How come those athletic types always get the girls?

Photos by Jef Stein
With the world falling apart around us and everyone losing their heads, it’s nice to know that we at Bryant are keeping ours. I’m keeping mine in cold storage in an attempt to keep it from boiling over. For the past five weeks I have attended five Senate meetings, and for the past five weeks I have left each Senate meeting with a fantastic headache, lost and bewildered. For some unknown reason, the Senate meetings always end up in confusion and chaos. They usually start out nicely; but due to some irresistible drive among certain senators not to be outdone by other senators, they become hell-bent on the idea of turning the second half of each meeting into a fiasco. People start talking all at once, showing no respect to whoever has the floor; and build into a chorus of cacophony. I look forward to these Senate meetings not because I’m an interested student, but because of the juicy “discussions” which follow the adjournment of each meeting.

I am disgusted with the lack of respect and common decency which is displayed at these meetings. I doubt that giving each Senator a copy of Robert’s Rules of Order will help, because I’m sure that they don’t respect the person who drew them up enough to read them. This article is not directed to the entire Senate, but rather to those few who persist in turning each meeting into a three-ring circus. I sincerely hope that there will be a better show of respect at the next meeting and that everyone will have the decency to keep their mouths shut while someone else is speaking.

Paul Carroll
Assistant News Editor

Dear Editor,

In Wednesday night (October 31), are reprints of the article “No Amnesty” by Jerry Norton were placed on bulletin boards throughout the school. This was an attempt to get some reaction by the students.

The article, which was published by the Young American for Freedom was reprinted and put up by one of its members. We expect to place more articles up on different subjects. We urge the students to read these articles and to agree or disagree—read them and think about them.

Keep your eyes open and read articles put up for your reading.

A Young American for Freedom

Dear Editor,

While watching an old Mae West movie the other night and hearing her saying, “Come up and see me sometime,” I brought to mind an article that was in The Archway a few weeks ago, which solicited students to attend and get involved with the Student Senate. The following day, unable to concentrate on my school work, I found myself repeating two words. They ring in my mind, they pulsed in my blood, they had control over my entire existence all that day. 3:15, 3:15, 3:15, 3:15, 3:15, 3:15, 3:15, 3:15, 3:15, 3:15, 3:15. The time passed and finally there I was: ROOM THREE HUNDRED EIGHTY-SIX! (at 3:15) ME! Little mort—snor—me? A nobody! But here I was among all those senators, their briefcases in hand, 25 cent cigars clamped firmly between their teeth and their head-up London Fog coats draped nearly over their forearms.

A blush over the masses as the gavel was dropped. I was as proud as punch that I had gotten such a Jim Dandy seat way up in the front row where I could actually hear and practically touch those men of fame, the do-gooders, the Tyrants, the Presidents, the Senators. The Senators having taken their seats, the shuffling of papers ceasing, and the fact that the news reporters and camera men had sat themselves down in all four corners of the room, I knew the start of the meeting was about to take place. Actually I found myself on the edge of my chair—not so much from excitement, but from interrogation, for I was completely boggled by the fact that it took 20 minutes just to accept the minutes of the last meeting. From then on, it was like listening to the Whitehouse’s explanation of Watergate! Everybody was somebody had something to say about everything, but nothing that anybody and amounted to anything because these purported ‘somebodies have nothing that is anything to say about everything. (If this last line confuses you just keep saying to yourself, 2:15, 3:15, 3:15, 3:15.) But through it all I stuck it out, through the old business, the new business, the monkey business, and while the Senators gave each other the old business (which is only fitting since Bryant is a school of Business).

To make a short story long, I found at the end of the meeting that I was robbing my eyes, not from all that cigar smoke; but rather from the smoke that was blasting out of the ears of all the Senators. In ending, I would just like to ask why all the Senators (that has so much potential power) doesn’t do something more with their little 20 minutes? Rather than attacking Roberts Rules of Order and each other, why not try uniting and working together for some real problems that face the Bryant College Students.

Sincerely yours in activity fees,

DICK TRACY and THE KODAK KID

An amnesty?

No

Dear Editor,

On Wednesday night (October 31), are reprints of the article “No Amnesty” by Jerry Norton were placed on bulletin boards throughout the school. This was an attempt to get some reaction by the students.

The article, which was published by the Young American for Freedom was reprinted and put up by one of its members. We expect to place more articles up on different subjects. We urge the students to read these articles and to agree or disagree—read them and think about them.

Are Teachers Forgetting Their Job?

Dear Editor,

What ever happened to the teachers who are understanding, helpful and concerned about their students? Here at Bryant I feel that the teachers are forgetting the purpose of their jobs. We students come to college to learn by studying and through the help of our teachers. As of now, we sit in class and try to learn the material through our books. If this is the case, then why don’t we stop wasting our time and money in school and just go to a bookstore and buy the texts.

It seems to me that a teacher’s objective is to help the students learn; not to ridicule them for what they don’t know. I realize that the students have to give their time, effort, and participation in and outside of class in order to get good grades—but a student is not a computer; he can not be taught in a vacuum; and be told to top it to use. We are human beings and should not be taught in the same method that a computer programmer uses to program his computer.

When we go for extra help after school, we aren’t “bothering” the teacher; or are laughed at when we don’t know something. When the teacher blames the students for not studying when the class average is quite low.

Many students come to class late and don’t seem to put a lot of effort into their work. I have found very unfair questions before their eyes. The test is either too long or contains questions which really weren’t stressed in class. The objective of a test should be to quiz the students’ knowledge, not to trick or catch the student.

Chairl—not so much from excitement, but from interrogation, for I was completely boggled by the fact that it took 20 minutes just to accept the minutes of the last meeting. From then on, it was like listening to the Whitehouse’s explanation of Watergate! Everybody was somebody had something to say about everything, but nothing that anybody and amounted to anything because these purported ‘somebodies have nothing that is anything to say about everything. (If this last line confuses you just keep saying to yourself, 2:15, 3:15, 3:15, 3:15.) But through it all I stuck it out, through the old business, the new business, the monkey business, and while the Senators gave each other the old business (which is only fitting since Bryant is a school of Business).

