Annual WJMF Held Hostage
Radio station strives to beat $3,600 record in 2014 event

By Kofo Adebiyi
Contributing Writer

What do caution tapes, hostages, and radio have in common? They all signal WJMF’s annual 36-hour charity radiothon—an event where 4 volunteer DJs ‘hostages’ are locked in Bryant’s radio station in an effort to raise funds for a chosen non-profit organization. If you have walked by the Koffler building in the past week, you would have noticed the caution tapes that have invaded the building. It’s all part of a simple and brilliant concept--one room, 4 DJs, 36 hours, and a great cause.

Last year, the station’s board members made a drastic decision by revamping Held Hostage as the WJMF signature fall event. Although the change presented a great challenge in planning, the new strategy proved successful. With the support of the Bryant community, the station raised over $2,600 for the Gloria Gemma Breast Cancer Resource Foundation during the 2013 parents and family weekend. This year, the station hopes to have continued success with the new strategy. In support of Breast Cancer Awareness month, WJMF has once again partnered with Gloria Gemma to raise funds, awareness, and community support for everyone whose life has been, or will be affected by breast cancer.

In discussing the station’s plans for this year’s radiothon, General Manager Kelly DeRoche reveals that this year’s Held Hostage strategy is all about rallying the community into making a positive change. According to DeRoche, WJMF’s ‘strategy’ overrelied on informing the public...(the station’s) vision is to rally the public around a great cause, and show how community can make our lives better.”

She discloses this vision as the reason behind the continued partnership with Gloria Gemma. “Because they [Gloria Gemma] share that vision of communal strength, we’ve worked so well with them. Their motto, ‘Give Hope, Give Support, Give Local’, captures the spirit of Held Hostage. It’s all about coming together as a community and solving our own problems. When those 4 DJs commit 36 hours to the chosen cause, they’re saying, ‘we represent everyone in our community who wants to make a difference’. They are dedicating 36 hours for us.”

After a rigorous applicant evaluation process, DeRoche and her team have picked the 4 DJs who will be “dedicating...themselves” this year on WJMF’s Held Hostage. The 2014 hostages are Sarah Falco, Dan Anderson, Rocoo Aurelio, and Nick Charles. Through audience engagement, the 4 DJs will strive to break the 2013 record of $3,600.

For students who will be hosting their family and friends during the weekend, the station will be hosting special ‘Parents & Family Minute to Win It’ games on Saturday, October 25th, from 9am to 3pm. All you have to do is donate at least $10 per person, and your team can compete for bragging rights on the Held Hostage Minute to Win It Score Board. According to inside sources on the WJMF Board, this is just one of the fun ways anyone can help make Held Hostage a success.

According to General Manager and past Held Hostage DJ, Kelly DeRoche, the event is the most fulfilling thing she has ever done a part of. “It’s hard to believe I’m leaving Bryant. As a senior, DeRoche is proud that she has helped continue the station’s tradition and hopes that this year’s event inspires support, and helps build community around the illness that has touched and continues to touch all our lives.” As for what she is personally looking forward to, she gleefully expresses that she “looks forward to beating the $3,600 record”.

As you share Bryan with your parents, families, and friends on October 24th and 25th, don’t forget to stop by the station to donate to a great cause, and show support for the DJs who will remain in the studio from 9am October 24th to 9pm October 25th.

Campus Safety Discussion held

By Molly Funk
Campus News Editor

On October 15th, the student body was invited to the Student Senate’s general meeting to discuss security on campus. The session began with opening remarks from Dr. John Saddlemire. He explained that his concern for the safety of students and faculty began when he was living on campus last semester. For instance, Saddlemire was concerned with the amount of non-residents he saw coming in and out of the building throughout the day, including the incessant emergencies.

He went on to assert that this display shows a lack of consistency with the “utilization of our key card access system.” Moving forward, Dr. Saddlemire suggested that one idea to enhance campus security is to program the key card access system to “open all of the buildings between 8am and 10pm, and then just the residents of the building in particular from 11pm to 8am.” Dr. Saddlemire wanted to be sure the students in attendance were aware that the new key card access system is “only one piece of the puzzle,” and students will have to be sure to keep their Dorm and suite doors and suite doors.” Currently, residence halls are unlocked from 6am to 1pm, allowing anyone on campus to enter the halls; however, between 11pm and 6am only residents of that particular building can access the hall.

Students were then encouraged to participate in the discussion and contribute their opinions on the key card access system. To start off, student Daniel DiNicola inquired about the costs associated with updating the access system to be locked all day. The students were assured by Dr. Saddlemire that our current technology is up to date and the “costs would be zero” if they were to enable the new idea stated above. To this, many students chimed in to express their enthusiasm over the idea to update the key card system.

After a few more questions and discussion it was determined that the all-day lock system could be turned off for days such as Parents and Family Weekend or move-in days. Students were assured that even at this current time DPS has the capability to lock all residence halls down if there were an emergency on campus.

Student Ambassador Bradley Adams contributed that while he is giving tours to prospective students, parents are often concerned with safety at Bryant. He thinks heightening residence hall security is a “good thing.” Another Student Ambassador, Renee Lawlor, made an important observation that Bryant students are “great door holders for people,” and if tightening security is to work there is going to have to be a major culture change at the university. Dr. Saddlemire agreed that the community does “have a sense of the Bryant bubble” where students are too trusting of one another. He expressed his belief that students leave their doors unlocked as a “sign of trust and community,” and that “the vast majority of crimes are crimes of opportunity.”

The next topic of conversation was whether students felt comfortable with cameras being posted at building entrances. Students were asked to raise their hands if they felt okay with having cameras at residence hall buildings to which almost everyone in the audience did. For instance, one student pointed out that “when you agree to live on a college campus you have little privacy anyways...I think a camera in something people would be happy with.”

This event also opened up the opportunity for Dr. Saddlemire to explain the phasing out of the blue light system. He stated “blue lights are now black lights” meaning that the system is very outdated technology. He goes on to explain that students already have access to systems that do work, including calling the police or DPS if one feels in danger.

To conclude, Dr. Saddlemire assured the students that to solve the problem of safety on campus there will have to be more education on campus, by teaching students where they can find resources. He told the students that the first week of November will be safety week on campus for those who would like to learn more about campus security and safety.

5:30pm - Thursday

The Archway: Writers’ Meetings, Mondays 5:30pm, Fisher Student Center, Room 2C

Want to see more people at your meetings or events? Advertise for FREE through the news feed or calendar. Email your club/org’s information to archway@bryant.edu

The Archway will be out on stands Thursday afternoon this year! We hope you pick one up then!
Bryant brings you Barbara Corcoran

By Emily Marques
Contribution Writer

There is no hiding that Bryant and all of our students have an extreme growing interest in the business world and how to succeed in it. With business students just about everywhere on campus, it came as no surprise that when the Student Arts & Speaker Series (SASS) was contemplating which speaker to bring to campus next, a business tycoon was at the top of their list.

On Monday, September 29th 2014, real estate mogul and shark investor on the hit NBC series Shark Tank, Barbara Corcoran, delivered an inspiring and success oriented speech at Bryant. Corcoran, a thriving multimillion dollar real estate entrepreneur, delivered insight on the business world and how success is obtainable if you have the right sense of determination.

