Phi Delta Theta Arrives

It was announced last week at the National Convention of Phi Delta Theta International Fraternity that Phi Sigma Nu of Bryant College is now an authorized colony. Phi Sig is to be known as the Rhode Island Beta colony and joins five other chapters in the New England area. The announcement came after two years of petitioning to, and work by Dr. Thomas Manton, with the approval of the national committee for a Phi Delta Theta colony. As an advisor to Phi Delta Theta, Mr. Stanley Shuman, Director of the Career Planning and Placement office and to prepare seniors for on-campus interviews is to orient students as to the functions, procedures and services of the Career Planning and Placement office and to prepare seniors for on-campus interviews.

Senior Placement Assemblies Announced

Senior Placement Assemblies will be held in the gym on Wednesday, September 23, at 9:00 a.m. and on Wednesday, September 30, at 10:00 a.m.

These assemblies are being held for Business Administration students who will be graduating in 1971. Assemblies for Teacher Education and Secretarial students will be held at a future date to be announced.

The purpose of these assemblies is to orient students as to the functions, procedures and services of the Career Planning and Placement office and to prepare seniors for on-campus interviews.

Mr. Stanley Shuman, Director of the Career Planning and Placement office will address the assemblies.

Bryant Welcomes New Deans

Dean Anderson Kurtz

Acting upon the recommendation of the search committee for a Dean of Student Life, the President of the College has appointed Anderson Kurtz to that position.

Dean Kurtz earned an A.B. degree in English at Brown University. He is a 1969 graduate of Brown.

During his senior year of college, Dean Kurtz taught Black History at the Commonwealth School in Boston. This past year he was the executive director of the Afro Arts Center, Inc., in Providence.

In addition to the positions he has held, Dean Kurtz has been active in local community service organizations including the Urban Coalition, the Urban Education Center, and the Providence Corporation. He has also participated in the National Urban League Conference.

Miss Rita McPhee of Brockton, Massachusetts, has recently been appointed to the position of Dean of Women. She is also an instructor of English. Before coming to Bryant, Dean McPhee was the Dean of Students at Mt. St. Scholastica College, where she

Editorial Comment

In the May 8, 1970 issue of the ARCHWAY, it was announced that the Archway had withdrawn from the Student Senate. One of the main points of that article stressed that independence from external organizations and obligations was necessary for us to meet our goal of improved journalism. The Editorial Board of this paper has reached another decision which we feel is necessary to improve the quality of the paper.

Many Greeks, on an individual basis, have criticized the “Greek Columns,” the Associated Collegiate Press rates the various college newspapers. In the last rating of the ARCHWAY, the paper was criticized for “overdevelopment of any one source.” That source was the “Greek Columns.”

Based upon this criticism and a feeling that the “Greek Columns” per say, have little journalistic value, the Editorial Board has voted to discontinue scheduled “Greek Columns.” However, this does not mean that articles about Greek Organizations will be banned from the paper. We will welcome news stories of interest to the student body. For example, community projects such as when police cars were washed, beneficial activities such as the used book sale, and, of course, major social activities such as the various “weekends” are of interest to the student body.

This policy is being adopted not to antagonize anyone but to improve the quality of the paper and present stories of interest to the entire student body.

FRANKLY SPEAKING.............by Phil Frank

HAPPENED TO YOU DURING THE SUMMER, KILLER?

President Remarks

Let me begin with a story.

One day, two cows were standing by the pasture fence. One cow was saying to the other: “It’s been a long time since we’ve seen each other. How are you?”

The other cow replied: “Well, I’ve been doing fairly well. I’ve had a baby cow, and I’ve been able to sell the milk to the dairy.”

The first cow asked, “What do you do with the baby cow?”

The second cow replied, “Oh, I just keep it. It’s a joy to have around.”

The first cow said, “Well, I’ll have to think about that. I’ve been thinking about getting a baby cow too.”

The second cow asked, “Why do you want a baby cow?”

