Governor Licht
First Speaker
At Delta Omega

On October 12, 1970, Delta Omega Professional Society will hold its first dinner-speaker meeting of the school year. The society feels honored to have as its guest speaker Frank Licht, Governor of Rhode Island, who will speak on politics in business.

Delta Omega Professional Society is primarily a dinner-speaker type organization for business majors. Membership is open to all students at Bryant.

Tonight marks the return of the old Greek calendar to Bryant. This return will be marked by Delta Sigma Phi’s “Musical Happening” — 1970. The weekend will begin with a dance in the gym featuring the No. 1 group in Rhode Island — Metropolis. Musical Happening Part 2 will be highlighted with a concert by MGM recording stars — The Beacon Street Union.

Both events will begin at 8:00 P.M. and continue until midnight. Tickets are on sale in the union all day today, and will be available at the door. The cost is just $2 dollars for Friday, and $3 dollars for Sat. A combination ticket is available for just $4.00.

With good fall weather upon us, construction on the new campus is proceeding at a remarkable pace. Many of the planned thirteen dorms are readily recognizable in the foreground. Construction of the “uni-structure” is visible in the left background. The light shaded area in the upper right is the sitework already completed on the gymnasium.
From The Editor's Desk

A Matter of Conscience

When I first entered Bryant College in the fall of 1967, I had deep feelings about the war in Vietnam. I felt very strongly that I was not being protected from the danger and was serving in Vietnam. I felt that while others were serving and dying in Vietnam, I was enjoying the good life, safe and sound at home. I felt that I was cheating those men and that I personally should do my part to keep America out of the Vietnam war. I then decided to re-enter the military service once I had graduated from college.

That was three years ago. In terms of the war in Vietnam, three long, painful, horrible years ago. Today I am of another opinion. Throughout the past three years I have discussed and debated the war numerous times. And while I discussed and debated and defended that war I couldn't meet the test as they had in the past; but still subscribe to the Times at

That was three years ago. In terms of the war in Vietnam, three long, painful, horrible years ago. Today I am of another opinion. Throughout the past three years I have discussed and debated the war numerous times. And while I discussed and debated and defended that war I couldn't meet the test as they had in the past; but still subscribe to the Times at

Very slowly I began to see the futility of it all. It became more and more difficult to defend my position while the number of American casualties rose and rose. Over 43,900 men have now been killed since 1961. Last spring during the student strike I took an even closer look at my own convictions. I found that they just couldn't meet the test as they had in the past; but still I couldn't support the strike and I still defended the war in Vietnam. After that I tried to put the war out of my mind because I felt hopeless and frustrated. It was not until this past summer when I viewed a program presented by members of the U. S. Senate who were discussing the war that I finally mustered the guts to admit what I had really known for quite some time. I finally admitted to myself that I could no longer remain silent, the time had come for me to face the truth and to admit to that truth that the war in South-east Asia is a criminally tragic waste of human life.

We as a nation must stop sacrificing the flower of our youth in a hopeless and stupid war. We must no longer be so naive as to believe the cliches. We must stem the tide of Communism. "America's pride is at stake," and "Damn the torpedoes, full speed ahead," CRAP! Vietnam and a dozen countries added to it are not worth the price we have paid.

I do not wish to be misunderstood. I am not supporting or advocating any form of violence by either students or any group. I still am opposed to student strikes because I do not feel that they are effective in bringing the war to a speedier end.

Once I used to shout, "I am proud to be an American." Now I say it in a whisper. I now say it is un-American to support the war because the war has done more to fragment the United States than any other factor. The war has drained us economically, physically, and spiritually. Reel should be given to the words of Presi-dent Lincoln who said, "A house divided cannot stand."

Letter:

Once again The New York Times will be made available on the Bryant College campus via the Bookstore.

The on-campus subscription will be limited to 500 at $1.25 per copy. The subscription will begin on September 28 and the subscription will run on a five-day-a-week basis through December 9th with the exception of the holidays (November 25-27).

Although the Times will be required reading in some of the Social Science courses, any member of the stu-dent body or of the faculty and administration may take advantage of this group subscription. The procedure will be to subscribe to the Times at a reduced rate of $1.25 per subscription for subscribing to the paper will be Thursday, Sept-245.

Senate Ratifies
Finals Proposal

At a crowded meeting held Wednesday, September 29, the Senate voted to ratify the final exam proposal submitted by the Senate committee. Under this proposal, the faculty member would have the final right to decide on the issue of finals. All classes would end on December 16, and a final exam period would run from December 17 through 23. No classes would be held during this exam period, but the faculty member could ask students to attend additional assignments in place of a final exam. Classes would resume on January 25.