To make a short story long, I found at the end of the meeting that I was robbing my eyes, not from all that cigar smoke; but rather from the smoke that was blasting out of the ears of all the Senators. In ending, I would just like to ask why all the Senators (that has so much potential power) doesn’t do something more with their little 20 minutes? Rather than attacking Roberts Rules of Order and each other, why not try uniting and working together for some real problems that face the Bryant College Students.

Sincerely yours in activity fees,

DICK TRACY and THE KODAK KID

Stranger in the school community is-picture of himself as a Little Man on Campus.

LITTLE MAN ON CAMPUSS

MAN WITH SNIFFY NOSE CAN STAND IN PAPER—GRAMMAR—IT'S STRANGE

This is really a serious problem. Our futures are at stake! I wish the teachers would start teaching and stop programming!!!
**Dormitory Doors To Be Locked**

Starting on Friday, November 2, the outside doors to the dormitories will be locked at night by members of the Security Force. Doors will be locked at 12 Midnight on Sunday through Thursday nights and at 2 a.m. on Friday and Saturday nights. They will be unlocked by the Maintenance men in the morning. These hours are tentative.

**Personality Weekend**

Personality Weekend at Bryant College is scheduled for November 1-3, 1973. This event, co-sponsored by Beta Sigma Chi and Phi Sigma Nu Fraternities, will open with personality judging on Thursday, November 1 at 8:30 p.m., in the Auditorium. The judging will consist of situations and questions to constestants to indicate their reaction to unusual circumstances. On Friday evening, November 2, the Coronation Ball will be held at the Elks Lodge, Smithfield, starting at 8:30 p.m. The winners will be announced at midnight. To round out this program, a Marathon Dance will be featured under the dome in the Koffler Rotunda. Dancing will start at 4 p.m. Saturday, November 3. Movies and refreshments will be added features for this event.

**SIB'S Alumni Dinner Dance**

Sigma Iota Beta's second annual Alumni Dinner Dance will be held Saturday, November 3, at the Rhode Island Country Club in Lincoln, Rhode Island. Alumni, Chairman, Donna DeSousa, predicts this year to be a success. By being in close contact with alumni sisters, Donna finds that sisterhood is continuously growing stronger. The Sibbians never lose their outstanding unity or individuality. SIB will never change! Last year the five original Sibbians returned for the Alumni Dinner Dance; and regardless of their age differences, headed right toward the bar before remaining for their pledge days of 1944. It was a good time, enjoyed by everyone.

**Human Relations in Business**

"Human Relations in Business," the seminar to be featured by Dr. Eileen Morley, Professor of Management at Harvard Business School, at the November 6, 1973 session of Bryant College's Women in Organizational Management. This session is scheduled from 6:15 to 9:00 p.m. in one of the conference rooms at Bryant. Dr. Morley's professional experience includes positions in personnel management in England and for the Polemore Corporation; a fellowship in clinical psychology at Massachusetts General Hospital and Human Relations Center, Wellesley, Massachusetts; and most recently, as research assistant for Research in Careers, Harvard Graduate School of Education; and technical associate, Systems Research Unit, Harvard Medical School. These positions have earned her present affiliation at Harvard.

A member of various professional organizations, Dr. Morley has written a number of publications dealing with vocational competence and human behavior. Among these are "Career Development: Growth and Crisis;" "Organizational Systems: General Systems Approach to Complex Organizations;" "Human Services in Complex Work Organizations:" "Work Allocation: An Analytical Look at a Current Business and Social Problem;" etc.

This two-week pilot program, which began on October 9 and will run through December 1, deals with information useful to women in the nonprofit agencies which serve necessary areas of our daily lives. Registered members come from these organizations which have chosen them as candidates for supervisory positions. It is funded jointly by Bryant College and a grant from the Rhode Island State Advisory Council for Title of the Higher Education Act.

**ISO Greek Dinner Night**

The ISO-sponsored Greek Night dinner that was held at the ARB Inn last Friday, October 26, turned out to be one of a gastrocultural event—in the best ISO tradition.

From the powerful Oussi (Absinthe) to the traditional greek dishes, the Greek clapping and fingers-napping Greek music, to the energetic Greek dancers (from Bryant and Brown), it was an authentic Greek event, complete even to the Greek flag over the dancing.

It was an event that appealed to all segments of the Bryant community: students, faculty, and administrators. It was an event where actuality lived up to expectations.

Credit for this extremely successful affair should go in general to all the members of the ISO, but also in a very special way to Nick Stammbachle, who spearheaded the plans for the event.

Dr. Lebovitz, faculty advisor, was presented with a plaque for his dedicated services to the ISO, accidentally, rumor has it that Dr. Lebovitz brought some Greek guests just for the purpose of checking to see if the food and refreshments were genuinely Greek.

**ISO Greek Dinner Night**

**A Gala Event**

Members and Guests of the International Students Organization enjoy Greek delicacies, buffet style.

**Counseling Office**

**Knox Speaks**

Professor Knox will discuss investments and particularly chat about the Sixth Annual Investment Seminar, "Investment Decisions Today," which will be held on campus, Saturday, November 17, 1973.

Fall On-Campus Recruitment Program

The Fall On-Campus Recruitment Program began on Thursday, November 1, and will continue through Friday, December 17.

The continuing schedule will be printed in The Archway for the week following the date of the issue.

Though scheduling to date has been rather heavy, some openings for teachers are still available. Consult with the Placement Secretary for more information.

Schedule
November 1 - November 9

Thurs., 11/1 G. Fox & Co.
Fri., 11/2 Price-Waterhouse
Mon., 11/8 U.S. Navy - OCS Programs
Tues., 11/9 Syracuse Univ. - M.I.T.