The first cow replied, “Well, I’ve heard that having a baby cow can be very rewarding. It’s a way to start a new family tradition.”

The second cow thought about it for a moment and then said, “I think I’ll do it too. It’ll be a way to honor my mother, who always wanted a baby cow.”

The first cow smiled and said, “That’s great! I’ll be sure to let you know how things are going with your baby cow.”

The second cow nodded and said, “Thanks, I’ll keep you posted.”

That’s my story. Thank you.
President's Remarks (Continued from Page 3)

To be conservative in predicting change is dangerous, because the future is so difficult to predict and we all too often underestimate the future. Who, in light of an anticipated rate of change far faster than anything we have experienced in the past, can possibly put any limitations on what we may see in our lifetimes? Sometimes we find ourselves talking about changes that haven't even begun to be experienced.

If we cannot cure all diseases, we must know how to prepare for the fate of the future. For the '70s, perhaps even for the '80s, the medical community must be prepared to deal with the effects of prolonged exposure to toxic agents that may be causative factors of some non-infectious or communicable diseases of childhood. Assume, then, that we cannot find a cure for all diseases, simply because we are not able to diagnose the cause of the disease.

Inadequate medical science has successfully conquered most of the communicable diseases of childhood. Assume, then, that we cannot find a cure for all diseases, simply because we are not able to diagnose the cause of the disease. How will we cope with the inevitable increase in chronic illness? Will we be able to provide for the care of chronic illness? How will we cope with the inevitable increase in chronic illness? Will we be able to provide for the care of chronic illness?

We pay in jammed freeways, highway slaughter, squalor and decay, in unproductive use of a very large and substantial portion of our的时间 to house, to work. We pay in jammed freeways, highway slaughter, squalor and decay, in unproductive use of a very large and substantial portion of our time to house, to work.

The distance period of industrial or urban progress would be the next thirty years. We are already almost a century into the 20th Century. Our past and our future must be accounted for in any discussion of the creation of our world has ever been.

We pay in jammed freeways, highway slaughter, squalor and decay, in unproductive use of a very large and substantial portion of our time to house, to work. We pay in jammed freeways, highway slaughter, squalor and decay, in unproductive use of a very large and substantial portion of our time to house, to work.

113 billion years from what is needed for the history of all life, but a very small fraction of that 113 billion years, about 0.04 percent.

time — the billions of years from what is needed for the history of all life, but a very small fraction of that 113 billion years, about 0.04 percent.

That the retired is the area — the billions of years from what is needed for the history of all life, but a very small fraction of that 113 billion years, about 0.04 percent.

To learn during sleep? Or can we eliminate sleep completely? How far away are artificial lungs, controls of aging, and death only by accident? Until several decades have passed, no one can predict the future. What can we say in our lifetimes?

“Accountability Tag For ‘70’s”

Houston, Texas — G.P. If we want to “know your enemy” for the ‘70’s, “accountability” will be the key. Will we know what we are doing? In his recent address to the College of Arts and Sciences at the University of Houston.

The public holds us accountable for our positive changes that take place in our students after four years with us,“ he said. He called for the Curriculum Committee to consider a new track to education — one that would combine “the ecologies of our decade.”

In discussing the new mode of education, a flexible degree plan allowing a student to compile his own course of study interdepartmentally, Dr. Neumann cited the University of Michigan’s Bachelor of General Studies as an example.

The degree track, as Dr. Neumann explained it, would be the model for undergraduate study at any school. It would be the model for undergraduate study at any school.

How will we cope with the inevitable increase in chronic illness? Will we be able to provide for the care of chronic illness? How will we cope with the inevitable increase in chronic illness? Will we be able to provide for the care of chronic illness?