The other major issue brought before the Senate body was that of the Senate re-organization. The Hill presented a basic explana-tion of the proposal. Under this plan, the Senate would be composed of two bodies: a legislative body of 24 freely elected students and an executive council consisting of the four of-ficers elected from the student body entirely, and a Spe-aker of the Senate. It is expected that the Re-structuring Committee will make further details available in future Senate Meet-ings.

Notice

Students subject to cut regulations and who wish examination cards for the religious holy days, October 1 and 2 and travel time on September 30, may fill request cards in the Dean's Office, Room 1D of South Hall.

Federal Narcs Use Dangerous Pesticide On Marijuana Crop

By Floyd Norris

College Press Service

WASHINGTON — (CIPS) — The next load of mari-jana from the midwest will contain the pesticide 2, 4-D, which a government com-mission recommended be used to prevent risk of human exposure and to prevent risk of birth defects. Under a joint effort of the Bureau of Narcotics and Dangerous Drugs and the Extension Service of the Agricultural Service, farmers throughout the midwest are being urged by County Agents to spray the pesticide 2, 4-D on wild marijuana crops. A major effort is underway in 20 counties in 10 midwestern states, but the program is nationwide, according to George H. Gaffney, Special Assistant to the Director of the RNDD and project of-ficer for the attempt to de-stroy marijuana.

There has been no re-search on the effects of 2, 4-D, but there has been research on the effect of 2, 4-D when smoked, and that research has been done by the Mrak Commission. Mrak Commission, which reported to RNDD director Robert Finch last Decem-ber, to recommend that "the use of certain registered pesticides to which humans are exposed and which are found to be ter-tagenic (cause birth defects) by suitable test pro-cedures, should be immediately restricted to prevent risk of human exposure. Such pesticides in current use include..." the butyl, isopropyl, and isobuty esters of 2, 4-D. Current research on the effects of 2, 4-D on kids, that at least one research by the Bioccides Research Laboratory, which found significant relationships between birth defects and ingestion of 2, 4-D esters of 2, 4-D by female mice, hamsters, and chicks. The Commission recommended further re-search on the other three esters of the pesticide.

The ester of 2, 4-D de-pends on the substance is immersed in for spraying. The test results indi-cate that which ester is used may make a difference in possible dangers from the pesticide, but the camp-aign being run by the fed-eral government does not mention the possible haz-ards of various esters.

It is possible that 2, 4-D may be produced in danger-ous when smoked, accord-ing to Dr. Joseph McLaughlin. Dr. McLaughlin, a researcher for the Food and Drug Administra-tion, recently presented the Mrak Commission's Ad-visory Panel on Teratology its report on the effects of 2, 4-D didn't break down from the heat, and I don't think she would," he says, "but I would go directly to your bloodstream from here, and I don't think it would." Therefore, direct exposure would be impossible. McLaughlin thinks more, 2, 4-D will probably get into the bloodstream, thus increasing the danger of birth de-fects.

Unlike DDT, 2, 4-D does not build up in the body and leaves within a few hours. But this is a lower discount, which may be a factor in the use of it. Furthermore, pregnant women or women who will become pregnant within a couple of weeks should not smoke or use the pesticide. The Commission recommends that smoking and the use of the pesticide be avoided. The results of the Federal Drug Administration study of the effects of 2, 4-D on humans are currently being analyzed.
Children: The Innocent Canaries of Our Streets

Dr. Frederic Gerard Burke, Professor of Pediatrics at Georgetown University Medical Center, began his fight for clean air in 1963. This was the story of the submarine Nautilus — the story of the submarine Nautilus — gave him the impetus to begin his fight for clean air.

Of particular interest was the Nautilus project (now a Tennessee Congressman) on the effects of air pollution on the submarine Nautilus, which began its voyage some 10-15 days after leaving the port of Seattle. Many of the men who had previously suffered from colds, coughs, or respiratory disorders reported "they never felt better in their lives." Perhaps the submarine's controlled environment was the key to studies which could document the statistics so essential in exposing air pollution's effect on pulmonary health.

The idea became reality through a three-year $340,000 grant from the U.S. Public Health Service National Air Pollution Control Administration. Dr. Burke's research and development began in February of 1969 as the Environmental Control Center at the Hospital for Sick Children in Washington, D.C. (Dr. Burke is Co-Principal Investigator of Research.

