Bryant Students Join Dump Nixon Rally

Among the 20,000 people attending the Dump Nixon Rally held at the State House last Sunday, were 400 Bryant Students. The Bryant group, organized under the direction of the National and State Legislation Committee of the Senate, marched from South Hall to the capital in mass. Included in the group were some S. O. Marshalls who helped to direct and control the large crowd of people gathered at the state house. The 400 Bryant students marked the largest single organized group at the rally. They were also the only group in the state to march on the capital as a body. The fifty marshalls were also the largest number from any school in Rhode Island to work on the rally.

Ecology Report:

Minimizing Enviroment Abuse

Because the ecosystem is such a complex and delicate mechanism, it is impossible for an expanding and consumption-oriented society to function within its environment and not disrupt the ecosystem; however, it is still possible and practical for mankind to minimize disruption and abuse in the ecosystem.

But minimizing environmental abuse will not be achieved merely by presenting a film that illustrates the relationship between man and his environment, for relationships in themselves do not reflect the ecological problems confronting man and his society. And solutions to these problems will not become realities until society begins to think in terms of ecological consequence and its pervasive influence upon the quality of life.

Ecological education should be individual-oriented. Each citizen must be shown that all change begins with man and that corrective changes can only be achieved through the cooperation of the individual, for in the final analysis it is he who determines the quality of nature and her capacity to support life in the ecosystem.
Cuba Needs You!

There is an opening for one student on the Bryant University to the National Model United Nations in New York. This year Bryant will assume the role and policies of Cuba as represented in the actual United Nations. The Bryant delegation has approximately 2,000 students and 120 colleges in attendance and the session promises to be challenging and enjoyable.

The date of the Model United Nations is from April 26 to May 2. The expenses of the trip, hotel, fees, and a portion of the meal are paid by the school. Anyone interested, please contact Jim Moriaty, Tel. 572-2628 after 6 p.m.

Conference on Teacher's Rights

Robert Marchand, who was fired from North Smithfield High School, will speak on teacher's rights at the State Student National Education Association (SNEA) conference on April 25.

The conference will start at 1:30 and will be attended by SNEA members who will be willing to rap with you. The benefits of being a teacher and the sessions promises to be challenging and enjoyable.

White House Big Brother Watching You

WASHINGTON, D.C. (CPS)

A look at the switch at the capital's Mayor's Command Center can put electronic console operator in contact with the President, with the North American Air Defense Command in Colorado, with the Pentagon, or with the National Guard command.

An elaborate seven-room communications hub on the fifth floor of Washington’s Municipal Center has begun to coordinate around-the-clock surveillance and information on the three weeks of war protests that began here this week.

The “crisis management” Command Center will work with the Big Brothers in the White House and the Pentagon to “defuse a crisis should one develop,” according to a spokesman.

Aside from its monitoring duties with television cameras, telephones and police radios, the beefed-up 30-man staff prepares a 20-page “President’s Weekly Summary” for D.C.’s appointed mayor Walter E. Washington several times a week.

The Right Comment

By William S. Holden

Social Security Fraud

Six and one-half years ago Barry Goldwater, when running for President, advocated the abolition of the Social Security program. This immediately alienated a large segment of the voting population, people near or over retirement age.

Since 1961 Mr. Goldwater's proposal has gained in popularity. The Washington Post has written an editorial stating that the Social Security program is neither an insurance nor a welfare program but a mixture of both which discriminates against young people in favor of the old, against married women who work, and against the working poor. If the Social Security program continues to operate as it does now, there will be sharp increases in the regressive payroll tax and even greater discrimination against the young and the poor.

In theory, the program sets aside the payments made by a worker for the time the worker retires. In reality, it has become an income transfer plan. It transfers income from the employed to the retired. No fund is being established for the worker paying his tax. The money received from today's worker is being spent today for today's retiree. Married women are not eligible for the same benefits as are men, even though they pay the same amount of tax per dollar earned. The tax discriminates against the poor because it takes 8.5% of Income up to $7,908, 5.2% of an income of $13,200 and only 2.6% of an income of $26,600. Clearly, this puts the main burden of caring for retirees on the shoulders of people with lower incomes.