For Corcoran, success was not immediate and certainly not handed to her. She did not excel in the education department and began a career she did not thrive in or even enjoy. From having 20 different jobs before the age of 23, to creating a multimillion dollar company, Corcoran shows the epitome of what hard work can do. Through her speech at Bryant, Corcoran discussed a “rags to riches” story and how she created a career for herself.

In 1973, Barbara borrowed 1,000 dollars from her boyfriend and left her minuscule job as a waitress to open a small real estate company in New York City entitled The Corcoran Group. Corcoran thoroughly developed her company and was determined to reach maximum success. Her hard work eventually paid off, seeing as she later sold the real estate company for seven million dollars in 2001.

With a growing career and newly acquired credibility, Corcoran landed a position on the NBC series Shark Tank. Airing in 2009, Shark Tank features a panel of investors judging and evaluating aspiring entrepreneurs and their business ventures. Corcoran has invested in dozens of businesses through the show, developing her success even further.

Barbara shared her story and insightful opinions to our Bryant community, being that many of our students aspire to accomplish similar success to hers. She emphasized the importance of failing and how one should never be afraid to make mistakes in their career and in their life entirely. For Corcoran, success is built not on how many times you have failed, but how many times you persevered and moved forward from your mistakes. She emphasized the importance of focusing on your strengths and using them to your advantage.

Through her speech she made it clear that business success did not come naturally to her, but that she was rather great at marketing herself. She thrived in having the ability to think outside of the box in order to make her company more successful. One of the most important lessons that can be drawn from this presentation is that many students in the Bryant community lack bottomline of innovation and purpose.

Corcoran put a clear emphasis on the importance of keeping the aspect of fun and enjoyment in your business endeavors. She spoke of following what you truly aspire to do and not settling for below average. Through her personal stories, she showed the audience how anyone can be successful in any career path they choose, as long as they keep themselves determined and don’t take no for an answer. Always thinking outside of the box and working hard in anything that you do are qualities Corcoran finds to be the fundamentals of success.

Overall, Barbara Corcoran’s Bryant appearance was insightful and extremely rewarding to the 600 plus students who attended her speech. She was honest, inspiring, and motivational to our community and effectively displayed what it truly means to be successful.

The Ebola outbreak is making daily news and instilling fear into millions. Yet a lot of people don’t know a lot about the disease itself and what’s going on. So here’s what is actually going on:

Ebola is a viral hemorrhagic fever that was first discovered in 1976. In 2006, it was established by the CDC that the disease can be traced back to fruit bats. (The infected fruit bat would then be eaten by a non-human primate and that animal would be consumed by a human not properly cooked and the disease could potentially be contracted). From there, Ebola is only passed by human to human contact, meaning the only way to get the last to is to touch the bodily fluids (blood, vomit, saliva, diarrhea, sweat, urine or corpse) of an affected person. Once contracting the virus, your body reacts harshly and that’s essentially what leads to death. Currently there is no vaccine or approved treatment, making the death rate incredibly high.

It all begins with an incubation period that could last up to 21 days. This is when someone may have the disease but they are not showing any symptoms yet. Being properly isolated during this time is crucial, as well as after possibly coming into contact with someone that has Ebola is an essential protocol in trying to minimize the spread of Ebola. The first symptoms that develop include fever, headache, sore throat, and other flu like symptoms. After progressing into the late stage, symptoms include: vomiting, diarrhea, impaired kidney function, and hypotension. This is also when internal and external bleeding begins. Even after death, the disease can survive on the surface of the corpse.

We are experiencing the seventh outbreak of the Ebola virus since the disease was first identified in 1976. This is by far the worst case yet, with more than 8,400 cases according to last week’s official numbers. In the past, outbreaks were shorter and much smaller in terms of numbers, so why is this outbreak so severe? First, the outbreak is taking place in an area much more urban than the past outbreaks. Currently, the outbreak is in the West African countries of Guinea, Liberia, and Sierra Leone, where there has not been an outbreak before. There are entire cities with high populations living in tight quarters—perfect breeding ground for a contact transmitted disease—that have essentially shut down in order to try and deal with the disease. Recently, any outbreak has occurred in a village or more rural region where the disease physically cannot spread as fast because there are not as many people around. Second, there is poor health care infrastructure in West Africa, even without the Ebola outbreak. They do not have the man power or technological resources to handle the disease control alone. On top of that, it takes a long time to officially diagnose someone with Ebola because samples have to be sent away to more advanced labs, often in Spain, and it takes a few weeks for results to come back. The contributing factors also include the deficient proper use of barrier protection for workers like body suits, gloves, face mask, goggles and disinfecting equipment. Lastly, it is difficult to keep the healthcare workers from all around the world, doctors in Western Africa, patients, and the local West African community on the same page.

Isolation needs to be taken a lot more seriously that it is currently. That will help identify cases of Ebola and reduce the number of instances where potential contacts of an affected individual need to be identified after the fact. The lack of trust between healthcare workers and local community members also needs to be addressed. Many locals don’t understand or agree with the degree of isolation. Patients must have once they are diagnosed and choose to not bring them to a hospital at all—endangering them and others around them. In conclusion, these three countries need a lot of global support to get things under control.

As of last week, there were 4076 cases and 2316 deaths in Liberia, 2950 cases and 930 deaths in Sierra Leone, and 1350 cases with 778 deaths in Guinea. In the United States there have been 3 cases and 1 death.

Americans are seriously concerned after Thomas Duncan became the first man to die in the United States after it was revealed that the Dallas hospital did not take serious enough precautions when he first came to them and actually sent him home.

From Duncan, two nurses have contracted the disease, one actually flying to Cleveland during her incubation period when she should have been isolated. President Obama has ordered that a team of about 30 disease experts, nurses, and doctors be formed that could be sent anywhere in the country on short notice if necessary. Screening at five major airports has also been installed to examine travelers from West Africa

Lastly, the CDC is looking to make hospitals more prepared to treat Ebola patients. Many are concerned that this is not enough protection against Ebola for US citizens and are demanding that the president do more. Although it is essential for the United States to be absolutely prepared for the worst case scenario, we need to understand that the outbreak is in Africa. Although that’s a slightly comforting fact, it doesn’t lessen the fact that these countries will need a lot of outside support to gain control over Ebola.

while searching for Hannah Graham, in Virginia have found human remains investigation. This is because authorities case since then, but recently things have 24th. It has been a missing person’s and more specifically she was last seen in and specifically she was last seen in Army. Who is your celebrity crush and why? Natalie Portman — simply beautiful. Where do you want to see yourself in 10 years? Nationally and more likely to be a Commander in the Army. Of course, the investigation is helpful. On social media pages, “Every search of personal that deal with the death of Harrington, and if Jesse Matthew did not take the life of Morgan Harrington... They have asked that people in a red shirt walking around the Fisher Student Center helping students, faculty, and visitors, or voicing his opinion on a specific issue at Senate meetings when others are too shy to speak. I think it speaks for itself that by being part of the ROTC program on campus, a Top Bulldog Leader, and a member of Sigma Chi, he epitomizes what it means to be a true leader at Bryant University. Questions: What is your favorite TV show? Bryant holds a simple “Hi” with a smile. Anthony Bryant is a third-generation legacy (my dad and paternal grandfather both attended Bryant) and he can go anywhere on my campus. I knew my dad came here, but he never pressured me to attend. I applied, but I didn’t know what to expect. If you had one chance to say anything to the world, what would it be? I've always been passionate about being part of the ROTC program. I have a lot of family who served in the Navy, Army, or Marines. Through their actions, they inspired me to follow in their footsteps. Now, I'm working on one of the ultimate challenges an individual can bear. It is both an honor and a privilege to be a member of the ROTC program here at Bryant and I am greatly looking forward to my four years as an Army Officer.