The submarine unit can only duplicate virtually all the physical environmental features of any part of the country through control of barometric pressure, temperature and humidity. Control of barometric pressure and temperature is essential in documenting air pollution effects. The idea became reality through a three-year $340,000 grant from the U.S. Public Health Service National Air Pollution Control Administration. Dr. Burke's research and development began in February of 1969 as the Environmental Control Center at the Hospital for Sick Children in Washington, D.C. (Dr. Burke is Co-Principal Investigator of Research.

lea Burke, have already expressed interest in the submarine principle, which they feel may someday have to be incorporated into business offices.

Dr. Burke's extracurricular activities include his work with the Environmental Protection Agency, and his role as the Environmental Control Center of the Public Health Service (the CRCP has been conducted by the Environmental Control Center of the Public Health Service.)

Now in its final year, this contract has created the Georgetown Environmental Research Center in Washington, D.C. (Dr. Burke is Project Director) involving four area hospitals in development of a computer program monitoring pulmonary profiles on some 10,000 children in the area.

Since the CRCP is now defunct, an application for renewal has been made. The Georgetown Environmental Research Center has been submitted to the Regional Medical

Letters to the Editor:

Coach Scorns Sports Editorial

Dear Sir:

I feel obliged to comment on the September 18 Sports Editorial by Mr. Robert Criscuolo, The Archway Sports Editor. In what purports to be commentary on the Bryant Varsity Athletic programs, he mentions the recent success of the basketball and track teams as "potential powerhouse in soccer, golf, tennis and bowling." Accordingly, Mr. Criscuolo is in error in the absence of the Bryant Cross Country or Track and Field teams, despite the fact that news stories about the Cross Country team, which I submitted, have appeared in each issue of the Archway since he became Sports Editor.

Last season's Track and Field team placed second in the New England N.A.I.A. Meet at Bryant and in looking back upon my three years at a later date.

Sincerely yours,

Frederick W. Reinhart
Coach, Cross Country and Track and Field

Another Hat in the Ring

I would like to announce my candidacy for the office of President of the Sophomore Class. Due to the fact that I did not complete a petition last spring because I did not make up my mind to run for the office until this past summer.

This summer, in looking back at the New England N.A.I.A. Meet at Bryant and in looking toward the future, I decided that I must do my best to help this entire Bryant Varsity Athletic Program.

Sincerely yours,

William S. Holden

Class Elections: September 30

Class elections for the sophomore, junior, and senior classes will be held on September 30. Freshman class officers will be elected at a later date.

The offices of President, Vice-President, Treasurer, and Secretary will be up for election in each class.

Voting will take place in front of the union between the hours of 9:00 a.m. and 3:30 p.m. All voting will be done by means of computer cards, which will, naturally, be tabulated by the computer.

Those students who completed petitions last year will have their name appear on the ballot. Any students who wish to vote for write-in candidates should do so by taking a blank computer card and writing the name of the candidate of their choice on this card.

NOMINATION PAPERS FOR FRESHMAN CLASS ELECTIONS AVAILABLE IN SENATE OR ACTIVITIES OFFICE SEPTEMBER 28 - OCTOBER 2

Information Please

Dr. F. Douglas Hammond has released the names of all students who have not completed the "Student Information Sheet" which students were sent to them during the summer so that the registration will close by October 20.

The information on this card will be used in compiling the 1970-1971 Student Directory. Typical of the information on this card is the student's and local address, telephone number, his major, and his classification number. All students who want to be listed in the Student Directory must hand in the information card by the deadline.

In addition: with the information card, another card, which demonstrates to the Department of Health, Education, and Welfare that Bryant complies with the 1964 Civil Rights Act may be completed. The completion of this card is voluntary, and students who choose to identify themselves by name when completing this card.

Your support and votes are respectfully requested.

William S. Holden

Campus Radicals Likely To Have Drug Experience

San Francisco, Calif. — (L.P.) — Student campus radicals — the New Left — are the most likely to have illicit-exotic drug experience, reports Psychologist Richard H. Blum in his new two-volume study, "Students and Drugs." (Jossey-Bass Inc., San Francisco).

"From 1962 until today," he writes, "the most visibly fervent groups on campus have been the New Left. The student radicals whose protests, sit-ins and other forms of political activity have stirred so much interest. Those in the left wing are shown in our survey data to be the most likely students with illicit-exotic drug experience."

And the farther to the left, the more intensive their drug use. Dr. Blum finds there are some exceptions, he notes, Marxists, for example, are strongly opposed to illicit drug use.

