15-14 victory. In the third game, Paula once again played tremendously and gave the Leftovers an early 8-4 lead; but the Un's, playing together as a team, came to win the game by finishing the Leftovers 15-12.

Game four may be described as Paula Fontanella vs. Georgette Schutt with Paula winning 16-14. An unusual play, where the ball proceeded to pass through the light beam; caught the Un's by surprise and paved the way for a victory by the Leftovers. The fifth and final game turned out to be as exciting as the first four. Audrey Meusman's service gave the Un's an early 4-0 lead, but Paula fought her way to tie the score at eight points and an 8-4 advantage. But the Un's took control and won 15-12. The deciding point will be disputed for a long time, as the ball hit the pole holding the net up and bounced in bounds. Later the play was found to be illegal, but the protocol was handled too late. The Un's won the championship and finished a perfect season.

From this writer's point of view, the volleyball season was a tremendous success. Bill Niemann may take much of the credit. The exhibits of Dorset State were tremendous. She is by far and away the best female player in the school and perhaps the best ever seen at Bryant College.

Andy Dowdy—Andy Dowdy will be unable to be an active part of this year's squad because of an injury. Dowdy will play baseball.

Coach Joe Fowlkes—Joe is coaching his third season for the Indians. Last year's 12-4 winning team was one of the best in Bryant's history. This year, Joe hopes to equal the same performance record and bring to the fans of Bryant "a very exciting and competitive brand of basketball." Joe's optimism will be due to his strong performances by his veterans as well as these newcomers to Bryant.

Glenn Cantin—Glenn is one of the most experienced basketball players playing for the cages this season. An exceptional outside shooter, the 6'7" guard has been a key player and team play. Cantin hopes to regain his form and to lead his team during the course of the season.

Front Row: John DeCraey, Andy Dowdy, Bob Spino, Coach Joe Fowlkes, Rick Lewis, Maurice Sebastian, back Row: Paul Fitzgerald, Rick Deselio, Bob Penta, Bob Oblicheinski, George Crazo, Glenn Cantin, Joe Conney.

Paul Fitzgerald—This season marks Paul's third year on Bryant's Sub-varsity. At 6'4", Crazo plays both forward and guard. Fitzgerald has worked extremely hard this past year on his shooting, rebounding and defense. Coach Fitzgerald expects that Paul's rebounding will be his biggest asset for the team and its success.

George Crazo—George is one of six freshmen that are on the Sub-varsity team. At 6'5", Crazo plays forward and will be used to give the team strength under the boards. George can handle the ball, and is a capable mid-range shooter.

Andy Dowdy—Andy Dowdy will be unable to be an active part of this year's squad because of an injury. Dowdy will play baseball.

John Feeley—John was the playmaker last year for the Sub-varsity team. Accomplishing 136 team-leading assists, Feeley also averaged 11.2 points per game. The point man is responsible for directing the offensive attack, which John Feeley does admirably.

Kim Kaplan—Kim is a transfer student from Brandeis. At 6'4", Kaplan will play both forward and center for the Sub-varsity this season. Regarded as an excellent rebounder, Kim Kaplan's shooting ability makes his presence a pleasant surprise for Coach Joe Fowlkes.

Rick Lewis—Rick has just completed his first varsity competition playing for the soccer team. At 5'9", Rick obviously plays guard. Lewis plays with much enthusiasm and control.

John DeCrace—John's hustle and desire to play the game of basketball has given him a chance to play at Bryant. John will add the much needed depth on this year's squad.

Bob Oblicheinski—Bob is the man on the Sub-varsity this season. With a soft touch from the outside, Bob's rebounding will be a vital part of this year's contributions.

The UN's No. 1 GIRLS VOLLEYBALL PLAYOFFS

The third annual Tri-State Conference Cross-Country Championship was held here at Bryant College last Sunday afternoon. This meet marked the end of the 1973 Cross Country season for the Bryant runners.

Five teams were represented as follows: Brandeis, 3rd place finish line, Southeastern Massachusetts one again showed their superiority as they won easily with a team score of 22. The Bryant College Indians finished a strong seventh with 36 points. Trailing far behind the Indians were the placers runners fifth and eleventh. It should also be noted that the race favored S.M.U.'s Peter Kuchinski ran with a pulled tendon in his leg which eliminated him from any serious contention but at winning the gutsy race. finishing 20th, S.M.U. put on quite a show and is quite obviously a team to watch with talent.

Capt. Bryant, Capt. Dave Stone once more led the way, placing fourth. His time of 25:52 was his best on the Bryant course. Freshman, Gary Diggle, also ran well as he placed sixth. He continues to improve and should appear to have a bright future. The other Indian finishers were Steve Olson (7th), Rich Smith (25:11) and Buddy Harris (25:23).

The Archway Nov. 16, 1973 Page 12

The final results were:

1st: Brandeis
2nd: S.M.U.
3rd: Bryant
4th: Southeastern Massachusetts
5th: Bryant College

The Top 13 Indians who ran were:

1. Paul Fitzgerald (9th)
2. Rick Deselio (10th)
3. Bob Oblicheinski (16th)
4. Bill Skimmer (22nd)

All six Indian runners return next year. In addition, Coach Jim Gambardella reports some good high school prospects interested in attending Bryant next fall. The outlook for next season is highly optimistic.