What is the number one thing on your bucket list? Summit Mount Everest — I love to hike and climb, and that is the ultimate goal. Why Bryant? Bryant is a third-generation legacy (my dad and paternal grandfather both attended Bryant) and he can go anywhere on my campus. I knew my dad came here, but he never pressured me to attend. I applied, but I didn’t know what to expect. If you had one chance to say anything to the world, what would it be? I've always been passionate about being part of the ROTC program. Food delivery startups are fattenig up on technology

By Shan Li
MCT Campus

Cassandra Santana rarely has time to shop for food. The Venice, Calif., social-media manager gets groceries delivered weekly to her home. She also orders regularly from trendy restaurants such as Gjelina for delivery to her home or workplace. Dan Levy, Facebook’s director of small business, announced that there are currently 30 million small businesses with active pages on the network, and with the number of registered Facebook users growing rapidly, it is likely that more and more companies will recognize the benefits Facebook can provide.

The same goes for Twitter. Businesses with Twitter accounts can easily follow other accounts to make their company known, and through retweets and favorites, their tweets can be carried through a multitude of channels. This use of the famous “hashtag” on Twitter also serves as a way to connect with people. When a company uses a hashtag in the content of a tweet, it enables anyone throughout the world with a Twitter account to see that tweet when they search either the specific word that was hashtagged, or something of similar content. Just like Facebook, Twitter functions as a platform of communication between businesses and consumers and is a convenient way for companies to advertise. While Facebook and Twitter are effective ways for businesses to advertise and communicate with their customers, the increasing popularity of LinkedIn has led to it becoming a form of business networking that has taken over the corporate world. LinkedIn is a site that enables users to create profiles describing their professional background, and allows for connections to be created with other users. These connections can lead to job opportunities and introductions to business professionals, which can then lead to further connections. Recent reports by the LinkedIn Progress show that 5 million companies have LinkedIn profiles to help them gain customers and future opportunities, and LinkedIn itself has over 300 million users. As a result, LinkedIn for professionals, LinkedIn is becoming a necessary element in the business world.

It is evident that using social media as a means of advertisement for businesses delivers many benefits that traditional means of advertising cannot. Social media networking sites like Facebook, Twitter, and LinkedIn are the use of the famous “hashtag” to provide a way to communicate and connect with others in a quick, easy, and effective way, while also bolstering companies’ marketing strategies and likely leading to more revenue. Social media is dominating our society, and if businesses haven’t made changes to adjust this to the revolution, chances are they will fall far behind the ones that have. But before you lock your smartphone in a closet for an hour a day, check out some of the apps and websites available for learning and practicing the ancient art of meditation and the more contemporary mindfulness-based stress reduction.

You don’t need a new gadget to meditate - all the equipment necessary comes installed in the product. But some meditation and mindfulness trainers are using technology in interesting ways. They range from simple meditation timers to complete courses.

“It’s almost using the enemy’s weapons against them,” said Dada Nabhanilanda of the Ananda Marga Yoga & Meditation Center in Los Altos Hills, Calif. He’s developing a meditation app with some computer science grad students, and plans to have it available in several languages.

Classes in mindfulness practices have become popular at some of Silicon Valley’s signature tech giants, where Los Altos psychotherapist and educator Renee Burgard conducts training. “There are more teachers of this in the San Francisco Bay Area than any other place in the world except Toroto, I’m told,” Burgard said.

The apps and a growing awareness of the benefits of meditation are helping expand the practice in a big way, according to mindfulness pioneer Jon Kabat-Zinn, who founded the Center for Mindfulness at the University of Massachusetts Medical Center in 1979.

Kabat-Zinn’s website is one of the oldest commercial websites, launched in 1998 when the World Wide Web was still in its swaddling clothes. Now, colleagues in Sweden have developed apps containing Kabat-Zinn’s series of guided meditations.

“The idea is basically to make this as widely available as possible so people can practice the meditation on a regular basis in their own lives,” Kabat-Zinn said.
GoPro stock: already out or settling in?

By Arielle Landaeta
Contributing Writer

In late June of this year GoPro went public at $24 per share at a volume of about 45 million, according to reports on Yahoo Finance. The company was already very well known for their cameras that can be attached to helmets and worn while playing various sports. They provide a unique view, as if you are looking through the videographer’s eyes, and allow experiences to be shared with many.

As a result of its popularity, GoPro had a lot of consumer interest and loyalty in their stock. It was highly sought after which was reflected in late August when GoPro stock price began a steady incline. The following image from Morningstar report illustrates the price of GoPro shares from mid July to mid October.

As shown below, GoPro took off by the start of September and did not stop rising until October 7th where it peaked at a price of $98.47 per share, according to a CNN Money article addressing the volatility of GoPro. Since then, the stock has dropped about 20% in price prompting the question, why?

In a CNN Money article there is speculation of the decline being partially due to Formula One driver Michael Schumacher’s skiing accident last December. Some people tried to blame his medically induced coma on GoPro saying that having the camera on top of his head is what caused the higher level of harm. GoPro denounced these rumors and pressed charges, but the damage had been done and has been correlated to the additional 11% decrease in price.

These recent events do not necessarily illustrate how GoPro stock is expected to perform in the future. A Forbes article says that analysts expect GoPro’s earnings to increase 31% for the next few years, which says that GoPro may not be done quite yet.

The stock increased so rapidly from its IPO in June that it is believed investors expected the stock to balance out and wanted to sell quickly in order to secure their profit. Forbes valued GoPro at about 95 times their 2015 earnings estimates, meaning their stock was trading at more than three times their earnings, which is extremely expensive.

However, because investors have been more fearful lately in the market in general, GoPro should remain optimistic about their stock despite the recent decrease in price.

Bryant senior Matt Cote invested in GoPro stock back in July when he decided to try investing in the market for the first time and created a stock portfolio with a simple strategy. His goal was long-term growth with nothing too risky, but had an interest in GoPro so he decided to try it out. He hoped to hold onto the stock for a year and sell it at a 10% growth. This, however, was not what ended up happening.

At first, the price of GoPro dropped a little bit and then all of a sudden took off in August and kept climbing into September. Matt saw a 10% increase in the three months since he bought the stock. Naturally, at this point he was somewhat startled by the drastic increase and began to look into possibly selling the stock in order to secure his profit.

Matt had a friend who participated in the Archway fund here at Bryant, where students are given the opportunity to invest money in the markets for the school. This student gave him the recommendation to sell because the projections of GoPro stock were lower than where the stock was going after the severe increase in price.

At this point Matt wanted to sell the stock quickly before others had the same idea, and put his shares up on October 3rd. After the weekend, his shares of GoPro officially sold on October 6th for $90.92.

Matt watched his portfolio grow from $500 to $760, enjoying about a 50% increase which is very rare in this market we have been seeing since the middle of September. He considers himself very lucky, and is looking forward to reinvesting his money in the future with the knowledge that when it comes to the stock market, not everything goes according to plan.