Bryant Cinema Schedule

September

16  The Fixer
23  Point Blank
30  Valley of the Dolls

October

7  The Odd Couple
14  Grand Prix
21  Two for the Road
28  Doctor, You've Got to be Kidding

November

4  The Boston Strangler
18  The Sand Pebbles

December

2  The Biggest Bundle of Them All
9  Where Were You When the Lights Went Out?
16  Three for the Show

All films are held Wednesday evenings at 7:30 p.m. in the Gym. All movies are in CinemaScope and Color.
Dining Service Appoints Two

Alfred A. San Souci has been appointed Director of Dining Services at Bryant College in Providence, Rhode Island.

A graduate of the Col- linary Institute of America in New Haven, Connecticut, Mr. San Souci has held positions with many leading restaurants in Southern New England. He first came to Bryant in 1968 and has since held the positions of Manager and Food Service Director at the College.

A native of Woonsocket, Mr. San Souci is married to the former Madeleine C. Kurowski of Central Falls, Rhode Island, and have a daughter, Joy Lynn.

Mr. San Souci is the son of Mr. and Mrs. Alam L. San Souci, of Great Road, North Smithfield.

And Peter W. Babbitt, of North Attleboro, has been appointed Dining Hall Manager and Assistant to the Director of Dining Services at Bryant.

Mr. Babbitt, who is a graduate of the University of Rhode Island (B.S. degre e in Business Administration in 1968), was a Marketing Representative for the Armstrong Cork Company before coming to Bryant College.

He is married to the former Lynn Marie Mulolland. The Babbitts reside at 95 Cumberland Avenue in North Attleboro, Massachusetts. They have two children, Gerylly and Heather.

Krishman’s Critique

Screw Driver or All Fed Up

Last year, the Bryant College student body voted to presumably hold optional finals. This proposal was devised by the student senate and was later approved by the school’s administration and (so it was believed) by the faculty. The vote by the latter came about after much “heated” (cool heads?) discussion. This, however, is a new school year. It takes ten (count them ten) faculty members to call for a revolt on an issue previously voted upon. Who are these ten, one might wonder, but finding this out is another story. This time, the results proved different — radically. If the faculty will permit my usage of this term in relation to them.

It might seem almost folklore, the legends of the learned men with their wicker sticks and 3r’s — not so. What once was, no longer is — right? Perhaps it is the strength of the faculty which allows it to “joy” with the student body so. Perhaps, the faculty feels its strength can cripple students — or at least stymie them temporarily — formally. This, however, is another ent to the previous exams? No. Who are these ten (count them ten) faculty alloted 4 examinations during the semester could be not, if he so desired, incorporate into the last of those exams a final test equivalent to the previous exams? The importance of knowing of why a -2, how the GNP is mastered, sundry accounts, and all other such formulas is obvious to exist in modern society. Obvious to learn, but to memorize is to process — and we all know that’s what they do to cheeze.

Do not allow the Fed. to toy with you. In class, ask the instructor what the final policy will be. Ask him in class so that he will be forced to confront you the student — get him to take a stand, and hold him to it. Do not allow him to beat around the bush — if he attempts to, pressure him. We already have our own partial rape — don’t get the scrawns again.

The Student Senate is Accepting the Following Applications for the Following Committees:

Athletic Committee — advises Athletic Director
Faculty Evaluation Committee — evaluates faculty
Financial Aid — assists Financial Aid Director
Library — assists Librarian
Lecture Committee — plans lectures with faculty
Calendar — assists in planning academic calendar
Curriculum — revises curriculum with faculty

Please fill out the application and leave in Senate mailbox no later than September 25.

Insights
by Alan Kramer

It is time once again to assert ourselves to view the actions of the Nixon Administration. While it appears that Mr. Nixon did comply with the schedule of withdrawals from Cambodia, he has not. At this very moment American planes are flying missions throughout the Cambodia countryside under the guise of 'search and destroy.' Any impact of our intervention in Cambodia, one must look deeper than the loss and further than the squelching of Communism.

Richard Nixon became the first President in the history of the United States to deliberately order American forces to invade another nation on his own, without seeking the approval of Congress. This order was given in disregard of the Constitution, the tempering structures of our history, and the principles of American Democracy.