Either way, in any student drug-interesting of the BUILDING COMMITTEE REORGANIZED

Dr. Harry Evarts, President of Bryant, has announced reorganizing of the Building Committee to include students. The purpose of this committee will be to (1) Review architects' proposals as to detailed plans and specifications including proposed alternative. (2) Approve invitations to bid. (3) Review of contractor's bids as analyzed by architects. (4) Authorize the President and Treasurer to execute construction contracts. (5) Review contracts and analyze by the architects. (6) Maintain contact with architects during the construction period. (7) Consider and accept other matters as may be associated with the completion of projects by the College. (8) Consider and accept other matters as may be associated with the completion of projects by the College. (9) Consider and accept other matters as may be associated with the completion of projects by the College.

Along with the three students on this committee are three faculty members and members of the administration.

Any student interested in applying for the three openings will have their application notice in the Activities office as soon as possible.

Notice

Any student who did not have an I.D. photo taken this year, can have one taken at the Student Activities Bldg. between the hours of 10-11:15 and 11:45-12:15 Mon. thru Thurs. 10-45-11:45 Fri. thru Tues. 10-10-15, Wed. thru Thurs. 10-45-11:45. Also pick up I.D.'s that have already been taken.

The offices of President, Vice-President, Treasurer, and Secretary will be up for election in each class.

Voting will take place in front of the union between the hours of 9:00 a.m. and 3:30 p.m. All voting will be done by means of computer cards, which will, naturally, be tabulated by the computer.

New Campus
(Continued from Page 1)
teacher education. There will be a large lecture hall for 200 and an auditorium for 500. It also contains faculty offices for 84, dining room for 500, student union building for 400, residence hall for 300, and an outdoor area for 2,000. There will also be a social swimming pool and facilities for radio and closed circuit television. Steel work for the University Center is to be completed by December 1st with the remainder of the work to be finished by September.

The campus also features parking facilities for over 2,000 cars and numerous intramural sports fields. There are also three other buildings—The Tupper House and a barn—which may be used for any number of purposes including social gatherings or educational purposes.

Although most of the planning of the campus is already completed there are still a few minor details to be worked out. Details as simple as the layout of laundry facilities in the dorms or the types of shops or stores desired by the students must be decided by the building committee which has been reorganized by Dr. Everts. Anyone interested in being on this committee should contact the Senate Office. The Archway will continue to keep you informed on the progress of each phase of the new campus with monthly reports.

Stardusts Seek New Members
The Bryant College Stardusts, a dance band, consisting of fifteen musicians, was established last year. Music played by the organization ranges from classics to the latest in rock and jazz-rock. The group plays for such events as Greek Weekends, Parents' Weekend, and local concerts. The band is looking for new musicians. Anyone who enjoys playing an instrument is welcome to join; however, trombone players, saxophone players, and vocalists are especially needed. A pianist with a lot of experience is also desired. For further information, please contact the Stardusts in person or by calling their director, Dan Berardi; (102 classes) in general.

Test Dates Announced for Graduate Record Exams
PRINCETON, N. J. — The Educational Testing Service announces the following five test dates. The Graduate Record Examination may be taken by graduate students, postgraduate students, and others planning to go to graduate school. The exam is taken the first week of each academic year.

The first testing date for GRE is October 24, 1970. Scores from this administration will be reported to the graduate schools before December 1. Students planning to register for the next test date are advised that applications received by ETS after October 6 will incur a $3.00 late registration fee. After October 9, there is no guarantee that applications for the next test date can be processed.

The other five test dates are December 19, 1970, January 16, February 27, April 24 and June 19, 1971. Equivalent late fees and registration deadlines apply to these test dates. Registration deadlines should be determined by the requirements of graduate schools or fellowships to which one is applying. Scores are usually reported to graduate schools five weeks after a test date.

The Graduate Record Examinations include an Attitude Test of general scholastic ability and Advanced Tests measuring achievement in 20 major fields of study. Full details and registration forms for the GRE are contained in the 1970 GRE Information Bulletin. The Bulletin also contains forms and instructions for requesting transcript service on GRE scores already on file with ETS. This booklet may be available on your campus or may be ordered from: Educational Testing Service, Box 954, Princeton, New Jersey 08540; Educational Testing Service, 960 Grove Street, Evanston, Illinois 60201.

The Right Comment
By William S. Holden

Vote At 18?
This October, the Supreme Court will hear a case contesting the constitutionality of the most recent voting rights act, the act which among other things, lowered the voting age throughout the nation to 18.