Bulldogs Women’s Swim team fall to ACC power house, Boston College

By Maria Messina
Contributing Writer

As a retired swimmer, it was certainly a different experience to sit in the stands and observe a meet instead of being down on the pool deck in a swim suit. I remember standing on the pool deck and thinking how cold it was, but now as a spectator I realized just how swelteringly hot the pool really is. On Friday night at Boston College’s William J. Flynn Sports Complex, family and friends gathered to watch the Bryant men and women’s swim teams compete against the Boston College Eagles.

The women’s 200 yard medley relay is up and the swimmers enter the pool and the meet begins. The women are off with Boston College’s relay in the lead. Bryant is close behind, but Boston College touches first, and Bryant’s A relay takes second with a time of 1:50.60. The next event was an exciting 100 yard Freestyle. Freshman, Valeria Watson led the pack, placing first with a 1:54.69, just out-touching the Boston College swimmer to her left.

The Boston College Eagles went on to score another first place in the 200 yard Freestyle with a 1:58.63. Bryant came back with a bang in the 100 yard Backstroke, where Bryant Swimmers Watson, Elisabeth Schauer, and Mackenzie Kirk placed first, second, and third. The 100 yard Breaststroke was next, and Julia Messina took an early lead at the 50 yard mark but Boston College’s Melissa Merwin snagged the lead and first with a time of 1:10.69. Bryant’s Messina and Morrone placed second and third.

The 200 yard Butterflies were up next to swim in one of the hardest events in my opinion. At the 100 yard mark, Boston College’s Emily Smith had the lead with another hundred to go and maintained that lead, touching the wall with a 2:31.72. The women stepped up for the next event, the 50 yard free. Boston College again placed first with a 24.35.

The ladies moved on to the 100 yard Freestyle. Boston College took first with a time of 53.9. Bryant University senior Captain Mara Valenzuela and freshman Mackenzie Kirk finished close behind the leader, in second and third respectively. For the next event, the 200 yard Backstroke, the swimmers entered the water and Schauer took an early lead with Watson close behind. Watson, with a stellar second 100 performance, pulled away with a commanding lead touching the wall with a time of 2:08.96. The battle for second was perhaps more exciting, with Boston College’s swimmer Madeline Mailiard out-touching Schauer by a mere .08 seconds with a 2:12.00.

With only four events left, the women began to line up for the 200 yard Breaststroke. Boston College’s Malliari and Bryant’s Senior Julia Messina took third with the time of 2:31.30. Women’s 500 yard Freestyle was next and half way through the event Nicole Salzano took the lead with BC’s Manning at her toes. Salzano quickly lost her and placed first with a 2:15.24. Only one more event was left until the next 15 minute break. The women were up for the 100 yard Butterfly. The Boston College Eagles swooped in to first and second with Bryant’s Taylor Polisano stealing third with a 1:00.31.

The Bulldogs and Eagles were left with just two events. The 200 yard Individual Medley was the last individual event of the night. Bryant University’s freshmen Salzano and Kirk took the lead, but Boston College’s Emily Mann stole second from Salzano and Kirk placed first with a 2:15.24.

The final team event of the night was the 400 yard Freestyle Relay. As the Bulldogs and Eagles fought for first the Bryant B team was in the lead after the first 100 with Boston College’s A team close on their heels. The swimmers came into the finish and Boston College’s Morsule placed first and second with Bryant’s A team taking third with a 3:43.87.

The final score was Boston College 184.5 and Bryant took their second loss of the season with the score of 115.5. Come join the Women’s swim team as they face the Providence College Friars on Friday, October 24 in Providence.

Patriots just a hand better: beat Jets 27-25

By Pat Curran
Staff Writer

It’s funny how the game of football works sometimes. Last year, Patriots defensive tackle Chris Jones cost the team the game against the New York Jets with a penalty on the last play of the game, as he ran behind a teammate on a field goal attempt. Last Thursday night, Jones and his teammates were able to gain revenge as he blocked a 58 yard field goal attempt.

Jones and his teammates were able to gain revenge as he blocked a 58 yard field goal attempt. Thursday night, Jones and his teammates were able to gain revenge as he blocked a 58 yard field goal attempt.

The swimmers came into the finish and Boston College’s Morsule placed first and second with Bryant’s A team taking third with a 3:43.87.

The final score was Boston College 184.5 and Bryant took their second loss of the season with the score of 115.5. Come join the Women’s swim team as they face the Providence College Friars on Friday, October 24 in Providence.

What does the future look like for Tom Brady?

By Michael Lucena
Contributing Writer

When the New England Patriots used their only second round pick in the 2014 NFL draft (62nd overall) on Jimmy Garoppolo, a lot of Patriots fans were left scratching their heads. With all the other positions that the team needed to fill in the receiving core and on the defensive line, it made no sense to draft a quarterback with their second pick. Not only did the Patriots uncharacteristically select a quarterback high in the draft, but they chose a Division II quarterback that most draft experts had ranked outside of their top 10 for that position.

With the 62nd overall pick, there were still quarterbacks like AJ McCarron and Zach Mettenberger left to choose from, both who played for big Division I programs and had much more “big-game” experience than someone like Jimmy Garoppolo. Most NFL analysts believed that similar to when the Patriots drafted their franchise quarterback Tom Brady with the 199th overall pick in the sixth round of the 2000 NFL draft, the team saw something in Garoppolo that led them to believe he could be the man to replace their aging superstar.

At the start of the 2014 season, Tom Brady is 37 years old, making him the second oldest starting quarterback in the NFL behind Peyton Manning (38). Since the NFLs founding in 1920, only 18 quarterbacks have played in the NFL past the age of 40, and none of them won a Super Bowl during that time. Furthermore, the oldest quarterback to ever win a Super Bowl in NFL history was John Elway when he won back-to-back Super Bowls for the Denver Broncos in 1997 and 1998, at Peyton Manning’s current age of 38. With that in mind, there is no doubt that the New England Patriots have been planning to replace Brady for some time now, and although Brady has said publicly that he plans to play forever, it’s inevitable that he will be forced to retire sometime in the next 2 to 3 years.

In his 15 seasons in the NFL, Brady has become recognized as one of the greatest quarterbacks of all time. He has been to 5 Super Bowls, won 3, and has been the MVP of 2 of them. Under the ownership of Robert Kraft, and the coaching of Bill Belichick, Brady has brought the Patriots from a perennial laughing stock in the league to one of its most prestigious franchises.

With that said, a lot of the success Brady has had in his career was early on. Brady has not won a Super Bowl since 2004, and many believe that his performance has started to decline in recent years. Since 2010, Brady’s completion percentage has decreased every year, and since 2011 his number of touchdowns passes per season has decreased as well. Whether this has more to do with his age, declining skill set, or simply the lack of offensive weapons around him remains unclear, but as Brady enters the twilight of his career, the Patriots have a big decision to make regarding the future of their franchise quarterback.

In 2013, “Tom Brady signed a 5 year / $70.6 million contract with the New England Patriots, including a $30,000,000 signing bonus, $33,000,000 guaranteed, and an annual average salary of $14,120,000,” according to the article on Spotrac.com. In the fine print of this contract, there is a clause that states that if Tom Brady is on the active roster for the final game of the 2014 season, his base salary of almost $15,000,000 becomes guaranteed for the next three years. Therefore, if Brady stays healthy this season, performs at an above average level, and is not traded, he is guaranteed to be a New England patriot through the 2017 season at the age of 40. It is safe to say that Brady is fighting for his career this season. Brady must prove to the Patriots that he can still perform at a high level, and that he deserves to play out the rest of his current contract.