Wed., 11/10 Haskins & Sells
Thurs., 11/11 OCS Programs
Fri., 11/12 Arthur Andersen

Pat Keeley-Not Just Another Pretty Face

by Paul Carroll

Pat Keeley 1973

"Screw Award" Recipient.

The fifth meeting of the Student Senate was convened with the reading of the minutes from the meeting of October 15 by Jeannie Lincke, President of the Senate. The Senate passed a motion made by Rick Corrente to accept the minutes.

Fred Leonard, Speaker of the Council, touched briefly on the task running the meeting while Matt McManus, Vice President of the Senate, was acting President in the absence of Greg Evans.

Leonard went over an outline of Robert's Rules of Order which had been given out from the Senate minutes, voted on and determined to be valid. The vote was 18-1 in his favor.

Leonard then presented a report of the activities of all Senate committees. Amendments were made to the charges of some committees in an effort to speed up the process.

The Senate approved the charges of the following committees:

- Public Relations, Freeman Orientation, Buildings and Landscaping, Commuter-Dorm Relations, Faculty Development and Service Awards.

The following committee will be voted on at the next meeting:
- Ways and Means, Dining Service, and Academic. The Senate also approved the chairpersons of each committee.

Peter Lorre? Walter Brennan? Shelly Lee? W.C. Fields? No, it's Pat Keeley-Not Just Another Pretty Face. Pat Keeley, a top-notch college, Mr. Keeley is very optimistic about the future of Bryant. He feels that the success of the college depends on this and his concern for the faculty. He is a man who is sympathetic towards the faculty and concerned about the future of the college.

Pat Keeley presently resides in North Scituate. He received his B.A. in English from Antioch College, and then went on to Providence College where he completed his master's degree. After teaching at P.C. for two years, Mr. Keeley came to Bryant College in 1967. He has been at Bryant for the past seven years. He is a member of the faculty's major committees at Bryant including the Student Senate Committee, Trustee Nomination Committee, and the Faculty Association of the Bryant College Young Republicans. He is also the faculty representative to the Student Senate. He is currently serving as the faculty representative to the Student Senate.

In an exclusive interview with Mr. Keeley during his lunch (I mean, lunch) hour, he was not at all surprised to learn that he is an avid reader. An author in his own right, Mr. Keeley has had his stories published in the New York Times. He is also an excellent sports fan and a fine storyteller. In his free time, he enjoys tennis and his participation in the faculty's basketball and football games.

Mr. Keeley's hard work and unorthodox constitution have not gone unnoticed at Bryant and he has been honored in the past with the "Smucker's Award," and last year he was the recipient of the coveted "Screw Award." Mr. Keeley is very optimistic about the future of Bryant. He feels that the success of the college depends on this and his concern for the faculty. He is a man who is sympathetic towards the faculty and concerned about the future of the college.

The student body will have a continued growth and appreciation of the intellectual, and says that his only disappointment is that too often it is the average student who influences the superior student, and he wishes it were the other way around.

Mr. Keeley's success as a teacher is due to his respect for his students and fellow faculty. He feels that the college is deeply concerned in offering students something which will make it possible for them to enter society as a person. Mr. Keeley feels that it is important to be a part of the process and not simply a teaching for a job. He wants to see students grow in both the intellectual and practical sense of the college. He wants to see students grow in both the intellectual and practical sense of the college.

Mr. Keeley particularly enjoys teaching English at a business a more than at a Liberal Arts college because he feels that his students are literature with a business background. He feels that he can do so much better with an English major, who is saturated with it.

I can say to any Newfoundlands out there who have not yet written Air Force or Harvard, if Mr. Keeley's classic colegiates is to sneak a peak into one of his classes, (make sure he's sober and in a good humor), better still sit in his evening classes. It will be a rewarding semester—to be sure!
**MBA Highlights**

**Preregistration Survey**

1974 Spring Semester

As part of its program of refining its 1974 Spring Semester entrance projections, and based on the graduate courses, instruction text and classroom requirements, the Graduate Office is preparing a preregistration survey which will be mailed out shortly to all MBA candidates currently enrolled in the Fall Semester and to all those who should be enrolling in the Spring Semester.

Among the questions asked will be whether, if the surveying graduate students would prefer to enroll in late afternoon and Saturday morning classes. The Fall 1973 survey indicated some interest in such classes.

**Changes in AACSB Standards for Admission**

The American Assembly of Collegiate Schools of Business (AACSB) has modified its interpretations of standards of admission by adding provisions that allow for a greater weighting of scholastic cum versus ATOSB scores. This means essentially that a student who has a good cum but who does not test well on the ATOSB exam may become admissible to MBA programs.

Since the Graduate School at Bryant in its MBAs admissions policies is guided by the AACSB standards, it welcomes the new modifications that encourage greater flexibility in admission considerations.

**Mr. Ray Caine Addresses MBA Alumni Associates**

The newly-formed MBA Alumni Associates had their first on-campus program meeting at Bryant on Tuesday, October 30. The featured speaker was Mr. Ray Caine, Executive Vice President of Commercial National Bank, Case & Randolf. He is also a member of the Graduate Business Advisory Council of the Graduate School, Mr. Caine spoke on "The Rhode Island Economic Climate From the Public Relations Point of View." His talk generated a spirited discussion and many questions.

At the conclusion of the meeting, Brian Doughty, MBA 1973, Consumer Credit Officer for Old Stone Bank, was asked to take on the pro of Program Chairman for future meetings of the Associates. The next meeting is being planned for early December.

The Associates meeting is an excellent example of how our Advisory Council coordinates with our MBA graduates.

**Committee For Better Food At Bryant Update**

The third meeting of the Committee for Better Food at Bryant was held on Thursday, October 25, 1973. Present were Mr. Hank Steinberg, the District Manager for ARA, Peter Babbitt, Gene Hemsingway, and Mr. Bill Tamul, the Food Production Manager for ARA at Bryant, and the members of the Senate sub committee.