The Young Americans for Freedom has conducted a study on Social Security. The following argument is theirs. A 25-year-old worker earning $7,000 or more this year will have paid the Federal Government $107,079 in Social Security taxes and accrued interest by the time he is 65. The most he can get back, under present law, is $3,076 a year.

But suppose this same worker invested the same taxes paid by himself and his company to the Social Security system, for example, in a rental security? The investment would be worth $3,351 a year, or $416 a month in interest alone. Much more than what the Social Security system offers, and he would also have the entire principal of $107,079 left to spend. Under Social Security there is no principal.

Suppose you could invest your total Social Security payroll tax in a mutual fund, as a retirement plan. Well, if you had been able to invest only $500 a year in the Investment Company of America for instance, over a 33-year period, instead of 43 years, you would now have fund shares valued at $220,875. At only 3% return on that amount of money you would have a yearly retirement income of more than $11,000 and you would also have your $500000. At an average life expectancy of 74 years, this would result in benefits almost 8 times those of Social Security.

Any way you look at it you cannot escape the fact that the present system is a fraud, it is not insurance, it is a bad investment in retirement, it is risky because Congress can always change it, and you will never get back the money you put into it — if you are young, poor, middle aged, or middle class.

Within the next 10 years the majority of American taxpayers — and voters — will be under the age of 30. Will they be willing to be swindled forever? If not, they do not have to force Congress to cut back both taxes and spending on Social Security. Today’s youth will be deprived of their “insurance” by tomorrow’s youth.

The major rules in a democracy, after all.

Let your elected representatives know your feelings about the inefficient, discriminatory Social Security system. Urge them to abolish it or at least alter this system making it an optional, voluntary venture.

Be A Life Saver

On April 29th, the Bryant College Greek Letter Council will hold another of its annual blood drives. This year's blood drive will further the same life-
saving policy as in previous years. The donor and his trans-
mitts will become eligible for any needed blood free, for the peri-
od of one year. In order to donate blood, a person need only sign up at the school dispensary (health office). Ap-

port cards will be available either from the nurses of the office or through any fraternity or sorority. There are some stipu-
lations however. You may not donate blood if:

1. You have a cold or allergy at time of donation.
2. You ever had jaundice or hepatitis. (never donate)
3. You are under the age of 18.
4. You have had major sur-

5. You have had minor sur-

ść

6. You have been in the Armed Services within 2 years and in a malarial zone.
7. NO ALCOHOL 12 Hours before donating.
8. No heavy meals, fried, or fatty foods should be eaten before donating.
9. You may eat toast with jelly and have regular coffee up to time of donat-

Coffee, orange juice, and doughnuts will be served. The blood donation center will be in the main Hall Lobby on April 29th from 9:00 a.m. until 1:00 p.m.

It is requested that you sign up by Monday, April 26. This is to enable a more accurate account of how much equipment will be needed to facilitate the donors. However, you can sign up to the 25th. Give now, you may need it later.
The time has come," the walrus said, "to talk of many things:"

**Bikecology: Ecology Through Bicycling**

**Bikecology Definition**

"Bikecology," as we have defined it, is ecology through bicycling. Bicycling causes a minimal amount of stress on the earth's ecological systems since it requires much less energy and uses fewer resources to function and at the same time creates little disruption to their environment. The movement hopes to create an opportunity for the nation's attention on the ecological reform of our land, and to establish the bicycle as a significant mode of transportation. To help identify the Bikecology Movement, the Bikecology Movement has designed its own symbol. It represents an abstraction of man's international vehicle, the bicycle, and includes the first letters of the Greek letter Theta, the Ecology Symbol. Together they symbolize the development of Bikecology: ecology through bicycling.