This puts the Patriots in a tough position if Brady performs well this year. Keeping Brady for the next three years means paying him another $45 million dollars. There are no guarantees how the rest of this season will turn out, but so far through seven games, Brady has thrown for 1,705 yards, 13 touchdowns, and 2 interceptions. He appears to still be performing at a high level, but can the Patriots expect him to have the same production in the years at the age of 40? Is Brady one vicious hit away from being replaced by Garoppolo, similar to how Brady’s career began when he replaced the injured and aging veteran Drew Bledsoe? The future is uncertain for Brady, but Jimmy Garoppolo was drafted by the New England Patriots for a reason, and he might be replacing Brady sooner than people think.

Sporting Kansas City honored at White House, plays a little ball

By Samantha Ehlinger
MCT Campus

According to President Barack Obama, something is going on with Kansas City, Mo.

The president on Wednesday not only praised players from Sporting Kansas City for “getting it all started” to help soccer grow in the United States, but also the city’s fans for their enthusiasm for sports.

“The thing about Kansas City fans is that even in below-freezing temperatures, the seats were filled,” Obama said about the MLS championship game in 2013. “This is a city that loves soccer.”

And not only did the fans stick around on Dec. 6, 2013, but the players stuck it out through 10 rounds of nail-biting penalty kicks to finally clinch the 2013 MLS Championship Cup against Real Salt Lake.

Kansas City soccer took center stage Wednesday in Sporting KC met the president for a ceremony to celebrate that championship. Obama joked around with the team and congratulated it on its successes before posing for a photo in the East Room of the White House.

“As soccer continues to grow here in the United States, it does so in large part because of the great examples of dedicated fans in Kansas City,” Obama said.

Forward Dom Dwyer, who is from England, said the experience at the White House was “unbelievable.”

“You know, I never thought I’d get a chance to come to the White House, maybe even be in America, so it’s an amazing experience for me,” he said.

The ceremony in Washington was another marker of a fantastic week for fans of Kansas City sports. In football, the Kansas City Chiefs dominated the New England Patriots on Monday night, 41-14.

Then the Sporting KC team cheered on Kansas City baseball late Tuesday, when the Royals pulled out a stunning extra-inning victory over the Oakland A’s in a wild-card game their first playoff win in 29 years.

Sporting KC team captain Matt Besler grew up in the Kansas City area, and he said Tuesday’s game, which he watched on TV, was the most exciting baseball game he’s ever seen. “It’s an exciting time to be part of sports in Kansas City,” Besler said. “The energy in the city is the highest it’s ever been.”

Later in the afternoon, the Sporting KC players helped with a youth soccer clinic on the White House lawn.

“People said their time at the White House will not be a distraction but will motivate the team for its upcoming games. Sporting KC will play D.C. United on Friday,” Obama said.

Obama also congratulated Sporting Kansas City’s manager for winning MLS Championship Cup titles twice as a player and as a coach.

Peter Vermes played in 2000 for Kansas City’s then-Wizards when they won the MLS championship. Now, Vermes is making his trip to the White House as the manager of the 2013 champs.

“It was obviously a tremendous honor for us as an organization to come here and be recognized,” Vermes said. “It’s definitely a historical day in Sporting Kansas City’s history.”

For many players, including Besler, it was their first time to visit the White House. “It’s a huge honor and it’s something we will all definitely remember for the rest of our lives,” Besler said.

This summer, Besler and midfielder Graham Zusi played for the first time on the U.S. Men’s National Team. Zusi said Sporting KC is ready to defend its championship.

“I think naturally the team who wins the championship always has a bigger target on their back than in years before,” Zusi said. “So we expect everyone’s top game.”

Letter to the Editor

As an American, Christian, and combat veteran who served in Afghanistan I was offended to see the Archway’s insensitive choice for Comic of the Week, published on October 2, 2014. In light of the recent acts of terror, including the beheadings of Iraqi Christians, British and Australian citizens, as well as Americans (both in Iraq and the US), I was disgusted to see a cartoon depicting a decapitated body laying lifeless on the ground with a severed head, placed on a wooden-stake, in the foreground. I am ashamed, as a student and member of the Bryant community, that the staff of the Archway failed to see the problem with this image; I hope that it was merely an oversight and not done intentionally. I urge you to publish an apology to those this thoughtless image may have offended.

Thank You,
Jason Boulay

Seven statements students wish they could say to professors, but never do

By Keith B. Murray
Professor, Faculty of Marketing

Note: This article is Part 1 of a 2-part series on what people think but almost never say. Since the early days in my career as a young clinical psychologist, I have found myself asking the same important questions: Why do people say certain things? What might they mean? Why do they say some things and not others? Why don't they say the things that are most important to them? Sometimes, I wish I could ask my professors things like these, but I know they would not understand what I'm asking, and I'm not sure they would understand me even if I did. I want my professors to treat me with the same care, thoughtfulness, and professionalism that I expect from them. I want my professors to listen to me, to understand me, to respect me, and to value me as a human being. I want my professors to be honest, to be fair, to be consistent, and to be consistent in their expectations. I want my professors to be mentors, role models, and friends. I want my professors to be the best they can be, and I want them to do the same for me.

[1] You expect me to get excited about your course, when a lot of the time you don't seem to be very interested yourself. I want you to treat me as if you were excited about your course. I want you to share your enthusiasm with me. I want you to make me want to learn. I want you to make me want to succeed.

[2] I want my professors to understand that I am a human being, with my own thoughts, feelings, and experiences. I want my professors to understand that I am a person, with my own interests, goals, and aspirations. I want my professors to understand that I am a student, with my own challenges, problems, and successes. I want my professors to understand that I am a unique individual, with my own strengths, weaknesses, and potential.

[3] I wish I could trust you more. I want you to be honest with me. I want you to be truthful with me. I want you to be open with me. I want you to be clear with me. I want you to be honest about your mistakes, your failures, and your weaknesses. I want you to be honest about your strengths, your successes, and your self-confidence. I want you to be honest about your values, your beliefs, and your goals. I want you to be honest about your past, your present, and your future.

[4] I wish you would read my messages more carefully. I want you to be attentive to my messages. I want you to be responsive to my messages. I want you to be considerate of my messages. I want you to be thoughtful of my messages. I want you to be thoughtful of my feelings. I want you to be thoughtful of my needs.

[5] I wish you would give me more feedback. I want you to give me more feedback. I want you to give me feedback on my progress. I want you to give me feedback on my performance. I want you to give me feedback on my strengths. I want you to give me feedback on my weaknesses. I want you to give me feedback on my potential.

[6] I wish you would give me more assignments. I want you to give me more assignments. I want you to give me assignments that challenge me. I want you to give me assignments that require me to think. I want you to give me assignments that require me to do. I want you to give me assignments that require me to be. I want you to give me assignments that require me to be the best I can be.

[7] I wish you would give me more opportunities. I want you to give me more opportunities. I want you to give me opportunities to learn. I want you to give me opportunities to grow. I want you to give me opportunities to change. I want you to give me opportunities to develop. I want you to give me opportunities to be. I want you to give me opportunities to be the best I can be.