The first item on the agenda was Peter Babbett’s resignation. Mr. Babbit left Bryant on Friday, October 25, and is employed by Butler Hospital in Providence.) Mr. Babbit gave much consideration concerning his resignation. Gene Hemsingway will fill in for Babbit until a replacement is found. Many people in the area are being considered for the job. The replacement should be hard at work in the kitchen by next week. We, the students of Bryant College, wish Mr. Babbit all the luck in the world. We thank him for his cooperation.

Next, the talk of the meeting turned to the subject of student managers. Those managers, who will be employed by the cafeteria, will stand at the front of the house on weekdays and evenings. Their job will be that of a “go between” for the students and the managerial heads of the cafeteria.

We talked about the dishwasher next. Since the month of September, the dishwasher has absorbed over $15 in repairs. A representative of the manufacturer is coming down to look at the machine, and if it cannot be repaired once and for all, they will have to look into the acquisition of a new machine.

The heads of the cafeteria turned the talk to the possibility of the Committee taking a tour of the kitchen to see all the aspects of food preparation at Bryant. The Committee agreed with enthusiasm. Now was our chance, (only kidding)!!!

We then asked if it was possible to have music piped into the cafeteria during meals. This idea is being given serious consideration.

If anyone is wondering what the bell happened to the London Bell last Wednesday, here’s the scoop. It was cooked differently than it had been in the past.

Things are shaping up now as far as the food at Bryant is concerned. This proved that things can be accomplished through peaceful actions, rather than immature and unnecessary outrage.

**Commuter Corner**

The Department of Transportation has announced that in conjunction with the Governor’s effort to upgrade highway safety, the State’s second wrong-way device has been installed at the Thurbers Avenue off ramp, 7-36, southbound by Lighting Services of Rhode Island.

For the next two weeks, the wrong-way device will be monitored by Paul Romano, Department of Transportation Traffic Engineer, who has been assigned by the Director Robert J. Raffill, to supervise the installation and operation of the device.

This wrong-way device differs from the State’s first device installed this past summer on the West Exchange Street off ramp. A “breakaway, fiberglass” arm is used in conjunction with warning signals to alert the wrong-way driver. To alert the motorist who is innocently traveling in the right direction, a series of flashing beacon lights and signs are actuated when the wrong-way device is triggered. Hopefully, after a successful two-week “monitoring period,” the wrong-way device will indeed open the first part of November.

**FOOD AT BRYANT UPDATE**

The third meeting of the Committee for Better Food at Bryant was held on Thursday, October 25, 1973. Present were Mr. Hank Steinberg, the District Manager for ARA, Peter Babbitt, Gene Hemsingway, and Mr. Bill Tamul, the Food Production Manager for ARA at Bryant, and the members of the Senate sub committee.

The first item on the agenda was Peter Babbitt’s resignation. Mr. Babbitt left Bryant on Friday, October 25, and is employed by Butler Hospital in Providence.) Mr. Babbitt gave much consideration concerning his resignation. Gene Hemsingway will fill in for Babbitt until a replacement is found. Many people in the area are being considered for the job. The replacement should be hard at work in the kitchen by next week. We, the students of Bryant College, wish Mr. Babbitt all the luck in the world. We thank him for his cooperation.

Next, the talk of the meeting turned to the subject of student managers. Those managers, who will be employed by the cafeteria, will stand at the front of the house on weekdays and evenings. Their job will be that of a “go between” for the students and the managerial heads of the cafeteria.

We talked about the dishwasher next. Since the month of September, the dishwasher has absorbed over $15 in repairs. A representative of the manufacturer is coming down to look at the machine, and if it cannot be repaired once and for all, they will have to look into the acquisition of a new machine.

The heads of the cafeteria turned the talk to the possibility of the Committee taking a tour of the kitchen to see all the aspects of food preparation at Bryant. The Committee agreed with enthusiasm. Now was our chance, (only kidding)!!!

We then asked if it was possible to have music piped into the cafeteria during meals. This idea is being given serious consideration.

If anyone is wondering what the bell happened to the London Bell last Wednesday, here’s the scoop. It was cooked differently than it had been in the past.

Things are shaping up now as far as the food at Bryant is concerned. This proved that things can be accomplished through peaceful actions, rather than immature and unnecessary outrage.
A Look At Bryant's Returning

HEAD COACH TOM FOLLIARD—For Tom Folliard, this campaign marks the sixth season as Bryant's head coach. Compiling an 84-42 record, Tom has led the Indians to three Naismith Conference titles and four N.A.I.A. regional berths. Last year's 20-6 team finished as runnerup in the N.A.I.A.'s by defeating Boston State (74-71), but losing to Quinnipiac. Folliard cannot possibly improve on their already unblemished Naismith Conference record of last year (10 wins, 0 defeats) but hopes to repeat the feat again. United Press International voted Coach Folliard small college "Coach of the Year" and District 32 Region, N.A.I.A. and the Naismith Conference coaches honored him with the same title.

ASSISTANT COACH LEE DRURY—This is Lee's second year as Bryant's assistant basketball coach. Lee was freshman coach at Brown University for three years and assistant coach of Springfield College prior to joining the Bryant staff. Drury played ball at Springfield and was Co-Captain of the 1965-66 squad. Lee and his bride, Eileen, make their residence in North Providence.

RICK SHANLEY—Rick is the only returning senior on this year's squad. An excellent team leader, his exuberant style of defensive play makes him a solid ball player. "Baby Bull" is playing his third year in a varsity uniform and should have plenty of playing time. Rick was called upon last year when Coach Folliard needed an exceptional man in a 2-3 defense. Not an outstanding outside shooter, Shanley's quickness in setting picks, and moving without the ball makes Bryant's moving offense click.