Since he took office, President Nixon has appointed a new Chief Justice and one Associate Justice to the Supreme Court. He stated that the newly appointed justices had a record of being "strict constructionists." If Chief Justice Burger is in fact a "strict constructionist," he will be compelled to use all his influence to persuade at least four of the Associate Justices to concur with him in finding that the act is unconstitutional.

Article X of the Constitution states, "The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

Powers Granted Congress
Nowhere in the Constitution is Congress granted the power of determining voter qualifications. Notwithstanding, there have been two amendments to the Constitution stating that the right to vote may not be abridged on the grounds of race, color, or sex. Note that these amendments deal not with voter qualifications but with discrimination.

Although most of the planning of the campus is already completed there are still a few minor details to be worked out. Details as simple as the layout of laundry facilities in the dorms or the types of shops or stores desired by the students must be decided by the building committee which has been reorganized by Dr. Everts. Anyone interested in being on this committee should contact the Senate Office. The Archway will continue to keep you informed on the progress of each phase of the new campus with monthly reports.

Round The Campus
Dr. Everts and Reuben Abraham will attend the President-to-President Conference (Second Annual) to be held in Washington, D. C., Sept. 25-27 at the Willard Hotel. This assembly is brought together by the Association of Student Governments. It is for Presidents of Colleges and Universities and Presidents of Student Governments.

EVENING CLASSES AT BRYANT COLLEGE BEGIN MONDAY, SEPTEMBER 14.

Seventy-seven courses (10 classes) in general education and career subjects are offered this Fall. By special request, Saturday afternoon classes in Data Processing, Mathematics, Psychology, Modern World and Principles of Sociology are being presented this semester. Approximately 1,800 students are enrolled for evening study, according to Ralph C. Dunn, Director of the Evening Division.
Narcotics Use Pesticide

(Continued from Page 2)

The U.S. Senate Subcommittee on Energy, Natural Resources, and the Environment, headed by Senator Philip Hart (D-Mich) recently held hearings on 2, 4-D. Mr. Hart, Counsel for the Subcommittee, says that testimony developed at the hearings convinces him that "it seems unreasonable to sanction the use of 2, 4-D for any purpose."

When sprayed on Marijuana, the 2, 4-D will cause the dope to turn brown and shrivel, probably within four days to a week. This means it would be entirely possible that the marijuana could be picked and smoked after spraying but before the effects showed.

Since marijuana is generally purchased in small bags in crushed form, it is possible that the purchaser would not be able to tell if the dope had been sprayed even after it had browned.

Once sprayed, the pesticide will stay in the plant for a matter of weeks and in the ground around the plant for several years before gerrminating.

Despite the fact that the Food and Drug Administration is currently conducting further tests on the safety of 2, 4-D, Gaffney was not aware of any problems when he was asked if there were any health dangers in using 2, 4-D. He suggested the Department of Agriculture might know more.

Dr. Fred Shirley of the Department of Agriculture stated that the doses used in the research were "ridiculously high" and that humans therefore have nothing to fear from the relatively small amounts that might be contained in a marijuana plant.

This theory was dismissed by Bickwit, who noted that the dosages have to be relatively small because of the relatively small numbers of animals tested. "If it caus-

Pro Football Forecast
By Steve Diamond

If you had happened to look at the pro football standings this past week, you were probably a little confused. The American Football League has merged with the National Football League to form a new National Football League. The NFL is then divided into an American Conference and a National Conference. Each conference is divided into an East, Central, and West. The breakdown of the teams are as follows:

Analyzing each separate division, I feel the American Conference West is the strongest division. That is the only pure AFL division under the new setup. Kansas City is my choice to repeat as champion, with Oakland the major contention. Cleveland appears to have the class of the central division, Houston would be tough with Wall Lenm in full control as coach, and Charlie Johnson quarterbacking. In the East, Buffalo and Boston will be the scamps. The Colts and the Jets are the solid teams. If the real Joe Willie Namath gets going, the Jets will have the edge. Bob Grise, a highly rated quarterback, will have the task of pulling the Dolphin's together if they are to upset anyone.

In the National Conference East the New York Giants have their work cut out. The East is the weakest division in the National Conference and if the Giants are beaten out by Tom Landry's Cowboys, they can still qualify for best runnerup and make the playoffs.

