Delaney & Bonnie In Concert
Saturday Night At Meehan

The Brown University Hockey ring, alias Meehan Auditorium, will again be turned into a rock fest again Saturday night. Thursday night marked the first big concert for Bryant with his ex-wife Alou? is still interested. The price was much lower.

The Yankees trying to outscore the Yankees' top number one draft pick, Ron Bloemberg.

1970 Census Reveals:
College Attendance Up

College attendance has grown so dramatically in the past 30 years, according to a U.S. Census Bureau study, that about two-thirds of today's college youth have parents who did not attend college themselves. Since many studies have shown that college often produces changes in interests and attitudes, the increase in educational attainment could have implications for the current so-called "generation gap," some authorities indicated.

According to the Census Bureau, of America's 16- to 24-year olds, 61 per cent of the white students enrolled in the fall of 1969 were from families whose head had not gone to college. Among Negroes enrolled in college, the study reported that 71 per cent were from families whose head had not attended college, including 50 per cent whose head was not a high school graduate. The percentage of young persons in the population with four years of college or more has nearly tripled in the past 30 years, going from 3.8 per cent in 1940 to 16.4 per cent in 1970.

During the same period, the percentage of persons with four years of high school or more rose from 37.8 per cent to 75.4 per cent.

Just in the past 10 years there have been sizable increases in educational attainment. In 1970, among persons 20 to 24 years old who had completed high school, the census study found that 72 per cent of the men and 42 per cent of the woman had completed some college, compared with 42 per cent of the men and 35 per cent of the women of the age group in 1960.

Numerous studies have shown that college education often produces persons with more aesthetic and intellectual interests, more liberal attitudes toward politics and sex, and greater self-confidence, said Theodore Newcomb, professor of sociology and psychology at the University of Michigan.

Such changes, of course, also occur among persons who don't attend college, he said, but apparently speeds the changes. Mr. Newcomb cautioned.

Bryant Prof. To Attend Paris Peace Talks

William B. Sweeney, Jr., Assistant Professor of Economics at Bryant, has been appointed by the World Justice and Peace Commission of the Diocese of Providence to represent the United States at the Paris Peace Conference. Professor Sweeney is one of 25 representatives from the United States, and the only Rhode Islander in the group.

Professor Sweeney has stated that he has three objectives to his mission. The first is to gather information and more informally with the Vietnamese in Paris in the hope of developing a better understanding of their views of a feasible solution to the conflict in Vietnam and "to develop some kind of peace proposal that could be handed to the North Vietnamese and American delegations at the talks."

Lastly, on his return Professor Sweeney will participate in a speaking tour as a follow-up to his meeting with the Vietnamese in Paris. The group plans to spend eleven days in Paris, beginning May 20 and returning May 31.

William B. Sweeney, Jr.
Summer School Registration Procedure

STUDENTS IN BRYANT SPRING SEMESTER CLASSES
1. Obtain an application list of class offerings at the counter in the Dean's Office, or the Registrar's office — South Hall.
2. Bring application and full payment to the Bursar's office in the Administration Building.
3. File the application, bearing the Bursar's stamp of approval, in South Hall, Room 1-13, with Mr. Alberg who will approve the course selection and prepare an admissions card.
4. These admissions cards will be filed separately and will be handed to the students on Registration Day.
5. A Registration will take place in the gym at the following times:
   - **Interession — June 7:** 8:00 a.m.
   - **Summer Session — June 28:** 8:00 am.
   - **B. Books will be available in the College Store.
   - **Admission cards will be collected by the instructor on the first day of class. From these cards, class lists will be prepared in duplicate by the Registrar's office. One copy will be for the instructor and one copy for the Registrar's office.
   - **A. The final date for dropping a course without academic penalty is:**
     - **Interession — June 9:**
     - **Summer Session — June 30:**

   B. Students should notify Mr. Alberg's office of intent to drop a course. This information will be forwarded to the Bursar.
C. Once application has been filed and until the third day of class, only 80% of the course fee will be refunded if the student withdraws from the course. Dorm fees are non-refundable.
D. Grade reports will be completed in class, using the same procedure as during the regular fall and spring semesters.

   5. Evaluation criteria and other course requirements will be announced by the instructor in the individual class.

   Dates reserved for final examinations:
   - **Interession — June 25:**
   - **Summer Session — First period — July 29:** 8:30 a.m.
   - **Second Period — July 30:** 8:30 a.m.

   10. The attendance policy as formulated by the faculty will be in effect. Non-matriculating students will be classified as SUMMER REGISTRATION.

**RSN at 125**

**For June**

The Selective Service System announced today that the highest Random Number Sequence that any local board may call will remain at 125 through June 1971.