NED BOHAN—One of two juniors on this year's squad. Bohan was second (168) in Rhode Island (Ernie Hammel). The "pep" spark of the Indians. Bohan is 5'9" guard from New England Prep School. The three year starter, his totally-unselфи play, creative play, improved outside again lead the Indians to another N.A.I.A. "Coach of the Year" and District 32 Region, N.A.I.A. 5'9" guard from the outside has worked extrely on his inside shooting and his defense. No smallest player to most essential playmaker. Despite slight five-nine, it has handled opponents and six inch quite effectively.

BOB MOLL—This is Bob's third year in a varsity uniform. A resident of Fairfield, Connecticut, Bob plays both forward and center with aggressiveness. Bob has worked hard both from the outside and around the basket. Moll has crashed the boards during the past few practices and should continue to improve. Last year, Bob had the opportunity to start in his first varsity basketball game at Bryant.

by Steve Sadetsky
Photos by Steve Sidoruk
Varsity Basketball Squad

Dave Sorafine—Dave has already established himself as one of the best big men in Bryant’s basketball history. An excellent outside shooter, Dave will again assume the role as starting center. In a clutch performance, Sorafine threw in 28 points in one of the most prolific shooting displays ever exhibited by a Bryant player. With 14 for 17 shooting and seventeen big rebounds, Sorafine earned the respect of many coaches attending the N.A.I.A. playoff game against Boston State. Dave was awarded Honorable Mention in E.C.A.C.’s poll for Players of the Week. Sorafine had a 26 point-20 rebound effort against Clark University earlier in the season. Last year, Sorafine was the leading shooter, both at the foul line and in the field. Dave, at 6’9” is without a doubt an integral part of Bryant’s team play.

Tom Dupont—An excellent leaper at 6’2”, Tommy received valuable and clutch varsity experience on last year’s championship team. A good outside shooter from the 15-22 foot range, Dupont has showed poise under pressure. Against Bentley, Tom converted four of six outside shots when the Indian’s leaders had to sit the bench due to foul trouble. This year Dupont’s primary job will be rebounding at the forward position.

Charlie Armstrong—The 6’10” DYNAMO from Waterbury, Connecticut is back again. Doubling last season by playing both sub-varsity and varsity ball, Big Chas played in a total of 26 games. Charlie established a new Bryant College Sub-varsity rebound record last season, snatching off 28 errant shots. The opening game of the campaign showed Armstrong with 24 points. In varsity competition, Big Chas ran off a streak of eight points in a span of less than two minutes. The leading rebounder on the Sub-varsity team is back again.

TOM DUPONT (20)
“My experience was that most Africans are very friendly, warm, generous, helpful, and that most of them were able to accept me as an individual person for what I am, and not for the many stories they have heard about American stereotypes, and despite the political and social problems which we manifest in our society and which Africans find hard to accept.” James Estey, Assistant Professor of history, had an experience that very few of us will ever have. This summer, Mr. Estey was asked to come to Africa in order to learn more about the people and countries he would be teaching about this fall.

What was Mr. Estey’s purpose for going to Africa?

The main purpose was adventure, I went all by myself. I wanted to have some experience with the people and countries I was going to be teaching about this fall.

Mr. Estey was asked if he had visited any of the tribes in Africa; and so, which ones? He said that he had visited a number of tribal villages. He gave two examples. The first was the Kikuyu Tribe in Kenya, and the second was that of the Loui in Zambia. He also said that he had contact with some traditional life.

“I would like to say that one of the most important results of Western contact has not so much been cultural exchanges as technology. Virtually, every African country has at least one or more of modern cities. I think this has been an important influence.”

Mr. Estey said that most Africans don’t understand this American imperialism in such places as Vietnam. Racism in America is also a deep source of hurt for Africans.

The question of racism came up, and the response was the following: “In the Southern United States, racism is a small white minority that exercises virtually total political control over a very large black majority, so that in those areas racism is very strong. That is perhaps the most important political and social problem of Africa today. It is the fact that most African nations are overwhelmingly dominated by blacks, run by blacks and there are some virtues of white imperialism in the south.”

“I was very impressed with the extent of wildlife. There are a lot of areas where there is wildlife, especially in Africa. Part of this is because most African countries have made an effort to preserve wildlife, and I think where tourists can go and look at the animals. Another fact here is that Africa has considerably less population density than the U.S. There seems to be a great deal of emphasis, a very high priority, put on education now, I had numerous conversations with teachers and people who were in educational administration indicating that there has been rapid expansion in this area. There are certain pockets of illiteracy still in Africa; for example, Ethiopia, where still under one-half of the children go to school. This is due to the policy of the government. It’s, of course, especially high in the Portuguese colonies like Mozambique where there are virtually no facilities for education at all.

Mr. Estey told about industrialization in Africa. He said it depended on the area.

On the topic of food shortage, he said that the problem here was an improper balance of diet.

Could be compare on city of the U.S. to one city of Africa? “That is almost impossible.” His view for this was that the part of Africa he was in was British Africa; therefore, the British influence was quite strong.

Mr. Estey concluded with this very informative statement, “Africans view Americans as just another minority. The two major problems that Africans don’t understand are:

1. American racism and American involvement in Vietnam. They find it hard to comprehend how American can talk about equality and still practice racism.

As for Vietnam, this is incomprehensible to them. It is imperialism and colonialism, both of which they are very much against.

Many didn’t understand the American involvement in the Middle East crisis and why the U.S. supports Israel since Israel expelled the Arabs and kicked the Arabs out in order to create Palestine. Why should the Arabs have to pay for the persecution of Jews in the past? This I found very hard to justify.

The views of Americans have a number of positive things; many Americans have a spirit of adventure; Americans are willing to try things, they adapt better than Europeans; Europeans wouldn’t come down to an African level; Americans have a sense of daring; and the Africans are very impressed with the American wealth. Most Africans would not down to an American level; and by Africans standards we are. Many African’s views of Americans come from TV and movies they had stereotype-type that stereotyped people have.

The thing that I came away with is that, “People are people wherever they are and that Africans are very human.”