**Saturday, May 8, 1971**

Bikecology Day

This day is the beginning! On May 8, 1971, the goal is to focus the nation's attention on the importance of bicycling as a practical mode to transportation, to plan, to promote and design bicycling as an aid in alleviating environmental problems and to develop a program of action that counters these problems. The movement would benefit all major cities in the nation.

Each city participating in Bikecology Day could stage its own bike parade. Such a day would reflect local problems relating to bicycling and ecology.

**Bikecology Day Basic:**

1. Everyone should ride their bicycles to the events. For individuals living in cities that have mass transit systems, bike paras could be formed. Others could use mass transit systems including the railroad, air plane, and possibly boat. Provisions could be made on buses and trains for transporting bicycles. If no means of mass transit is available, individuals who are unable to bring a bicycle might obtain one from people who own more than one.

2. All people should ride their bicycles to work, school, or other events. For example, a bus pool could be provided.

3. The Bikecology Day program must have a strong beginning and a positive terminus. So often a bike day is held when participants simply ride to a predetermined spot, enjoy a picnic and leave. However, this event can be critical for establishing a continuous program. Participants should join with a purpose. They could be provided with information which deals with developing action programs from that day on. Activities of the day could include:

**Advantages of Bicycling**

1. Bicycling is an excellent tool for light shopping, errands and paper route deliveries. The bicycle allows working to a really easy and enjoyable matter.

2. The bicycle represents a more affordable solution to today's transportation problems. It gives individuals from all levels a serious alternative to participating in the environment. It would allow the individual to gain wholesome exercise and personal physical fitness.

3. The bicycle allows participates in family-oriented activities in a means of personal mobility which is socially, environmentally and beneficially.

4. The bicycle allows new friends to be encountered; the bicyclist can speak to the pedestrian: the bicycle is an excellent tool for "people watching."

5. The bicycle allows participants in family-oriented activities to gain wholesome exercise and personal physical fitness.

6. The bicycle fosters respect for the environment in the use of clothes.

7. The bicycle offers opportunities for social reasons. It is a means of free and independent locomotion through a variety of places, thereby allowing individuals who bicycle the opportunity to become sensitive to the environment and to people.

8. The bicycle fosters respect for the environment in the use of clothes.

9. The bicycle offers opportunities for social reasons. It is a means of free and independent locomotion through a variety of places, thereby allowing individuals who bicycle the opportunity to become sensitive to the environment and to people.

10. Mild demands are placed upon the individual for maneuvering skills and intellectual judgment.

11. The bicycle is employed by the environmental analyst."
Of DDT-and-Mercury and what pollution brings!

Question: What are alternative approaches to present-day use of recreational areas?

Roger Williams Park in Providence would be the best place for a class in ecology to be taught. It would also be a good place to experiment with polluted water, trying to clean up the water. People could get involved in projects to preserve the nature offered in an area such as this.

Ken Miller

An alternative approach to this dilemma is rather simple, but tremendously effective. Why not designate each recreational area such as Yosemite, Yellowstone, all other natural parks as "wilderness areas," off limits to motorized travel (cars, motorcycles, snowmobiles, motorcycles, etc.) and commercial structures. Anyone wishing to gain access into or within the park area would have to hike, canoe, or parachute into the area in which he wishes to camp.

Maybe someone should try to make a "wilderness area" out of New York City — it might do some good!

John Samek

"The task ahead will be to assign to the machine those things it can do best, and reserve for man those things which he must provide and control."

— David Sarnoff

Pollution in the U.S. could be overcome in almost every instance by using "either available technology or new technology we could soon acquire," according to Dr. Hassler. "We just have to be willing to pay the associated costs. We need only put muscle behind our purpose."

Dr. Philip Hassler
President of the National Academy of Sciences

Rally Report from page 1

Hella Abzug, Congresswoman from New York, drew loud applause with her opening statement, "You're presence here today can dump Nixon, silence Agnew, and fire Hoover!" of both parties since an ultimatum to the administration to end the war in Vietnam by the end of the month — if not sooner.