Opinion

Something catchy

By Nick Colantonio
Staff Writer

For the past four years hip-hop fans everywhere have become increasingly aware of the rapper Logic. Prior to “Under Pressure”, Logic has shocked the music industry with a plethora of mixtapes including his “Young Sinatra” series. Through these mixtapes, Logic’s unique flow on his songs and his ability to constantly surprise fans with new dimensions on his extensive musical career, logic continues to be regarded as one of the most promising young rappers in the music industry.

As expected, this album is tremendously lyrical and has a clear focus on that. Throughout the project, one can tell Logic is much more focused on storytelling and much less on cleverly worded sentences, references, etc., which are all primary elements on his prior tapes. This sets this album apart from anything ever released before by Logic. It says a great deal about his flexibility as a rapper, that he is able to formulate projects significantly diverse from one another.

Even though most of the songs featured on “Under Pressure” are not particularly “clever” in lyricism, their storylines and songs overall are dense, requiring fans to listen to fully digest. Logic continually backs up claims that he is one of the best living lyricists and ultimate storytellers with each installment on this album. Through Logic’s storytelling style on “Under Pressure” he paints pictures of struggle, ambition, and overall getting his life to where he is now, which is extremely moving and inspiring.

The soulful instrumental base of “Under Pressure” backs up Logic’s powerful flows flawlessly. Logic and his close friend, in-house producer 6ix, produced the bulk of the project with No I.D. execlusively producing. Each instrumental is original, abstract, and innovative, always aiding Logic in his points and delivery. It is so difficult to pick a favorite too, because each instrumental blends so well with the next and sounds so strong and thought out.

In terms of my favorite songs, I have to say I loved “I’m Gone,” “Metropolis,” and that first half of the song “Under Pressure.” Holistically, this album is fantastic and well worth the wait. From the start to finish, the Logic fans were looking for and somehow is mainstream friendly. The only complaint I have with this album is the first half of track #1, “Under Pressure,” which somewhat fits but overall contributes little to the album. I feel, and parts of “Soul Food” seem unnecessary. Seriously, though, this album is incredible and is probably the best rap album since “G.O.A.T. Kid, Moab City” by Kendrick Lamar.

My Rating: Strong to firm 9

What do you all think of “Under Pressure”? What should I review next?

Other Albums of the Past Couple of Weeks to Check Out:

Anything Goes” – Florida Georgia Line
“Songs of Innocence” – U2
“Blood Moon: Year of the Wolf” – Game
“People Keep Talking” – Hoodie Allen
“Everything Will Be Alright In The End” – Weezer
“You’re Dead!” – Flying Lotus
“Lift a Sale” – Yellowcard

As for Nick’s place as a whole, the idea of a new food service provider coming in is to invigorate the student body and bring in new, exciting ideas, as well as get students interested about the food, and the process in which we receive it. What has actually happened is just the opposite. Sodexo offered the capability of ordering your food online. Aramark does not. Sodexo lets you know when the students to order their desired meal. Aramark does not. Instead, Aramark runs the risk of user error due to one employee typing in every student’s individual order. This being said, every student ordered from Nick’s Place this year, I have yet to receive the item(s) in which I ordered made correctly. I am consistently sending my order back to be fixed or added too. Sometimes my order just comes plain old “lost.” Talk about going to a business school and efficiency. This is the most inefficient use of a hired workers possible. If the kids were implemented, this would allow the students to type up their own order and also create the ability for the hired workers to maintain the cleanliness of the front like napkins, utensils, sauces, etc.

Lastly, I would like to point out how the idea of continuous dining is not what it is perceived to be. The idea of continuous dining is to be able to eat at anytime during hours of operation and be able to get a meal. There have been countless times in which I have walked into Salmo during the time we will call “off peak eating hours” and there is no food to be found other than bread and fruit. How does this promote the idea of continuous dining if I can’t dine while the dining hall is open? Better yet, when I ask for more food or more meat or more of anything, the push back is “oh you can’t pay for the food, I pay to go to school here. I should be able to get what I want, and how I want it. Otherwise, why should I be paying for this meal plan at Bryant?”

Dining issues with new plan

By Allie Miller
Staff Writer

With the number of confirmed cases doubling each month and thousands of lives claimed, Ebola is an unforgiving disease that seems to have no intention of slowing down. As of this editorial, there have been 3 confirmed cases and one death in the United States, which has caused many wonder if Americans should be concerned. Some Americans are calling for a travel ban for citizens highly exposed to Ebola, while others think we should be preparing to handle Ebola, while others think we should be preparing to handle Ebola.

Ebola: should we be concerned?

As expected, this album is tremendously lyrical and has a clear focus on that. Throughout the project, one can tell Logic is much more focused on storytelling and much less on cleverly worded sentences, references, etc., which are all primary elements on his prior tapes. This sets this album apart from anything ever released before by Logic. It says a great deal about his flexibility as a rapper, that he is able to formulate projects significantly diverse from one another.

Early cases of the virus in West Africa seemed to confirm that the disease had been contained. People believed the disease had been contained; however, the disease continued to spread. The spread of Ebola is hard to stop due to its high infectivity rate. When an infected person touches an uninfected person, the uninfected person can become infected and continue the spread. Some cases have been found and that preventative vaccines will be found.

The United States is prepared to handle Ebola, while others think we should be preparing to handle Ebola, while others think we should be preparing to handle Ebola. The estimated cost for a 14 meal plan for the entire 2014 school year would run you about $5,550. This being said, let’s split this half in four pieces, a semester for a semester, which would give you $1,377 in spending dollars with this meal plan option. If you went ahead and used every single possible dollar within the entire first semester for a 14 meal plan you would total a whopping $1,775 given that a meal at Salomonson dining hall costs $8.50. Let’s add the $125 dining dollars that come with the plan and that would make it a grand total of $1,910 spent on food. Where’s my remaining value of $865? This baffles me.

This brings me to my next topic.

As for Nick’s place as a whole, the idea of a new food service provider coming in is to invigorate the student body and bring in new, exciting ideas, as well as get students interested about the food, and the process in which we receive it. What has actually happened is just the opposite. Sodexo offered the capability of ordering your food online. Aramark does not. Sodexo lets you know when the students to order their desired meal. Featuring feminism: Laura Echezabal

Laura’s idea that ‘feminism is the equality of all people regardless of any semblance of differences’ has always been a major pillar in her belief set

By Aubrey Waz
Staff Writer

“Feminism means, to me, that everyone is equal. Not just men and women, but everyone, regardless of race, sexual orientation, etc.” Feminism is an integral part of the life of Laura Echezabal, something that she holds dear and is willing to fight for. Feminism in her everyday life is not about trying to overpower men, or the other women in her life, but rather focusing on doing what feels right to her.

Echezabal works to avoid judging people and their actions, because she knows that everyone has their own reasons for speaking, acting, and reacting a certain way. She is a big supporter of the Pay It Forward ideal, where one small action can snowball into something that benefits a great number of other people, and leads to the increased welfare of all.

Echezabal is doing a double concentration in Management and Applied Psychology with the hope of somehow changing the world to make it a better and more accepting place after graduation. At the spring of 2015, Bryant has really helped to cultivate the sense of feminist pride and emotion that Echezabal maintains throughout her daily life. Though she believes that feminism has always been a component of who she is as a person, her self-definition as a feminist – her belief in equality of all people regardless of any semblance of differences, has always been a major pillar in her belief set. It was not until she was taking a human resources class here at Bryant University that she realized how pertinent this issue was to the world outside of her own circle.