This is because of geography, climate, desert or mountains, lack of rain fall and grass land. For this reason the wildlife has a better chance for survival. But there are also some exceptions to that. When I was in Kenya there was almost a national scandal about people coming across the border from Ethiopia and Uganda on elephant trading parties. There is some sort of tradition that if you drink the dust from an elephant tusk and a man has some sort of problems with sexual potency that this problem will be alleviated; so therefore, the elephant teeth are getting a fantastic price. These men go out, kill the elephant, take off the tusk and leave the elephant there. This is a real problem. Tigers are extinct in Africa. There is no one left and they are increasingly rare; so that although there is plenty of wildlife available in many parts of Africa the problem of conserving these animals has become increasingly serious.”

Health care was brought up during the interview. Mr. Estey said that this is a very serious problem. “There are sections of Africa where there are no medical facilities at all. In many of the Portuguese colonies there is only one doctor for every 20,000 people. It has one of the highest death rates in the world.

The question of the problems with educating doctors is that many doctors would come to the U.S. if they could, or to Britain to practice and to receive their training. Then they discover that
BROTHER TO DRAGONS, currently playing at the New Trinity Playhouse in Providence, is perhaps the most timely revival which Adrian Hall, the company's director, could have chosen for the opening for the new theatre. The world premiere of BROTHER TO DRAGONS was performed by Trinity in their former home during the 1968 season. Written by Pulitzer Prize winning poet-author Robert Penn Warren, it is based on a poem of the same name.

It is very representative of the abilities retained within the company, and elicits a certain amount of participatory understanding from the audience. Actors are called upon to restate words, the fluttering of a moth and the somber nocturnal movement of a boat on a river. These mimes are designed to allow the voyeur freedom in his conception of the overall work. "We've not embarrassed to ask an actor to be a dog, fox or a tree on an earthquake," says Hall, "an neither are we apprehensive about saying the audience to call upon their imaginations and take that leap with us." For the new theatre's commencement production, BROTHER TO DRAGONS is perhaps the most suitable because it is Trinity on display.

The work deals with a scandal concerning our third President, Thomas Jefferson (now relevant.) Jefferson's sister, Lucy, married one of the family's slaves. The all-cognizant timely step toward the use of the nude for effect, however, I can't openin g for the new theatre. The world premiere of 1968 season. Written by Pulitzer Prize winning poet-author Robert Warren, it is based on a poem of the same name.

The Lewis family designed to remain in Kentucky. To the distress of their mother, Lilburn resolved to avenge her death by brutally murdering banks of the punishment, and embarrassment which will inevitably fall him, Lilburn easily persuades Isham to shoot him.

There will be a meeting for the American Marketing Association on November 8 in Room C-207 from 12:30 to 1:00. All new members are welcome.

The Veterans' Club has meetings every Thursday from Noon to 1 p.m. There's free beer. For Vets only.

BROTHER TO DRAGONS...the first work from a theatre which promises to be a mecca for regionalized drama in New England.

WINTERSESSION 1974

APPLICATION PENDING FOR SPRING INTENSIFICATION - 15TH WEEK OF JANUARY 20, 1975

1. Winter Session is intended for the period of January 7 - January 22, 1975.
2. Academic Schedule limits attendance to upper 10%matriculated students. Registration for the Winter Session is on a first come, first serve basis.
3. Non-degree students, tuition, and vacations will be charged. Additional information will be sent to current students in December.
4. A Class List, having your name and verifying your attendance will be required.\n5. Registration fees will be charged. Tuition for the Winter Session is the same as the Winter Session.\n6. There are two deadlines for the Winter Session. The first is January 22, 1975 for those students enrolled in the second week of the Winter Session. The second is February 28, 1975 for those attending the second week of the Winter Session.
7. Tuition fees for the Winter Session are due and payable in full, regardless of your attendance at any time.
8. The deadline for the enrollment to the Winter Session is January 31.
9. The deadline for the enrollment to the Winter Session is January 31.

Kowalski Plays Karlowicz
(and others)

Henryk Kowalski, the renowned Polish-born violinist prodigy who emigrated to this country with his wife and children one year ago, will play his biggest American public concert on Sunday, November 11. Professor Kowalski will perform at the Providence Hall on Brown’s Pembroke Campus at 8:15 p.m.

Born to an intensely musical family (Kowalski’s father was a violinist and conductor), by the age of seven Kowalski had played concerts in many Polish cities. At sixteen he appeared as soloist with the Warsaw Philharmonic, and at eleven he won first prize in competition with young violinists of Warsaw.

At the beginning of World War II Kowalski was captured by the Germans, and for several years his was an all-too-familiar story for Polish Jews of concentration camps, escapes, capture and torture. Condensed to death, Kowalski escaped once again to spend 20 months concealed in a hole beneath a pig sty. When he surfaced it was to discover that his parents and relatives had been murdered by the Germans.

Nearly broken by the period of horror he survived, Kowalski returned to the violin and began again to play throughout Europe with great success. Critics have compared his playing to the great masters of an older generation. After a 15-concert Russian tour, “Soviet Culture” spoke of his “reverent, deep tone, equally expressive in both the intensified and delicate, transparent passages.” Vienna’s “Die Steffloppe” suggested in a review that “the fruits of suffering are hidden blessings.”

At the November 11 concert, the audience will be treated to a demanding, exciting program containing nearly two hours of music. With his son, Henryk Kowalski, Jr., playing violin with him and Mrs. Esther Chester of Cranston the accompanying pianist, Kowalski will begin with Mozart’s Quintet, D. minor, Opus 71, for Two Violins and Piano. He will then play Handel’s Sonata IV, D major and Haydn’s Concerto I, major.

The high point of the concert for many will come after intermission, when for the first time in America Henryk Kowalski in concert is being co-sponsored by the Brown University Ladies of the Faculty, the Brown Music Department, and the Polonia Association of Rhode Island. Tickets are $3, $1.50 for students. Concert proceeds will be used for academic and scholarship purposes.