The action follows the announcement of Department of Defense that the May and June draft calls will total 50,000, up from 40,000 in 1970. The Defense Department has now registered 80,000 through June of 1971, as compared to 99,500 through July of 1970.

The highest Random Number Sequence reached through June of 1970 was 125, as compared to 123 through the first six numbers of this year, a difference of one number.

Draft totals and RSN ceiling as of April 1970 and 1971 are as follows:

<table>
<thead>
<tr>
<th>Month</th>

**KRISHNAM**
**Krishman’s Critique**

By Harry Krishman

**And They Call It The Birth of The Blues**

But perhaps this column should be entitled “A Night in Terror,” but it’s not. If it were a movie it might star Peter Fonda, Warren Beatty, Daws Butler, Dave Keeler, Peter Boyle, and Edgar Bergen. It’s not a movie, but it is true and sad. The stars include Marc, June, Cosmos and Felonius (the possible culprit, Alan Kluger, Poochie [from upstairs], the President of the Providence Fire Department, Officer X, Providence Police Force, myself, and a veritable cast of millions. To set the scene it is important to know what was going on. It was 12:30 at night. I was studying my taxes, and June, Marc, and Cosmos, were watching a movie. Anyway, the wereself (who was only a little kid at the time) had just been shot by his uncle who had mistakenly mistaken him for a wolf.

Did you ever smell urine before? Well, it stinks! A strong smell began to circulate through the apartment and after some degree of investigation, it was discovered that the smell had originated in the ventilation. Next, smoke began to come flowing out of these ventilators. I believe it was Smokey the Bear who once groveled, “Where there’s smoke, you better get a fireman.” So Peter called the Fire Department. In the meantime, June, Marc, and I were almost trying to locate the origin of the smell when who should turn up but Felonius. No sooner than later, the wahl-wahl and spinning red lights of Providence’s finest appeared out the window. I looked for the dalination in the lead, but no spots. After some time of touring the building with the firemen, Officer X turned up. We used to watch Dragnet and have a special boy for Officer O’Toole. Now, it turned out that the firemen had already decided that our analysis of the smell had been correct—burning urine. So, up came Officer X. “You know what year you were born?” he said. Now, this guy was big. He was so big that he had to duck and turn sideways to get through doors. He was so big that even John Wayne, the Duke himself, would be proud of him. Heavy? He was immense. Who needs a two-headed monster?

In the meantime, in another part of town...

State and National Legislation was at a loss. The President was missing. Lott in Roger William Park, boy President had run into a wall and fell. I got to the hospital in 15 minutes. I was at the emergency room, but there was no tension. It was only a hangover.

The May draft was previously announced. The Defense Service System said that the high-employment number would be 20,000, all of whom would be draftable.

Sometimes You Can't See The Forest For The Toilet Paper

Every since "environment" exploded into the American consciousness, we have frequently asked question has been, "What can I do?"

To answer those questions many written pamphlets, handbooks and guides that deal with what are called "lifestyles." They urge the citizen to use white toilet paper, compost his garbage, launder with nonphosphate soaps, tune up his car, and in general see that his purchases are not the result of environmentally destructive practices.

Too often these booklets become the story by way of rate for the organizations that publish them and the citizens who use them. They enable the organizations to present their ideas in a neat and efficient manner with the growing numbers of people who seek such advice. And they enable the individual to check off his list of lifestyle practices that he is doing all he can to save the environment.

In so doing, the booklets can deceive the citizen from looking more deeply into the issues of pollution and responsibility. They also make it easier for organizations to avoid coming to grips with complicated problems and reorienting their programs to cope with them.

That is not to say the lifestyle booklets are bad. For from them, they are often essential in helping people realize that everything they do has environmental implications — whether it be the choice of fuel or the choice of sources or poisoning of air and water. They also help people appreciate the complexity of all things which is the essence of ecology. However, they can also be misleading in that if they follow those guides, environmental problems will be solved. And they imply that the consumer can always make significant environmentally sound choices.

Unfortunately, that just isn't so.

For even if everyone carried out the lifestyle recommendations there would be no noticeable improvement in the poisonous condition of air and water.

Solid waste problems would still be overwhelming and natural resources would continue to be misused. The probable result would be environmental devastation on a massive scale.

The real problem is that there are few environmentally sound alternatives. In most realms of choice one can only pick the lesser of two evils. And that is about it.