Principal rally organizer, Albert K. Lowenstein, former congressman from New York, declared, "Today, you have given a torch to the rest of the country." Lowenstein was the man who initiated the "Dump Johnson" drive in 1968.

Speakers calling for support for themselves and against Nixon and the war included Democratic presidential hopeful Edmund Muskie of Maine and Birch Bayh of Indiana along with Republicans Paul N. McCloskey of California and Donald W. Riegle of Michigan.

Muskie who is the prime Democratic candidate for the presidency said that if the moral leadership is to be restored to the nation, "We must vote the administration out in 1972."

Birch Bayh said he is "seriously considering" entering the Democratic presidential race. In more crowd pleasing terms than those used by Mr. Muskie, he attacked the policies of the Nixon Administration and maintained, "We cannot afford four more years of the bankrupt policies of Richard Nixon."

"The only Pro-Nixon support came in the form of a State delegation of the YAF, carrying signs reading, "Support Nixon" and "Dump Muskie" along with a plane circling overhead with a trail of "The YAF asks Why Help Hanoi?"

The only support shown for Nixon was this sign circling delegation of the YAF at a plane with the sign "The YAF asks: Why Dump Nixon?" at the rally at the State House.

Before the rally at the State House, forums were held in the Baltimore downtown. Here a group hears discussions on the war in South East Asia.

Senator Edmund Muskie of Maine, prime Democratic candidate for the Presidency in 1972 said that if the moral leadership is to be restored to the nation, "We must vote the present administration out in 1972."

Birch Bayh said he is "seriously considering," entering the Democratic presidential race. In more crowd pleasing terms than those used by Mr. Muskie, he attacked the policies of the Nixon Administration and maintained, "We cannot afford four more years of the bankrupt policies of Richard Nixon."

The most well cheered and liked speaker at the rally was representative Hella Abzug of New York.

"You're presence here today can dump Nixon, silence Agnew, and fire Hoover," she remarked.

Other speakers at the rally included local officials including Dr. George Wiley, Rhode Island native and head of the national welfare rights organization who said, "We want an end to the war in South East Asia and an end to the war against the poor people in America."

The only Pro-Nixon support came in the form of a State delegation of the YAF, carrying signs reading, "Support Nixon" and "Dump Muskie" along with a plane circling overhead with a trail of "The YAF asks Why Help Hanoi?"

The only support shown for Nixon was this sign circling delegation of the YAF at a plane with the sign "The YAF asks: Why Dump Nixon?"

Birch Bayh of Indiana gained applause when he maintained, "We cannot afford four more years of the bankrupt policies of Richard Nixon."

With the rain, cold weather, and vote seeking candidates, the day wasn't quite a Woodstock, but for R.I. it was the closest it has ever been.

Dr. George Wiley of the National Welfare Rights Organization demanded "an end to the war in Southeast Asia and an end to the war against the poor in America."

Republican Donald Riegle claimed that a change could come "ten months sooner" if voters would vote in the Republican primaries. He also urged young voters to register as Republicans or register as Democrats, change and vote Republican.

Bikecolor

(Continued from Page 5)

6. Get to know your neighbors. Ask them how they feel about the war and the future of this country.

7. Finally, vote for those who are sympathetic to the desires of bicyclists, ecologists and conservationists.

City and State Action

1. Laos to eliminate hazards to cyclists should be developed and enforced.

2. Public works departments can help reduce bicycle hazards throughout cities by eliminating wide-bar handrances next to obvious bike ways.

3. Ordinances that prohibit bicycling on sidewalks could be altered so that bicycling is legal in certain sidewalk lanes in all areas of the city.

4. "Bike-bike" places in the city are essential and could be provided so bicyclists can hitch-bike with the bike to and from the city. These spaces could be provided next to, or as part of, major traffic arteries.