The states... only Congress shall have the power... and that President Nixon should be forced to take a final at the instructor's discretion.

President Eisenhower sought and received Congressional Resolutions authorizing his actions. On the other hand President Nixon has taken the great step and evaded the spirit of the Constitutional division of powers. He has decided that he alone has the basic power and discretion necessary no matter what Congress wants or what the people think. The war in Cambodia was not an emergency.

To deny division, as Hamilton put it, would be to assert the issue of party responsibility. This party responsibility helps unite the President with the several states through the electoral college. Mr. Humphrey received all his electoral votes from the states, Mr. Nixon had. Under the direct election system he would have been elected President. If this were the case, one section of the country would have elected the President. Clearly, the other regions of the country would have had no say in the election of the President. In order to put individual vote counts in determining how a given state will vote. The state has the same length and date of vacation every year. And a plurality to win, it would make no difference how many electoral (electoral) vote is then reflected in the regional vote. What has apparently been over looked by almost everyone is that the direct election method has as many major drawbacks as our present system.

It is not a technical legal question. In part it transcends the question of whether or not Mr. Nixon is violating the Constitution. If the President, in effect, has said, "I and alone have decided to go to war in Cambodia." Where does he get that power? All of this, of course, has nothing to do with the Constitution, because he asserts it and his armies will follow. In a world where conflicts are interrelated, there is no limit to the possibility of a war that can invade Laos and Thailand where Communists are active. He can start a war which would also be a war on China, which is both a sanctuary and a source of supply for the North Vietnamese. Nor is the Soviet Union exempt since it too has been active in Vietnam. The country of authority is not among the prerogatives of a democratic leader in a republic of divided power.

The role of political parties would also be affected if we were to change to a direct election system. Our political parties are organized on the state level. As it now stands, the President of the United States has a degree of party responsibility. This party responsibility helps unite the President with the several states through the electoral college. Mr. Humphrey won those states by an overwhelming majority. This majority, when included in the national picture, made his popular vote total close to Nixon's. However, this was so only because of the dense population of the Northeast. If Humphrey's majority in the Northeast had been greater, he could probably have caused the electoral votes of Nixon had. Under the direct election system he would then have been elected President. If this were the case, one section of the country would have elected the President. Clearly, the other regions of the country would have had no say in the election of the president. In order to give the individual vote counts in determining how a given state will vote. The state has the same length and date of vacation every year. And a plurality to win, it would make no difference how many electoral (electoral) vote is then reflected in the regional vote. What has apparently been overlooked by almost everyone is that the direct election method has as many major drawbacks as our present system.

What has apparently been overlooked by almost everyone is that the direct election method has as many major drawbacks as our present system.

PREVIOUS ATTEMPT TO REFORM

In the early 1950's a bill was introduced in Congress to amend the constitution. It dealt with reform of the electoral college. The main provision of the bill called for the dividing of electoral votes in proportion with the popular vote in each state. While this proposition may have seemed to be a fair idea it was not. It would have divided the popular votes into 40%, 47%, 11%, and 2% and would lead to great difficulties.

In order to retain the advantage of individual and regional importance and in order to eliminate the possibility of a Constitutional crisis, the most logical reform of the Electoral College can be made by one simple change in the current system. The constitution now requires that a candidate for president shall be the majority of the electoral college. If his provision was changed to require only a plurality to win, it would make no difference how many electoral votes the popular candidate received. This provision changed to require only a plurality to win, it would make no difference how many electoral votes the popular candidate received. This provision was changed to require only a plurality to win, it would make no difference how many electoral votes the popular candidate received.
New Campus Progresses

Construction is underway on most phases of the new Bryant Campus. Above foundation work continues on the understructure. Complete story and progress report next week.