Consider the automobile. It is responsible for the majority of air pollution. Except for the very few American cities which have subways, mass transit in America is still a dream. Most people have no choice but to drive to work, and they cannot choose but to own an auto with an internal combustion engine. The alternatives — walking and bicycling — are both unpleasant and unhealthy as long as the majority continues to drive cars. Buses most often are not available. Therefore, the honest way to tell people how they can help is to point out to them their current lack of alternatives and urge them to press public officials for stricter controls on autos. They should also be urged to work for private mass production of automobiles with external combustion engines which are virtually non-polluting.

Or take recycling. Most lifestyle booklets focus attention on turning in old newspapers but ignore the problem of creating a demand for the recycled paper those newspapers will become. Many mills already claim to be handling all the waste paper they can and industry says it will take 20 years to build the facilities necessary to recycle the paper now available. If all government, business, and organizations insisted on buying recycled paper, it's probable those mills would be built a lot sooner.

Or water pollution. Some 60 percent of it is caused by industry over which the individual has no direct control. Only forceful action by government and public outcry is going to get polluting industries, which have always assumed a right to pollute, to change their ways.

The majority of the remaining water pollution comes from municipal sewage treatment plants. The only way the citizen can eliminate that source of pollution is to elect public officials who will spend his tax money for total water treatment.

These solutions, however, are complicated and more difficult. Since it's hard enough to get people to give up their phonographs and buy returnable bottles, it isn't surprising that organizations often emphasize the easier things, postponing for a while a serious discussion of what saving the environment really requires.

It requires reading dull, complicated laws and financing lawsuits against polluters and recalcitrant government agencies. It takes finding out how city or county government works, what interest groups get their way, and how the citizen can make his voice heard over that of the lobbyist. It takes writing Senators and Congressmen over and over again. It takes bringing abuses at home into the public spotlight. It takes questioning and challenging the sacred cows of government and industry. It takes being immune to and able to relate innovations that environmentalists want to precipitate unmentionable, take away conveniences and essentials and may be communist-inspired.

It is hard hard work. And it will take a long long time.

But the ease of environmental quality will be founded on a compost heap of booklets and pamphlets unless concerned citizens move into the public arena where the real battles must be fought. The lifestyle issues are valid educational tools and a measure of personal commitment. But they will never clean up the air and waters or redirect a wasteful natural resource policy that ignores the needs of the future. To imply or believe that they will is misleading, and may prevent or postpone important action until it is too late.

Martha Wright

Hats off to ARA

By Richard Kaplan

During the year, ARA has made remarkable improvements in trying to make the food we eat, real food. Who knows, if it continues, the food might be edible. The idea of making our own ice cream sundries for dessert is a real cool one. Many of us will get fat making huge sundries, but we deserve it. After all, we've gone on a diet for a few years trying to avoid the cafeteria's unappealing food. For breakfast, ARA has added cottage muffins and apple pancakes. The grill has been moved from the back room to the front line to make the food warmer when it is served. Now we can actually see our eggs as they are made instead of guessing as to whether they were made last week, last month, or last year. For lunch, assorted pizzas have been added to the menu to give the students a choice. Previously, the only choice we had was eating or not eating. Tuesday, ARA tried convincing us that the food they have been serving all year is actually very tasty. The barbecue, which was held on South Hall lawn, was a real masterpiece. The barbecue chicken looked savory, but it was so rare that it was doubtful that the chicken had been killed yet. The potato chips, soda, and popsicles, however, were excellent. In spite of the food, the weather made the barbecue a success.

The cafeteria service, which has come a long way, looks very encouraging for the new campus next year. After all, if you want a strong student body, you need good food. Something has got to be done with the rubber hamburgers, hard toast, unappealing meat loaf, and other of the cafeteria's tasty treats. Usually, the cafeteria is only impressive when our parents come up, but lately the cafeteria has even impressed the students. This year, "Flying Fickle of Fate Award" for the worst cafeteria is actually off to ARA!

Summer Registration

(Continued from Page 2)

A.O. or E.D. and are subject to the same regulation as freshmen. Attendance will be recorded for each session, and where applicable, the maximum number of absences has been set at four.

A. Interruption (one course may be taken)

Each class will meet for two sessions daily.

1st session 8:30 to 10:00 a.m.

2nd session 10:30 to 11:30 a.m.

B. Summer Session (two courses or one double course may be taken)

1st period 8:25 to 10:00 a.m.

2nd period 10:25 to 12:00 p.m.

C. Holiday — July 3, 1971

11. Tuition is $60 per course. (A double course is $120).

There is a $5 late registration fee and a $12 change-of-course fee.

The Lab Fee of $12 applies to Evening Division and non-Bryant students.