5. Establish "bike as-a-yards" in the city for the purpose of recycling used bike parts. A place in the city would be set aside where individuals, particularly the socially and economically deprived, could pick up used bike parts free and assemble them into a workable transportation (a good high school or community project).

6. Establishment of youth hotels (bike-tels) located every 30 or 40 miles along bicycle ways is essential. Bike-tels could be placed a day's ride apart, much like the California Missions were spaced. (A day's ride by horse.)

7. States and cities must devote proportionate financial support to development of bicycled transportation. This is relative to other modes of transportation now supported. Since the price of gasoline is escalating, fuel taxes should go not just for highways, but could also be applied to the needs of persons involved in all types of transportation.

8. City and state parks and recreation departments could provide bicycle rental concessions at parks and other locations such as tourist and housing areas, central business districts.

9. During the process of acquiring and developing new roads, corridors should also be purchased and developed exclusively for bicycles. State highway departments and city road, park and recreation departments could be geared to handle such a program.

Federal Action

1. Keep daylight savings time and eliminate standard time because it creates a situation which forces an individual to use a car in place of the bicycle.

2. Re-evaluate the Depart the Bikecolor

Friday, April 23, 1971

by Steven D. McCracken

The Bryant Community, led by Sue Jenkins, captured in an annual St. Elizabeth Convent Tournament on Southeastern University. The Indians won by one point for Bigbridge School, sponsored by Massachusetts.

SMU colleges while bigbridge and Bryant had colleges were defeated Nichols and Quitmaphic.
**Tennis Team 3rd in SNE Tourney**

by Steven Diamond

The Bryant College tennis team, led by sophomore Jon Jenkins, captured third place in the annual Southern New England Conference Tennis Tournament on April 17, at Southeastern Massachusetts University.

The Indians were edged out by one point for second place by Bridgewater State in a tourney dominated by Southeastern Massachusetts University.

The Indians collected 15 points while Bridgewater had eight, and Bryant had seven. Other colleges defending champions Nicholas with five points and Quinnipiac with four.

Jon Jenkins gave the Indians three of their seven points. The former Hendrickson star registered three straight triumphs before losing a 6-4, 6-1 decision to SMU’s Roger Giusto.

The Indians’ two doubles teams of Ted Weiner and Wayne Ivers, and Stein and Rick Detrick each won for Bryant over four points.

Coach John Gillooly feels Bryant has a young, fast, and talented team with a good future. Coach Gillooly believes the addition of freshmen Robert Ladner will help Bryant considerably in their rebuilding stages.

---

**Trackmen Place Second In Quadrangle Meet**

The Bryant Track team opened in 1971 spring outdoor season with a second place finish in a quadrangular meet held in Lowell, Massachusetts. Lowell Technological Institute won the meet with 97 points, Bryant scored 51 points, Rhode Island College was third with 20 points, and Gordon College fourth with nine points.

Three school records were established in this meet. Co-captain Bob Passano improved his discus record to 121’ 2”, Roy Lapidus lowered the two mile time to 9:39.9, and Dan Bergander took the 120 high hurdles down to 14.0.

The leading scorer for Bryant was Bob Passano with four points in the shot put and the discus, second in the javelin. He was followed by Maurice Barbados, who placed fourth in the 100 and who came back with a win in the 220. This is the first year of track competition for Maurice.

---

**It’s Good To Blow Off Steam**

Nerve poison 160,000 times more effective than cocaine as a pain-killer and nerve-blocker is now being used in the puffer fish and the California amphibian newt, reports the December SCIENCE DIGEST. Small doses of the drug, known as tetrodotoxin, are now being used to relieve cancer sufferers and to reduce muscular spasms.

"If you can't blow off steam, you're a likely candidate for an anxiety attack," says Dr. Jackson. "Express feature Seals and Crofts, Kate your anger." Taylor, anclin and The Flying Burrito Band.