The moment that changed Echezabal’s perspective was when class discussion turned to the idea of maternity leave. She became very upset to think about the very stark reality that after a baby is born men are expected to return to work immediately. This was a ludicrous idea to Echezabal. “The father should have time with his newborn baby, and the mother needs help! Why are men being discriminated against because they did not physically give birth to the child? A few weeks of time off could only benefit all parties involved!”

It is in this way that Bryant University provides a real-life prospective that many other colleges and universities avoid, thus showing the students the reality of the real world.

Is it possible to not drink and have fun at Bryant?

By Chris Kagdeleir
Contributing writer

It’s Sunday morning and you just woke up after a long night, as you stir in bed with your throat parched, head throbbing in pain, and your whole body feeling as though you were hit by a car last night. You are hung-over and the simple task of moving to snag a bottle of water from under your bed, or getting up to get an Advil seems like a challenge, which is nothing compared to getting to work in order to prep for the night ahead. Nine o’clock rolls around and people begin to get pregame for this evening’s festivities. However, instead of thinking about what lies ahead of you for the night you are reminiscing about your miserable hangover that you experienced that previous Sunday, and wondering if you are actually going to go through it all ever again and drink this weekend.

If you decided to keep your promise to yourself and not drink this weekend, and were curious if it was still possible to have fun at Bryant and not drink. I have asked myself these questions a few times, which is why I decided to do some personal research.

I came to this conclusion this past weekend after experiencing one too many nasty hangovers and not drinking this weekend posed only one challenge; it is too awkward to be sober around a bunch of drunken people. An important note to remember is that everyone around you is, for most part drunk, which means that unless you tell everyone you’re sober they’ll have no idea.

The fact that you didn’t drink doesn’t mean that you have to spend your weekend in your room all night, rather you can still do all the same things that you would normally do on a Friday or Saturday night. Looking back on this weekend I found that I was able to have just as much fun going out with friends being sober as I would have had I been drinking. The mornings were also nicer because I didn’t feel hang, over, and was able to start my day as soon as I woke up.

Total Recall: a groundbreaking film!

By Shayan Ushani  
Staff Writer

Total Recall is a wonderful groundbreaking film providing a relief from the dull action movies of a couple years prior. At its time of release in 1990, it was one of the most expensive films ever made. Although the $65 million was astounding then, it does not compare to movies produced afterwards such as Tangled, John Carter, or Avatar that all had a budget exceeding $200 million. Total Recall went on to earn a box office of over $260 million.

The movie encompasses a range of genres, leaping between adventure, action, and sci-fi. Total Recall was the last of its kind, having used miniature effects. Movies such as 2001: A Space Odyssey employed heavy use of such technique, where scale models are used along with unique photography. Miniature effects were made obsolete soon after with the use of computer-generated imagery. Ironically, it was Arnold Schwarzenegger starring in James Cameron’s Terminator 2 that revolutionized the industry with its use of CGI. (Jurassic Park, which came two years after, played a huge role in CGI coming to Hollywood as well).

Despite incredible advances in technology many successful films have continued to use miniatures such as Titanic, Casino Royale, and The Dark Knight. In Total Recall’s 113 minute running time, there was only one 42 second CGI scene. It depicted a simple use of x-ray. Despite antiquated techniques in cinematography that may look awkward today, the film looked great for its time, and its unique aura still has a presence in my heart.

With strong violence, language, and scenes of nudity the film was originally given an X rating. One of few complaints I have about this movie is I fear the producers involved nudity where it was not needed in order to make a shock factor, grab the audience’s attention through parts that were slow, and to sell tickets. It is a shame that this movie is known to many as ‘That movie with the three boobed Martian chick.’ To combat any audience’s fears and ensure a successful box office, executives downplayed some of the scenes to get its R rating. Filming primarily took place in Mexico City, not something that is apparent with much filming taking place inside the studio and on staged sets.

In the first scene, advanced technology is shown, displaying a setting in the future. The movie takes place in 2084, and revolves around Douglas Quaid played by Arnold Schwarzenegger. Troubled by recurring dreams, he looks into Rekall. The company is one that offers artificial vacation experiences. It works by implanting a memory that would provide him with recollections of a fantastic vacation, while never leaving the company. Douglas undergoes questions to find what vacation would suit him best, and he chooses to go to Mars as a secret agent.

What covers the rest of the plot is a captivating adventure, more than any Douglas could have hoped for out of his visit. As the memory was about to be implanted, he has a bad reaction and ends up going back to his house only to be approached by a group of people. He engages in a fight, and ends up killing them. Returning home, he finds his life to be a lie when his wife, Lori, says that their marriage is false and just a memory. What ensues after this is a crazy adventure, leaving a big finish that will have you puzzling as to what truly happened.

Total Recall’s legacy is one for the ages. It has inspired many other directors, and led to a new way of thinking in filmography. Roger Ebert gave the film 3.5 stars out of 4, despite being harsh and critical at times, and continued to praise it. The movie’s success led to the writing of a sequel. The screenplay originally titled Total Recall 2, underwent drastic changes and went on a different course. The movie caught Hollywood legend, Steven Spielberg’s eye, and was released in 2002 as Minority Report starring Tom Cruise. Total Recall was remade in 2012, starring big stars such as Colin Farrell and Bryan Cranston. The remake met harsh criticism, and was generally not well liked. For fans of brilliant concepts that will leave you testing your faith, I recommend to you Total Recall.
Dial M for Murder: intense and gripping!

WARWICK, RI – Ocean State Theatre Company (OSTC), currently celebrating its third season in its new state-of-the-art theatre in Warwick is proud to present Frederick Knott's intense and gripping thriller, Dial M for Murder. This brilliant dark tale, with furnishings provided by OSTC's "Partner in Design," Ethan Allen, and additional support provided by Healthtrax Fitness & Wellness, will enjoy a limited run at Ocean State Theatre from October 29 – November 16. Originally written for the stage, this edge-of-your-seat drama was later made famous by the master of suspense, Alfred Hitchcock, who turned it into a cinematic masterpiece. The plot revolves around Tony Wendice who married his wife, Margot, for her money and now plans to murder her for the same reason. He arranges the perfect murder. He blackmails a scoundrel he used to know, into killing her for a fee and arranges a brilliant alibi for himself. Unfortunately... the murderer gets murdered and the victim survives. But this doesn't stop the husband. He sees his hireling's death as an opportunity to have his wife convicted for the murder of the man who tried to murder her! With a killer dead and a victim in jail, will the police inspector discover the truth? Will the husband be revealed? This murder thriller will keep you spellbound with suspense!

Directed by Producing Artistic Director Amiee Turner, who recently directed the company's season opener, My Fair Lady, the cast includes award-winning (Elliot Norton/IRNE) actress, Aimee Doherty, who recently appeared in Into the Woods (Lyric Stage) and Good People (The Gamm), will be making his OSTC debut as Margot Wendice. Bill Mootos, whose recent area appearances include Absence (New Century Theatre) and Clybourne Park (New Century Theatre) and is a rotating cast member in the theatre's Piano Bar Series will continue with "Music from Stage and Screen" and will be serving this to chocolate lovers everywhere. Simple is chocolate lava cake's middle name. What is its last name you ask? I'm sure after one bite, you will be able to figure that out for yourself.