Presidential Remarks

(Continued from Page 5)

lungs cancer. We pay in synthetic, bland, canned, frozen, dehydrated, premixed foods. We pay in a flood of equally synthetic television and radio programs, magazines and paperbacked geared to the lowest intellectual level. We pay in distorted and confused mass education, stirring the excelle nt, the dissenter, the practitioner, and emphasizing academic performance rather than learning and understanding. We pay in empty and destructive education.

We submit willingly to outrageous intrusions on our personal liberties. Our children are taught to be polite, courteous, and helpful to little old ladies in wheelchairs. We are taught that making a loud racket at a lecture is bad manners, and all this has to be done in the name of love and good will among men.

We have found that cancer among middle-aged people is so rampant that our physicians are caught up in a clinical research effort to find a cure. We have discovered that cancer of the brain is so extensive that it demands surgical intervention. We have been forced to face a staggering task in sorting out the truth from fancy and in clarifying the complex issues, the amorphous problems that have to do with what has been happening in the world. We cannot stop the advance, and we can do nothing but try to make intelligent policies and decisions that will limit the damage.

Round The Campus

David W. Simpson, of Smithfield, Rhode Island, has been named Chief Accountant at Bryant College, Providence, Rhode Island.

A 1944 graduate of Bryant College, Mr. Simpson holds the degree of Bachelor of Business Administration (B.S. in Administration). From 1944 to 1970 he was employed by the firm of Christiansen and Co., certified public accountants, and is a member of the National Association of Accountants (NAA).

Mr. Simpson is married to the former Carol Polard of Smithfield, R.I. They reside at 177 Log Road, Smithfield, Rhode Island.

Approximately 819 freshmen and transfer students register at Bryant College at the Opening of the Fall Semester.

The beginning of Bryant College's 19th Academic Year is expected to be the last year on the College's Provi- dence campus. In 1971 the college will move to its new 220-acre campus and dormitory open house.

Upperclassmen checked into their dormitories Monday, September 7. Registration for the Fall Semester began Tuesday, September 8, and continued on Wednesday, September 9. Classes began Thursday, September 10, at 8:30 a.m.

Dr. Harry F. Evarts, President of Bryant College, who addressed the students and faculty on Tuesday, September 9, addressed the students and faculty on September 10, at 8:30 a.m.

We have been told that in the human mind there is no way to develop, and improve upon the gift of freedom. We have to wallow in our own dirt, or we can enjoy the sun. The American human is an animal whose citizenship is nature's gift that he can enjoy the sun.

Steam Car

If you agree, it is possible to face the future with less instead of indecency. You have cast your icy eyes forward to the, say, 1980s or 1990s, and the authorities say can't be done. That brings us to the concept of "steam cars." University of Illinois member of the staff of the Automobile Pollution Control Administration. Quality - automobile industry. It is instructive to work with the industry. They have all the expertise, trust me. If we put a brick wall between us and the auto industry we'd be reinventing the wheel. He didn't explain why Calvin or Charles Williams weren't on the advisory committee. He didn't explain how they had managed to build a workable automobile with at least a brick wall between themselves and the auto industry. All he knew was that industry was very "cooperative" and they were pushing for having a clean car prototype by 1974 or 1975. The Williams car is running today. He also revealed that both Ford and GM are en­gaged in the "programs."

NAPE (National Air Pollution Control Administration) is leaning heavily on the auto industry to "do the work". The Supreme Court has ordered the auto industry to produce a clean car prototype by 1975 or 1980. The auto industry would cease further "protest" in the past, but they say any "One with plans can initiate a "crash program to develop a low-emission engine" at the earliest feasible date. The defenders are our friends of consent decree; GM, Ford, Chrysler, American and the AMAs. States filling the suit are California, Oregon, Arizona, Colorado, Hawaii, Iowa, Kansas, Maine, Massachusetts, Minnesota, Missouri, Ohio, Rhode Island, Vermont and Virginia. A trial on this suit whatever the result, would be revealing. A second response to the week of temperature in­eriors came from Wisconsin Senator Gaylord Nelson. He proposed an amendment to the Clean Air Act prohib­iting the sale of internal combustion engines after Jan­uary 1, 1975. The vote on those measures should show the American people whether or not they want particular senators and congressmen really want to stop the killing by air pollution. Meanwhile, in Ambler, Pa., California, and the state of Arizona, vehicles driven in the supermarket in their clean steam car.