The Detroit Lions have the offense and the defense to edge Minnesota in a tough two team race. With talent executive such as Mel Farr, Errol Mann, and Len Barney, the Lion's should overcome the power packed defense of the Vikings.

The Los Angeles Rams, led by Roman Gabriel, are going to find the competition a little bit tougher with creases in respiratory ail.

Road Runners Take Road Race Awards

Competing in two A.A.U. sanctioned invitational road races this past week, members of the Bryant College Cross Country Team captured a trophy and three top three finishes.

Last Saturday, Roy Lapidos took a sixth place medal in the 5.1 mile North Attleboro race with a time of 26:15. He was followed by Bob Armstrong, twenty-ninth in 29:12; Bill Taylor, thirty-fourth in 29:39; and Irving Segnel, sixty-third in 30:13.

On Tuesday evening at the Central Falls Silver Jubilee 4.9 mile race Bryant really brought home the gold when Roy took the fourth place trophy with a time of 25:32. Bob took the tenth place medal in 28:11 and Bill, the twenty-sixth place medal in 30:40.

After these successes, the Bryant Team is looking forward optimistically to the opening of its regular season tomorrow with a triangular meet at Lowell Tech with Bentley. Completing the team roster for this meet are Don Macaulay, Charlie Haeckel, and Frank Palmer.

Canaries of the Streets

Health Program. If accepted, the program would improve pulmonary disease training available to area students, physicians, and nurses. It would also expand the pediatric pulmonary center concept to four additional hospitals, creating a regionalized computer network in their emergency departments. Although there would correlate increases in respiratory ailments with a rising air pollution index on specific days in the D.C. area, and the suffering of Washington's canaries” would not go unnoticed or unrecorded. Eventually the program would involve more hospitals and monitor approximately 95 percent of the area's children.

Dr. Burke is confident that statistics from his efforts will support what he feels to be a daily-occurring tragedy in the lives of our asthmatically-afflicted children. "The pulmonary reserve in these children,” he says, "is an additional functional capacity of their lungs that is available for meeting stress and disease development.”

Though the canaries of the street can be temporarily treated for suffering, Dr. Burke feels air pollution is constantly robbing the rich pulmonary reserve of these children. "They can get along,” he says, "but when they reach young adult life after their reserve has been depleted and they confront a crisis from infection of a foreign body, they may well have had it. The injustice has not complete the oxygen exchange and death may ensue.”

Dr. Burke is not a fool, nor does he stand alone in his deep-felt conviction about air pollution. He needed statistical proof, so he went about furnishing it. He needed machinery to produce the statistics, so he went about furnishing that, too. Others are doing the same.

Consider the recent statistics compiled by two Pittsburgh economists, Dr. Lester B. Lave and Eugene Lapidus, on the Carnegie Mellon School of Industrial Administration. Their study indicated that if air pollution were cut by 50 percent in major cities:

- a newborn baby would have an additional 3-5 years life expectancy,
- deaths from lung cancer and in fact all lung disease would be cut by 25 percent,
- death and disease from heart and blood vessel disorders might be cut by 10-15 percent,
- all disease and death would be cut by 5-10 percent yearly, and the annual saving to the nation would be at least $52 billion.

"If we can put it more simply,” said Lave in an interview with The Washington Post, "For the average middle-class American family living in an urban area, shattering air pollution is the single most important thing we could do to improve health.

“If we could reduce air pollution by 50 percent, it would save money, as much in money and life as if we went around and complete a cure for cancer.”

- Richard Wentz

The lack of atmosphere on the moon may make objects on its surface appear closer than they really are, astrophysicist Lawrence Schmieder states in the June SCIENCE DIGEST. On earth, we are used to seeing things through an atmosphere that makes them look farther away. Dr. Schmieder maintains that correc their vision by using the texture of objects as a cue.

Bowler's Corner

By Steve Monaco

Once again another great bowling season is underway at Bryant College. However, the location has changed from Cranes Bowl to LANG'S BOWLING, A.M.A. in Cranston. The league is going to be run as usual. It will be a four man team with 60% handicap. More trophies will be awarded than last year. This year trophies will be awarded to 1st and 2nd place teams for both individual and team championships. Added trophies will go for high game, high series, and high average.

So far 18 teams have registered in the league, however, more teams are urged to join. The league will be run for ten weeks, at which time the season ends. The league will resume with a fresh start at the beginning of the following season. The deadline for new teams is Tuesday, September 29th, so if you want to be in the league, join now. See Steve Monaco, Steve Diamond, or Don Dunn at Gardner Hall for details.

See you at the lanes!