From 2:21 Transcendental Meditation in the United States in 1965 to 350,000 in 1973, with 15,000 to 20,000 beginning the practice every month; from the Beatles and Mia Farrow to official recognition from State and City governments and endorsements of leading scientists, educators and doctors; from a "non-doing turn-on" to "a significant method of reducing stress and developing creative intelligence"—this is the story of the Science of Creative Intelligence and its practical techniques of Transcendental Meditation, brought to the world by Maharishi Mahesh Yogi and the subject of an introductory lecture Tuesday evening, November 6 at 7:30 p.m. in the Auditorium at Bryant.

During the last half decade, extensive scientific study of Transcendental Meditation, said to be an effortless, natural procedure easily learned by anyone, has been conducted at over 80 universities and research institutes. What are the real or supposed benefits of the practice? Speckes, says Joe Orsatti, a spokesman for the Providence chapter of the International Meditation Society, the educational organization which teaches Transcendental Meditation, may be in for a surprise. The list of scientifically verified results of TM is impressive:

TM produces a state of rest and concentration deeper than sleep, reducing the heart’s work load 25 percent and significantly eliminating stress, tension and anxiety.

TM raises IQ, improves learning ability, develops creativity and promotes clear thinking and efficiency in action.

Mr. Orsatti says that the technique "expands the consciousness capacity of the mind" and "unfolds the full potential of the mind."

Psychological studies show that TM produces increased emotional stability, greater happiness and self-confidence, reduced hostility and self-doubt.

Drug use of all kinds, from this practical technique—both in

transmitters to marijuana and LSD—also including tobacco and alcohol—show a marked decline among TM meditators.

"The potential benefits of clinical medicine and for the general public— are enormous," says Dr. R.K. Wallace, pioneer researcher of TM at Harvard Medical School.

Miami's Green Machine

by Richard Mayer

After watching the Miami Dolphins win their sixth game of the year against the New England Patriots, it is difficult to bet against the Dolphins to repeat as Super Bowl champions. Their overall strength is awesome. They must be considered as being close to a perfect football team.

The Dolphins' coach, Don Shula, is now the best coach in professional football. He has built a balanced offense and defensive attack, as well as brilliant special teams. Shula accomplished this by smart drafting and superb trades. But Shula's ability to obtain the most out of his players by always giving 100 percent on the field is his premier trait. He also has the distinction of coaching a team to a National Football League championship game and then coaching a different team to a Super Bowl championship, Webb Ewbank shares this honor with Shula.

Miami's running game is the strength of their offense. The triple running threat of Jim Kiick, Mercury Morris, and Larry Csonka is the premier running tandem in football. Last season Csonka and Morris each reached the 1,000-yard rushing plateau. As far as the passing game is concerned, Bob Griese is a good quarterback. He has a strong arm and is the secret behind the effectiveness of their offense. The household names of Tim Foley, Curley Johnson, Jake Scott, and Dick Anderson are the famous scrumming defensive backs.

The blocking game is lead by placekicker Garo Yepremian, who has now kicked 12 consecutive field goals. Larry Seiple is a very consistent punter. Without any doubt, the Dolphins are a great football team. Their winning record proves this fact. It appears the team only plays well enough to win. With one-half of the season complete the Dolphins have defeated San Francisco, New England, and Buffalo. They were defeated by Oakland, 12-7.

Sunday's game with the Patriots is an example of a typical Dolphin game plan. The Patriots were 2-6 for an upset. They made the game interesting because of a 14-13 halftime lead. But the Dolphins proceeded to score 17 unanswered points and defeated the Patriots 30-14. The current Miami Dolphin team might be one of the greatest professional football teams ever assembled. They are trying to solidify their Super Bowl status for an unprecedented third consecutive appearance. The road through the playoffs will be extremely difficult because when they reach the third and fourth round they will be attempting to dethrone the Dolphins. But come Super Bowl Sunday look for Don Shula and his Green Machine to appear in their third consecutive Super Bowl.

Of course, one cannot write an article about the Dolphins without regard to his name. But they are no longer regarded as no-names. Don Dan Hebler, Manny Fernandez, Bob Hope, and Bill Stanfill are the front four. They are all all-pro choices. Their fierce competitiveness and ability to play together make the team the best in the A.F.C. The old man of the Dolphins, middle linebacker Nick Buoniconti, is now the premium player in the league at his position. Shula's "tale of two Suoniconti in a trade with the Patriots for quarterback Kim Hammond. Two move draft choices, Bill Stanfill and Mike Kolos, are the other linemen.

The household names of Tim Foley, Curley Johnson, Jake Scott, and Dick Anderson are the famous scrumming defensive backs.

Two years ago, Buffalo's O.J. Simpson rose to prominence by hanging up his football cleats and walking away from three consecutive time sessions at Erie, the former Southern Cal great had rushed for 2,825 yards in his two seasons, respectively. O.J. had been used as a wide receiver in college, but his first pro coach, John Rauch, asked Simpson to run the ball, and thus he had to do more pass receiving and blocking. As O.J.'s career moved on, the Simpson reputation slowly faded into the past.

At the end of Simpson's third season, Bills owner, Ralph Wilson, made it clear that used his team and O.J.'s Simpson's career. Without warning, head coach, John Rauch, was fired. Rauch's replacement was none other than former head coach Lou Saban. Saban had moved from Buffalo to Denver to revive a sagging Broncos team. After a few fruitless years of rebuilding, Saban decided it was time to return to Erie County.

Without any doubt, the current Bills' Saban's tenure as coach of the Bills, Simpson was on the rise with much hope and optimism. In fact, "Juice" signed a new one-year contract, although his old one still had a year to run. Saban had seen the inside of O.J. Simpson to the Bills, and it was easy to gear the offense to the future Pro Bowl M.V.P. Once the 1972 season unfolded, Simpson made Saban's offensive changes a big success.