12. Dormitory rooms are available. All meals will be on a cash basis in the Student Union.

Summer Session $ 75.00

Both $120.00

Dormitory Fees — Interruption $ 45.00

13. Courses with insufficient enrollment are subject to cancellation. In this case 100% of all fees will be refunded.

14. Veterans are reminded to file for benefits in the Registrar's office.

Drama Workshop

New Summer Offering

The registrar's office has announced the opening of a new summer course for Bryant. It is Drama Workshop, E. 20 It's a three credit course and offers the student the opportunity to be involved in all aspects of drama production including play selection, construction of sets and properties, actual construction of stage, problems of lighting, costumes, makeup, and direction. Number of students is limited to twenty-five or thirty and permission of the instructor is required.

IRS Exempts Some Working Students

Providence, R. L. — Students with jobs who may be exempt from federal income tax withholding on their wages this year should notify their employers, JOHN J. O'BRIEN, Director of Internal Revenue for RHODE ISLAND, said today.

Working students who qualify under the tax law for exemption from withholding, Mr. O'Brien advised, should fill in and submit a Withholding Exemption Certificate (Form W-4) to their employer by May 1. Exemption certificates filed for 1970 expire April 30.

Students who did not owe any tax last year, and expect to owe none in the current year should so certify, Mr. O'Brien said. This would eliminate the need to file a tax return next year unless there has been tax withholding. The student wishes to recover it.

Single students with income of less than $1,700.00 and married ones filing jointly with income of less than $2,350.00 will not owe any federal income tax for 1971, Mr. O'Brien stated.

Flexible Scheduling

• First 6-week session begins June 14
• First 5-week session begins June 21
• Morning and evening classes — afternoons free

Guaranteed Courses

• Over 200 in each session
• Small, intimate classes
• Reasonable Rates

Relaxed, Informal Atmosphere

• 5 minutes to ocean beaches
• 30 minutes to Newport Music Festivals
• 2 hours to the Cape

Have A Good Summer Peace From The Archway

Youth Guidance Attending Experimental Laboratory

Youth Guidance elected officers for the academic year of 1971-72. The officers elected were: Gerda Fischer, President; Barry Geval, Vice-President; Drew Pacey, Treasurer; Mary Ellen Gannett, Secretary. The officers will be attending an experimental lab, designed to increase the effectiveness of Youth Guidance at the Holiday Inn in Seekonk.

The curriculum of the Lab has two objectives:

1. To increase the ability of volunteer program leadership to solve problems.

2. To increase the ability of volunteer program leadership to identify and utilize resources.

Next year Youth Guidance plans to expand its program to areas near the Smithfield campus. However, the organization needs the support of the Administration and the students of Bryant College.

Youth Guidance wishes to thank its former officers and members, for an outstanding job, and thank the senior class for their gift to Youth Guidance.

Any Underclassman desiring a 1971 YEARBOOK

Please contact the Secretary in the STUDENT ACTIVITIES BUILDING

A Year In Review

BY STEVEN DIAMOND

Another year has concluded at Bryant College and the last year here at Providence. Some teams have suffered with some of the poor conditions that Bryant has more than just a basketball team. This year when the basketball team couldn’t put it all together, other teams came through impressively.

The basketball team with Coach Tom Pollard will be getting a lot of talent from this year’s freshman team. They will have a fast team with excellent shooting and ball handling. Next year we hope they can bring in the N.A.A. tournament playing in their own gymnasium. The basketball schedule is constantly getting tougher with some big college teams being added.

The fall and spring baseball teams coached by Bill Stein is still undergoing developing stages. This year Bryant played their closest game of their history with New Haven College, one of the best small colleges in the country, to a 6-6 loss. Next year it will be different with a new field to play on. No more running up the hills in center and right field.

This year the bowling team, the most successful team this year, represented Bryant in Kansas City. They finished third in the country and first in their area. Bryant is going all out to be number one next year because all of the starters are returning. Coach Nelson feels with some freshman talent the team will be unbeatable.

Coach Fred Reinhardt is still doing an amazing job with the track and field teams, plus the cross-country. With Ray Laplante and Bruce Stewart returning next year, the team will surely be amongst the top.

The Bryant Golf team has really been doing a fine job with the coaching of Archie Boulet. The team traveled to Florida and were unbeaten at home this year. The team has promising freshman and will be strong next year.

The tennis team coached by John Gillis also is in the rebuilding stages. After losing many top players last year the team compiled a respectable record and are looking forward to a winning season next year.

The soccer team has come a long way now competing with some of the top college teams in the area. Still a new team, Bryant faced Holy Cross, Providence College, and U.R.I. Most of the team will be returning looking forward to a successful year.

Bryant College is definitely on the way up in all respects. This year’s attendance at most of the games was smaller than usual. It is so important to have the student players play their role by supporting their team.

Until next year, I would like to wish all the students, faculty and administration a most rewarding summer.