Ingredients:
- 6 (1-ounce) squares bittersweet chocolate
- 2 (1-ounce) squares semisweet chocolate
- 10 tablespoons (1 1/4 stick) butter
- 1/2 cup all-purpose flour
- 1 1/2 cups confectioners' sugar
- 3 large eggs
- 3 egg yolks
- 1 teaspoon vanilla extract

Directions:
1. Preheat oven to 425 degrees F.
2. Grease 6 (6-ounce) custard cups.
3. Melt the chocolates and butter in the microwave, or in a double boiler.
4. Add the flour and sugar to chocolate mixture.
5. Stir in the eggs and yolks until smooth.
6. Stir in the vanilla.
7. Divide the batter evenly among the custard cups.
8. Place in the oven and bake for 14 minutes.
9. The edges should be firm but the center will be t unlock. Run a knife around the edges to loosen and put onto dessert plates.

Talk about a volcanic eruption! Don’t go grab your fire retardant suit right away though, this lava is nothing to worry about (unless you are desperately afraid of chocolate goodness). On the outside, this dessert is just your average chocolate cake. But once it is cut into, out flows a river of warm, rich chocolate filling just waiting to be eaten up. This chocolate lava cake is also very welcoming to other toppings, you can be fancy with just a light covering of powdered sugar on top, or go all out by adding a scoop of ice cream topped with whipped cream and a cherry. To get your taste buds going even more, you can add some Bailey’s Irish Cream liquor to this recipe, if you're really trying to pump up a party. This dessert may look intimidating, but in just 30 minutes you could be enjoying this dessert. The lava flows a river of warm, rich chocolate filling just waiting to be eaten up. WARWICK, RI – Ocean State Theatre Company (OSTC) is proud to host an information session regarding 2014 Rhode Island Ballot Question 5, at their state-of-the-art theatre located at 1245 Jefferson Boulevard in Warwick, on Monday, October 27 at 10:00 am.

“We think it’s important for the general population to understand that although the passage of Question 5 will strengthen many arts organizations, it is not about supporting ‘art,’” said Amiee Turner, Producing Artistic Director of Ocean State Theatre Company. “At its core, Question 5 is about job creation and economic investment and every Rhode Islander should be interested in something that will improve the economy and put folks to work, whether or not they are interested in the arts.

Mayor Scott Avedisian, Randall Rosenbaum, Executive Director of the Rhode Island State Council on the Arts, Amiee Turner, Producing Artistic Director of Ocean State Theatre Company, and Paul MacDonald, President of the Providence Central Federated Labor Council, will be featured speakers at the event and members of Warwick’s arts and historic organizations, as well as business and community leaders, will be on hand to field any questions.

Passage of Question 5 would authorize the state to borrow $35 million to support improvements and construction at arts facilities and historic sites throughout the state. In addition to the nine performing arts organizations named in Question 5, including Trinity Repertory Company, Rhode Island Philharmonic Orchestra & Music School, Newport Performing Arts Center, United Theatre/Westerly Land Trust, The Chorus of Westerly, The Stadium Theatre Conservatory in Woonsocket, 2nd Story Theatre, AS220, and WaterFire Providence, the bond would fund a competitive matching grant program for other qualified non-profit arts facilities across the state. It is the competitive grant program that could significantly impact Ocean State Theatre Company.

Most importantly, the improvements made to the named facilities will create nearly 600 permanent jobs, 600 temporary jobs and will add $47 million in annual economic activity to the sector. With $5 million for historic preservation grants also included in Question 5, this bond will fund historic restoration for some of our finest historical assets.

Warwick Mayor Scott Avedisian said, “Throughout the course of my administration, we have made it a priority to preserve our city’s historic structures and ensure that Warwick is fertile ground for cultural and historic organizations to locate and expand. With the Warwick Art Museum, Clouds Hill Victorian House attaining museum status, Ocean State Theatre Company opening its doors here, and the Steamship Historical Society of America recently bringing its international headquarters to Warwick, we have made a lot of progress. Question 5 will help us build upon the momentum we’ve gained in bolstering our city’s cultural and historic organizations. It will also fuel our economy by creating hundreds of jobs for our residents.”

The information session regarding 2014 Rhode Island Ballot Question 5, will be held at Ocean State Theatre on Monday, October 27 at 10:00 am and is open to the general public. The theatre is located at 1245 Jefferson Boulevard, Warwick, RI. Seating will be available on a first-come, first-served basis. For additional information about the information session, please call Karen at (401) 921-1777 x112. For additional information about this ballot question, visit www.yeson5ri.com.

Ocean State Theatre Company (OSTC) is a professional not-for-profit regional theatre whose mission is to preserve and pass on the tradition of live, professional theatre – including the American musical – and to pursue avenues of enrichment and education for the benefit of the state of Rhode Island and the surrounding region through the theatre arts. OSTC, which re-opened and ran the historic theatre By The Sea in Matunuck, RI from 2007-2012 and began producing shows in Warwick, RI in 2012, is an IRS designated not-for-profit 501(c)(3) corporation.

The Poetry Corner

October
By Robert Frost

O hushed October morning mild,
Thy leaves have ripened to the fall;
Tomorrow's wind, if it be wild,
Should waste them all.
The crows above the forest call;
Tomorrow they may form and go.
O hushed October morning mild,
Begin the hours of this day slow.
Make the day seem to us less brief.
Hearts not averse to being beguiled,
Beguile us in the way you know.
Release one leaf at break of day;
At noon release another leaf;
One from our trees, one far away.
Retard the sun with gentle mist;
Enchant the land with amethyst.
Slow, slow!
For the grapes' sake, if they were all,
Whose leaves already are burnt with frost,
Whose clustered fruit must else be lost—
For the grapes' sake along the wall.

The College Scoop

The Equinox
Keene State College

Videos of a street lamp being shaken down, people overturning a car, police barricades, helicopters and text messages telling people to go home manifested at this year's annual Pumpkin Fest, as festivities located around Keene State College took a turn for the worse this past Friday and Saturday Oct. 17 and 18.

In the Keene Police log from Saturday Oct. 18, several disturbances, liquor law violations and requests to keep the peace were cited, with arrests made.

Although no numbers have been confirmed, CNN affiliates in a CNN article reported “dozens of arrests” and the Southwest New Hampshire Mutual Aid Dispatch Center reported “multiple ambulances being sent to the scene.”

Early Saturday morning mass text messages were sent out from the college to the student body, urging students to return to their residences.

"The number and size of gatherings tonight are unsafe conditions placing you and local residents in harms way. Please return to your residences immediately," the messages read, "Ongoing disruptive behavior will result in significant disciplinary action. The current situation is unacceptable and will not be tolerated."

The text messages ended with numbers for the Keene Police Department and KSC Campus Safety being provided, asking students to "look out for each other."

The Cavalier Daily
University of Virginia

Student group Action Against Ebola is hosting Ebola Awareness Week this week to raise funds for and student awareness of the outbreak of Ebola in Guinea, Liberia and Sierra Leone.

AAE was established about three weeks ago, but it has already organized a series of events to spread awareness, raise money and accept donated supplies.

The organization aims to spread awareness about Ebola and what students can do to make a difference in light of its recent spread across West Africa.

"There are many people that don't care, and we need to unroot that and affect people's minds," fourth-year College student Clarisse Awamengwi said. "There's no reason to panic; the people who should be panicked are the people who do not have medical supplies or access to doctors."