O.J. always had the instinct to get to the hole and could elude potential blockers who figured in his long run. Saban exploited this hidden talent by teaching the technique of drive blocking to his offensive backs. When O.J. moved O.J. would leave O.J. six yards behind line of scrimmage at the snap of the ball.

With his 9.4 speed, Simpson could easily be in "overdrive" in the backfield and split the slant, and still be clear of the scrimmage. Needless to say, O.J.'s running has been spectacular.

The Bills were obliterated by serious injuries throughout the 1972 season. And the offensive line lost five guards, two tackles, and one center. The porous offensive line did not deter the enthusiasm of "Juice." He went on to rush for 1,283 yards, and won the NFL's overall rushing crown. Furthermore, O.J. went to his first Pro Bowl in '72, and promptly walked off the field with the game's Most Valuable Player Award. After the game, Pittsburgh's Joe Greene commented, "Man if that guy had some blocking in Buffalo, they'd have to ban him from the league." In the space of one year, the fortunes of O.J. Simpson had taken a sudden and dramatic upturn.

While "Juice" was taking a much-needed post season rest Coach Saban was already preparing Simpson's snatching "73 debate. His offensive line had performed well despite injuries and inexperience. In '72, but the Buffalo head coach wanted a standout front line for "Juice" in '73. He drafted Michigan's Paul Seymour and Michigan State guard Paul Delamielleure. With holdovers Ray Jarvis, Dave Foley, Dennis Green, J.D. Hill and Reggie McKenzie, Saban's perfect line would soon be a reality.

Once the 1972 season concluded, it became evident that Buffalo and "Juice" would be battled no longer. Simpson and the Bills found themselves in the driver's seat with no one able to stop them! After a loss to San Diego, the Chiefs and Eagles fell in quick order, and Buffalo had its first extended winning streak in four years. The Bills were super all right, but one man had made all the difference.

The Bills were dependent on "Juice" to make their offense go. In his first game of the season, O.J. broke through paper thin New England defense, but a woeful 359 yards. The Bills broke the existing NFL, a single game rushing record held by Willie Ellison. With such an incredible start, they behind him, "Juice" has now turned his attention to Buffalo. Brown's single season rushing total. After seven games, "Juice" had passed for 1,938 yards. His present pace, O.J. Simpson could break the record before nineteen games.

Countless to say, O.J. Simpson has come a long way in two years. At last, he attained the greatness that everyone expected of him after his graduation from USC. He has finally made all the adjustments that will make him a truly great running back. The offensive line has also matured along with Simpson, and they have been able to open up the needed daylight for "Juice" to run to.

The prospects of halting the Simpson/ Bills' rear end, in any opinion, only injury will stop his awesome offensive capabilities. He will go on to rush for more than 2,000 yards, and thus insure himself a permanent seat in Pro Football Hall of Fame.

The Standview Grand Tour

Juice is Here To Stay!

by Peter Lockatt

Miami's, Jim Kiick, plunges forward for short yardage in recent game with Pats. (UPI)
The struggling Bryant soccer team lost 4-0 to Babson College on Wednesday, November 1, 1973, at Welden Field to complete the Indians' away schedule. The Beavers evened their record to 5-6-0 with an eight minute goal when Mark Berry connected from John Anderson after John Feeley had thwarted several scoring opportunities. Five minutes later, Babson doubled its margin on a two-on-one break as Berry drove Feeley out of position and proceeded to score again. The home team made it 3-0 on a corner kick goal by Bob Hartley at 32:30 when the ball escaped the reach of the outstretched hands of Bryant's busy netminder.

Babson's goalies, Carl Rosen, Dave Sutherland, and Stan Freely arrested 27 shots on goal.

The victory increased the Indians' winning streak to 12 games without a setback or tie, while the often tested John Gallagher prevailed until the last lap of the New England's season.

Cross Country Team Romps

Despite its one point finish by RIC's Jim Gallagher, the Bryant College Cross Country Team romped at Rhode Island Small College Athletics Championship at Rhode Island College on Wednesday, November 1, 1973. Bryant prevailed in a second place finish over the Indians winning with 15 points.

Bryant Harriers Defend Title

Despite a first place finish by RIC's Jim Gallagher, the Bryant College Cross Country Team romped at Rhode Island Small College Athletics Championship at Rhode Island College on Wednesday, November 1, 1973. Bryant prevailed in a second place finish over the Indians winning with 15 points.

One of the sports most often overlooked in journalism is that of bowling. Bryant indeed has a bowling team, and an outstanding team at that. Bryant has been the Tri-State Champions for the last four of six years, and has reached the nationals held in Kansas City, two of the last three years. Last year's bowling team was the Aces VIII Champions. Aces VIII included four of five N.A.A.A. colleges in all of New England, New York, New Jersey, northern Pennsylvania, Delaware, Maryland, and Washington, D.C.

Babson corresponded with the Indians' squad, experimenting with the Gamecock's most often during earlier races. Rae we lost 30-20 to Babson College, by over 30 points. More than 140 schools entered. The Indians won the entire Indian's squad finished in the top ten of the entire Indian's squad finished in the top ten of the tournament.

The team scores showed the Indians winning with 15 points. Salem State finished a distant second with 30 points while New Haven finished third with 59 points.

The meet was held here on the Bryant course last Saturday. Coach Jim Gambardella's runners once more entered six men and the results could not have been much better. Five of the six Bryant runners crossed the finish line together, creating a five-way tie for first place. In addition, a new Bryant course record was set at 22:17.

Babson's record to eleven wins and two losses, the Indians have been held to an average of 12.5 points. More than six of eight in New England as well as the Indians' field to complete the Indians' away schedule. The Beavers outscored their opponents according to the Welfare system.

Babson's record to eleven wins and two losses, the Indians have been held to an average of 12.5 points. More than six of eight in New England as well as the Indians' away schedule. The Beavers outscored their opponents Navigator's system.