-Martha Wright

Conservation News
Sports Editorial
With another school year upon us, we, as students, are looking forward to another dramatic sports transformation in Bryant's history. Our sports program has been reinstated, revamped, and rejuvenated in the last few semesters.

Bryant's varsity teams, long known only for basketball prowess, have distinguished themselves as potential powerhouse in soccer, golf, tennis, and bowling. Our baseball team had its first winning season in history last year.

Basketball is still our number one sport and deserves this distinction. Our tournament playdown game with Rhode Island College last year will long be remembered as one of the most exciting games in Rhode Island basketball annals. Bryant's consistently powerful teams are making more and more area sports fans sit up and take notice.

Bryant is lucky to have Mr. Thomas Pollard as athletic director. A personable and competent coach, as well as administrator, Mr. Pollard, and his assistant, Mr. Bill Stein, are leading Bryant athletics toward excellence in all areas.

What is in our future? Plenty! A new campus with athletic facilities to rival any in Rhode Island. A more expanded intramural program, and an opportunity for Bryant to become a model for other schools. A model of the successful integration of academics and athletics. An integration where both academics and athletics uphold the proud traditions, standards, and reputation of Bryant College.

Cross Country Team Enters Two Races
The Bryant College Cross Country Team is entered in two invitation-only five-mile road races prior to the season opener with Bentley and Lowell Tech on September 26. The first race is in North Attleboro, Mass., Saturday at 11:00 a.m. Last year in the same race, Roy Lapidos won the first place trophy and Bob Armstrong finished a respectable nineteenth among 70 entrants.

The second race is next October 25 at Needham R. I. This year is the first time runners from Bryant will be competing in this race. Both races should provide an excellent tune-up for the Bentley-Lowell Tech meet.

The prospects for this coming season were dealt a severe blow when two former team members, Charlie Gagliemetti and Tom Lees, decided not to compete this fall. Helping to make up for this loss are freshman Bill Taylor, sophomore Frank Palmer, and senior George Peckham.

Phi Delta Theta is an International Fraternity with chapters in Canada and Mexico. It was founded in 1848 at Miami University in Oxford, Ohio, and has a membership of over 124,000. It boasts as alumni such people as Neil Armstrong, Charles Goodell, Van Hefflin, Adlai Stevenson, and Frank Lloyd Wright.

Phi Delta Theta's Beta Chapter officers for this year are Robert Bolton, President; Edward Mullen, Vice President; William Newell, Secretary; and Robert Desimone, Treasurer.

Bryant College Veterans Club organizational meeting, Sept. 23, 2:00 p.m. in L-2 Alumni Hall

All VA's Welcome — Call Jim Merson 943-1383 for more information.

Veterans' News
Veterans at Bryant College are looking forward to receiving month G. I. checks this semester. They were offered several suggestions by the Veterans Administration this week.

(1) Turn in your Certificate of Eligibility to the VA office as soon as possible.

(2) See to it that this enrollment form is returned promptly to the VA.

The law requires that the VA must be notified of the veteran's enrollment early enough, it will not be able to get his G. I. checks before processing is completed. The VA also requires that the veteran should receive the first check in October.

If the VA does not receive this information within sixty days after the first semester if previously enrolled, the veteran must notify the VA of new enrollment and make a new Certificate of Eligibility.

If you change your address, notify the Post Office immediately to VA for a new Certificate of Eligibility.

If you change the address to which your checks are mailed, you must notify the Post Office as well as VA.

The law requires that you reduce your course load, drop out of school, receive your G. I. checks.

If you change your address, notify the Post Office immediately so that supplement payments can be made in records and payment procedure.
